# Cloud Computing: Automating the Virtualized Data Center

## Table of Contents

### Contents

### Introduction

### Part I: Introduction to Managing Virtualization and Cloud Computing Environments

#### Chapter 1 Cloud Computing Concepts

Virtualization

Cloud Computing

#### Chapter 2 Cloud Design Patterns and Use Cases

Typical Design Patterns and Use Cases

Deployment Models

IaaS as a Foundation

Cloud Consumer Operating Model

#### Chapter 3 Data Center Architecture and Technologies

Architecture

Architectural Building Blocks of a Data Center

Design Evolution in the Data Center

Service Assurance

Evolution of the Services Platform

#### Chapter 4 IT Services

Classification of IT Services and Information

Four Cornerstones of Cloud Economics

#### Chapter 5 The Cisco Cloud Strategy

A Brief History of IT Service Delivery

The Cisco Cloud Strategy: An Overview

# **Table of Contents**

Infrastructure Evolution to Support Cloud Services

## **Part II: Managing Cloud Services**

### **Chapter 6 Cloud Management Reference Architecture**

Standards

TMF eTOM

Information Technology Infrastructure Library

ITU-T TMN

Building Cloud Models Using Standards

Integration of Management Systems/Functions

### **Chapter 7 Service Fulfillment**

Cloud Fulfillment Using ITILV3

Cloud End-to-End Service Provisioning Flow

Service Orchestration

Cloud End-to-End Architecture Model

### **Chapter 8 Service Assurance**

Cloud Assurance Flow Using the ITIL Process

Cloud End-to-End Monitoring Flow

Service Assurance Architecture

### **Chapter 9 Billing and Chargeback**

Billing and Chargeback Terminology

Cloud Consumers and Providers

Cloud Services Billing Considerations

Cloud Order-to-Cash Process Flow

Billing and Charging Architecture

## **Part III: Managing Cloud Resources**

### **Chapter 10 Technical Building Blocks of IaaS**

IaaS Service Composition

Developing and Offering Cloud Products

Persisting Service Data

# **Table of Contents**

## **Chapter 11 Automating and Orchestration Resources**

On-Boarding Resources: Building the Cloud

Adding Services to the Cloud

Creation and Placement Strategies

Service Life Cycle Management

## **Chapter 12 Cloud Capacity Management**

Tetris and the Cloud

Cloud Capacity Model

Demand Forecasting

Procurement in the Cloud

## **Chapter 13 Providing the Right Cloud User Experience**

The Cloud User Interface

Providing User Self-Care

Integration

Providing an Open API

## **Chapter 14 Adopting Cloud from a Maturity Perspective**

Maturity Models

A Cloud Maturity Model

Using the Cloud Maturity Model

## **Appendix A: Case Study: Cloud Providers - Hybrid Cloud**

Cisco Cloud Enablement Services

Company Profile

Business Goals

Cloud Strategy

Cloud Maturity

IT Platform

Cloud Reference Model

Private Cloud Services

Orchestration and Automation Transition Architecture

# **Table of Contents**

Telco Solution

Solution

Out-of-the-Box Services

Diggit Service Requirements

Appendix B: Terms and Acronyms
