Who Is This Book For?

What Do You Need To Use This Book?

Prerequisite Knowledge

Software Applications

Source Files

Using the Example Games in Your Projects

What Youll Find in This Book

The FlashGameU.com Website

1. Using Flash and ActionScript 3.0

What Is ActionScript 3.0?

Creating a Simple ActionScript Program

A Simple Use of trace

Creating Screen Output

Our First ActionScript 3.0 Class

Working with Flash CS5

Display Objects and Display Lists

The Stage

The Library

The Timeline

Table of Contents

Writing and Editing ActionScript

ActionScript Game Programming Strategies

Single Class Method

Smallest-Step Approach

Good Programming Practices

Basic ActionScript Concepts

Creating and Using Variables

Condition Statements

Loops

Functions

Testing and Debugging

Types of Bugs

Methods of Testing

Using the Debugger

Publishing Your Game

Formats

Flash

HTML

ActionScript Game Programming Checklist

Publishing and Document Settings

Class, Function, and Variable Names

Runtime Issues

Testing Issues

2. ActionScript Game Elements

Creating Visual Objects

Using Movie Clips

Making Buttons

Drawing Shapes

Table of Contents

Drawing Text

Creating Linked Text

Creating Sprite Groups

Setting Sprite Depth

Accepting Player Input

Mouse Input

Keyboard Input

Text Input

Creating Animation

Using Timers

Time-Based Animation

Physics-Based Animation

Programming User Interaction

Moving Sprites

Dragging Sprites

Collision Detection

Accessing External Data

External Variables

Loading Data

Saving Local Data

Miscellaneous Game Elements

Custom Cursors

Playing Sounds

Loading Screen

Random Numbers

Shuffling an Array

Displaying a Clock

System Data

Game Theft and Security

Table of Contents

3. Basic Game Framework: A Matching Game

Placing Interactive Elements

- Methods for Creating Game Pieces
- Setting Up the Flash Movie
- Creating the Basic ActionScript Class
- Using Constants for Better Coding
- Shuffling and Assigning Cards

Game Play

- Adding Mouse Listeners
- Setting Up Game Logic
- Checking for Game Over

Encapsulating the Game

- Creating the Game Movie Clip
- Adding an Introduction Screen
- Adding a Play Again Button

Adding Scoring and a Clock

- Adding Scoring
- Adding a Clock
- Displaying Time
- Displaying Score and Time After the Game Is Over

Adding Game Effects

- Animated Card Flips
- Limited Card-Viewing Time
- Sound Effects

Modifying the Game

4. Brain Games: Memory and Deduction

Arrays and Data Objects

- Arrays

Table of Contents

Data Objects

Arrays of Data Objects

Memory Game

Preparing the Movie

Programming Strategy

Class Definition

Setting the Text, Lights, and Sounds

Playing the Sequence

Switching Lights On and Off

Accepting and Checking Player Input

Modifying the Game

Deduction Game

Setting Up the Movie

Defining the Class

Starting a New Game

Checking Player Guesses

Evaluating Player Moves

Ending the Game

Clearing Game Elements

Modifying the Game

5. Game Animation: Shooting and Bouncing Games

Game Animation

Time-Based Animation

Coding Time-Based Animation

Air Raid

Movie Setup and Approach

Flying Airplanes

Moving Gun

Skyward Bullets

Table of Contents

The Game Class

Modifying the Game

Paddle Ball

Setting Up the Movie

Class Definition

Starting the Game

Starting a New Ball

Game Animation and Collision Detection

Game Over

Modifying the Game

6. Picture Puzzles: Sliding and Jigsaw

Manipulating Bitmap Images

Loading a Bitmap

Breaking a Bitmap into Pieces

Sliding Puzzle Game

Setting Up the Movie

Setting Up the Class

Loading the Image

Cutting the Bitmap into Pieces

Shuffling the Pieces

Reacting to Player Clicks

Animating the Slide

Game Over and Cleanup

Modifying the Game

Jigsaw Puzzle Game

Setting Up the Class

Loading and Cutting the Image

Dragging Puzzle Pieces

Game Over

Table of Contents

Modifying the Game

7. Direction and Movement: Air Raid II, Space Rocks, and Balloon Pop

Using Math to Rotate and Move Objects

The Sin and Cos Functions

Using Cos and Sin to Drive a Car

Calculating an Angle from a Location

Air Raid II

Altering the Gun

Changing the Bullets

Changes to AirRaid2.as

Space Rocks

Game Elements and Design

Setting Up the Graphics

Setting Up the Class

Starting the Game

Score and Status Display Objects

Ship Movement and Player Input

Shields Up!

Rocks

Missiles

Game Control

Modifying the Game

New! Balloon Pop

Game Elements and Design

Setting Up the Graphics

Setting Up the Class

Starting the Game

Preparing a Game Level

Table of Contents

- Main Game Events
- Player Controls
- Popping Balloons
- Ending Levels and the Game
- Timeline Scripts
- Modifying the Game

8. Casual Games: Match Three and Collapsing Blocks

Reusable Class: Point Bursts

- Developing the Point Burst Class
- Using Point Bursts in a Movie

Match Three

- Playing Match Three
- Game Functionality Overview
- The Movie and MatchThree Class
- Setting Up the Grid
- Player Interaction
- Animating Piece Movement
- Finding Matches
- Finding Possible Moves
- Score Keeping and Game Over
- Modifying the Game

New! Collapsing Blocks

- Setting Up the Graphics
- Setting Up the Class
- Starting the Game
- Recursion
- Recursive Block Removal
- Falling Blocks
- Checking for Empty Columns

Table of Contents

Game Over

Modifying the Game

9. Word Games: Hangman and Word Search

Strings and Text Fields

ActionScript 3.0 String Handling

Applying Text Formatting to Text Fields

Hangman

Setting Up the Hangman

The Hangman Class

Word Search

Development Strategy

Defining the Class

Creating the Word Search Grid

User Interaction

Dealing with Found Words

Modifying the Game

10. Questions and Answers: Trivia and Quiz Games

Storing and Retrieving Game Data

Understanding XML Data

Importing External XML Files

Trapping Load Errors

Trivia Quiz

Designing a Simple Quiz Game

Setting Up the Movie

Setting Up the Class

Loading the Quiz Data

Message Text and Game Button

Moving the Game Forward

Table of Contents

Displaying the Questions and Answers

Judging the Answers

Ending the Game

Deluxe Trivia Quiz

Adding a Time Limit

Adding Hints

Adding a Factoid

Adding Complex Scoring

Randomizing the Questions

Picture Quiz

Better Answer Arrangement

Recognizing Two Types of Answers

Creating Loader Objects

Determining the Right Answer

Expanding the Click Area

Images for Questions

Modifying the Game

11. Action Games: Platform Games

Designing the Game

Level Design

Designing the Class

Planning Which Functions Are Needed

Building the Class

Class Definition

Starting the Game and Level

Keyboard Input

The Main Game Loop

Character Movement

Scrolling the Game Level

Table of Contents

- Checking for Collisions
- Enemy and Player Death
- Collecting Points and Objects
- Showing Player Status
- Ending the Levels and the Game
- The Game Dialog Box

Modifying the Game

12. Game Worlds: Driving and Racing Games

Creating a Top-Down Driving Game

- Creating a Top-Down World
- Game Design
- The Class Definition
- The Constructor Function
- Finding the Blocks
- Placing the Trash
- Keyboard Input
- The Game Loop
- Moving the Car
- Checking for Trash and Trashcan Collisions
- The Clock
- The Score Indicators
- Game End
- Modifying the Game

Building a Flash Racing Game

- Racing Game Elements
- Making the Track
- Sound Effects
- Constants and Variables
- Starting the Game

Table of Contents

The Main Game Loop
Car Movement
Checking Progress
The Countdown and the Clock
Game Over
Modifying the Game

New! 13. Card Games: Higher or Lower, Video Poker, and Blackjack

Higher or Lower

Creating the Deck
Setting Up the Class
Starting the Game
Responding to Player Moves
Cleaning Up
Modifying the Game

Video Poker

Shuffle Up and Deal
Timed Events
Making the Deck
Game Elements
Setting Up the Class
Shuffling the Cards
Timed Events
Heres the Deal
Drawing Cards
Finishing a Hand
Calculating Poker Winnings
Modifying the Game

Blackjack

Table of Contents

- Game Elements
- Setting Up the Class
- Starting the Game
- Timed Events
- Dealing Cards
- Hit or Stay
- The Dealers Moves
- Calculating Blackjack Hands
- Other Game Functions
- Modifying the Game

New! 14. 3D Games: Target Practice, Racing Game, and Dungeon Adventure

Flash 3D Basics

- Setting 3D Positions
- Rotating Objects

Target Practice

- Game Elements
- Setting Up the Class
- Starting the Game
- Drawing the Cannon and Target
- Moving the Cannon
- Firing the Cannonball
- Modifying the Game

3D Racing Game

- Game Elements
- Setting Up the Movie
- User Control
- Player Movement
- Z-Index Sorting

Table of Contents

Modifying the Game

3D Dungeon Adventure

Game Elements

Setting Up the Game

Constructing the Dungeon

Main Game Function

Player Movement

Collecting Coins

Game Limitations

Extending the Game

New! 15. Building Games for the iPhone

Getting Started with iOS Development

What You Need

Publishing for iOS

The iOS Game-Building Process

Design and Programming Considerations

Screen Size

No Web Page

Touch

Processor Speed

Accelerometers

Sliding Puzzle Adaptation

Adjusting the Screen Size

Changing Publishing Settings

Including the Image

Publishing

Marble Maze Game

Setting Up the Class

Starting the Game

Table of Contents

Game Play

Collision Detection

Game Over

Modifying the Game

Optimizing for iOS Devices

Use the GPU and Bitmap Caching

Object Pooling

Simplifying Events

Minimizing Screen Redrawing
