About the Author

Part I: Airport Parking Lot

1 Parking Cost Calculator Workshop

Valet Parking

Short-Term Parking

Economy and Long-Term Parking

Essential Examples

Summary

2 Valet Parking Automation

The First Example

Pairing for the First Test

Tabulated Tests

Summary

3 Automating the Remaining Parking Lots

Table of Contents

Short-Term Parking Lot

Economy Parking Lot

Summary

4 Wish and Collaborate

Specification Workshops

Wishful Thinking

Collaboration

Summary

Part II: Traffic Light Software System

5 Getting Started

Traffic Lights

FitNesse

Supporting Code

Summary

6 Light States

State Specifications

The First Test

Diving into the Code

Refactoring

Summary

7 First Crossing

Controller Specifications

Driving the Controller

Summary

8 Discover and Explore

Discover the Domain

Table of Contents

Drive the Production Code

Test Your Glue Code

Value Your Glue Code

Summary

Part III: Principles of Acceptance Test-Driven Development

9 Use Examples

Use a Proper Format

Refine the Examples

Cut Examples

Consider Gaps

Summary

10 Specify Collaboratively

Meet the Power of Three

Hold Workshops

Trawl Requirements

Summary

11 Automate Literally

Use Friendly Automation

Collaborate on Automation

Discover the Domain

Summary

12 Test Cleanly

Develop Test Automation

Listen to the Tests

Refactor Tests

Table of Contents

Summary

13 Successful ATDD

Appendix A: Cucumber

Feature Files

Step Definitions

Production Code

Appendix B: FitNesse

Wiki Structure

SLiM Tables

Support Code

Appendix C: Robot Framework

Sections

Library Code
