

THIRD EDITION

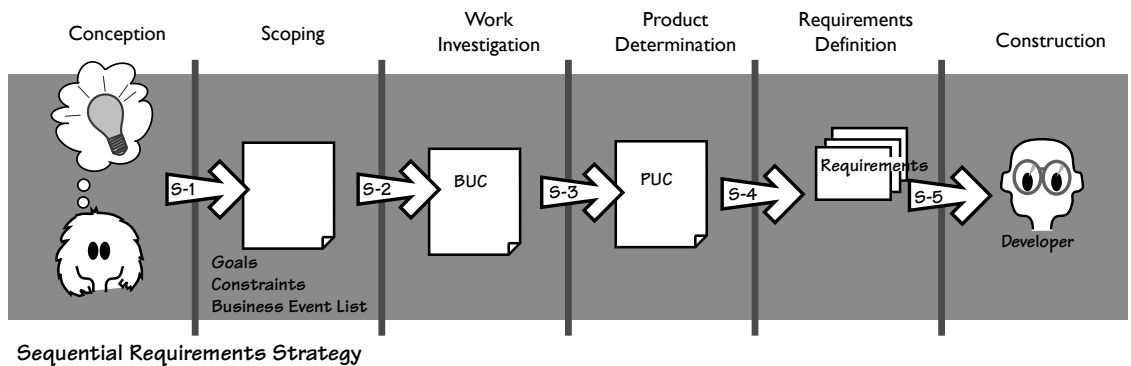

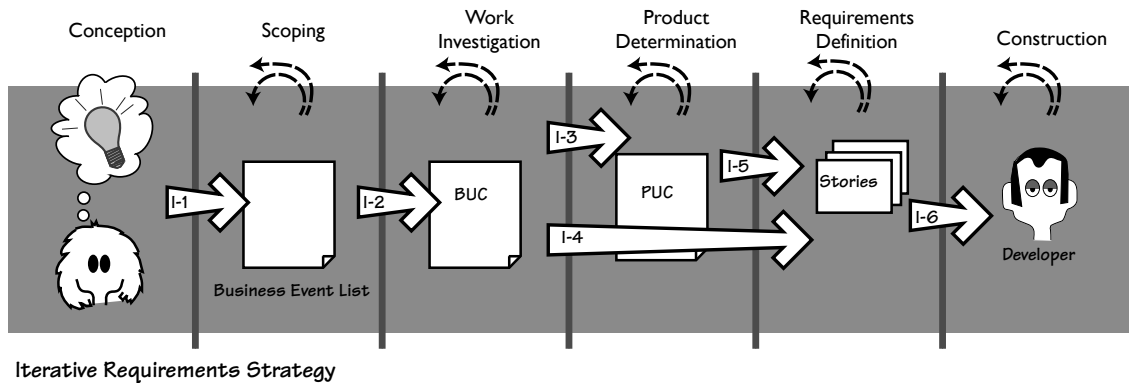

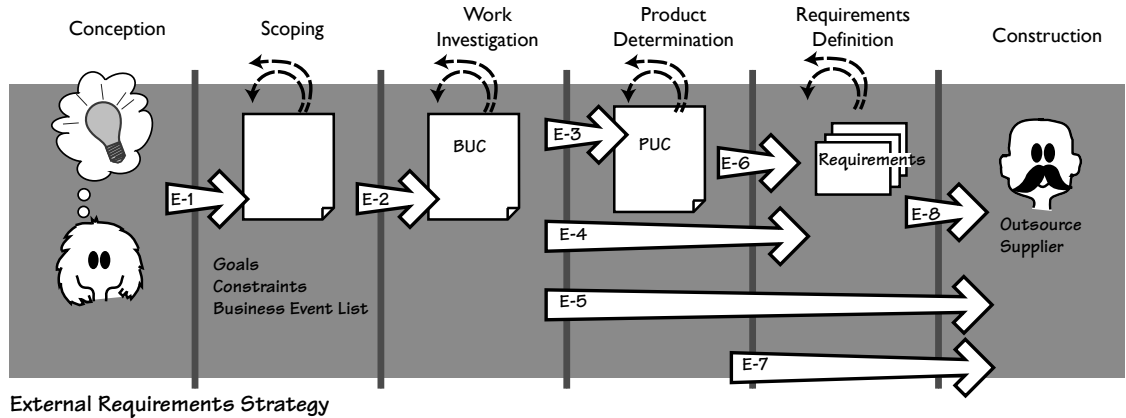

MASTERING THE REQUIREMENTS PROCESS

GETTING REQUIREMENTS RIGHT

SUZANNE ROBERTSON • JAMES ROBERTSON

Requirements Strategy Maps

Mastering the Requirements Process: Getting Requirements Right

Table of Contents

Contents

Preface to the Third Edition

Foreword to the First Edition

Acknowledgments

1 Some Fundamental Truths: in which we consider the essential
contribution of requirements

Truth 1

Truth 2

Truth 3

Truth 4

Truth 5

Truth 6

Truth 7

Truth 8

Truth 9

Truth 10

Truth 11

What Are These Requirements Anyway?

Functional Requirements

Non-functional Requirements

Constraints

The Volere Requirements Process

2 The Requirements Process: in which we present a process for

Table of Contents

discovering requirements and discuss how you might use it

The Requirements Process in Context

A Case Study

Project Blastoff

Trawling for Requirements

Quick and Dirty Modeling

Scenarios

Writing the Requirements

Quality Gateway

Reusing Requirements

Reviewing the Requirements

Iterative and Incremental Processes

Requirements Retrospective

Evolution of Requirements

The Template

The Snow Card

Your Own Requirements Process

Formality Guide

The Rest of This Book

3 Scoping the Business Problem: in which we establish a definition of the business area to be changed, thereby ensuring that the project team has a clear vision of what their project is meant to achieve

Project Blastoff

Formality Guide

Setting the Scope

Separate the Work from its Environment

IceBreaker

Table of Contents

First-Cut Work Context

Scope, Stakeholders, and Goals

Stakeholders

The Sponsor

The Customer

Users: Understand Them

Other Stakeholders

Consultants

Management

Subject-Matter Experts

Core Team

Inspectors

Market Forces

Legal Experts

Negative Stakeholders

Industry Standard Setters

Public Opinion

Government

Special-Interest Groups

Technical Experts

Cultural Interests

Adjacent Systems

Finding the Stakeholders

Goals: What Do You Want to Achieve?

Purpose

Advantage

Measurement

Constraints

Solution Constraints

Project Constraints

Table of Contents

Naming Conventions and Definitions

How Much Is This Going to Cost?

Risks

To Go or Not to Go

Blastoff Meetings

Summary

4 Business Use Cases: in which we discuss a fail-safe way of partitioning the work and so smooth the way for your requirements investigation

Understanding the Work

Formality Guide

Use Cases and Their Scope

The Scope of the Work

The Outside World

Business Events

Time-Triggered Business Events

Why Business Events and Business Use Cases Are a Good Idea

The System Cannot Be Assumed

Step Back

Finding the Business Events

Business Use Cases

Business Use Cases and Product Use Cases

Actors

Summary

5 Investigating the Work: in which we come to an understanding of what the business is doing, and start to think about what it might like to do

Trawling the Business

Table of Contents

Formality Guide

Trawl for Knowledge

The Business Analyst

Trawling and Business Use Cases

The Brown Cow Model

The Current Way of Doing Things (How-Now)

Apprenticing

Business Use Case Workshops

- Outcome

- Scenarios

- Business Rules

Interviewing the Stakeholders

- Asking the Right Questions

- Listening to the Answers

Looking for Reusable Requirements

Quick and Dirty Process Modeling

Prototypes and Sketches

- Low-Fidelity Prototypes

- High-Fidelity Prototypes

Mind Maps

The Murder Book

Video and Photographs

Wikis, Blogs, Discussion Forums

Document Archeology

Family Therapy

Choosing the Best Trawling Technique

Finally . . .

6 Scenarios: in which we look at scenarios, and how the business

Table of Contents

analyst uses them to communicate with the stakeholders

Formality Guide

Scenarios

The Essence of the Business

Diagramming the Scenario

Alternatives

Exceptions

What if? Scenarios

Misuse Cases and Negative Scenarios

Scenario Template

Summary

7 Understanding the Real Problem: in which we think above the line to find the true essence of the business, and so deliver the right productone that solves the right problem

Formality Guide

The Brown Cow Model: Thinking Above the Line

The Essence

Abstraction

Swim Lanes Begone

Solving the Right Problem

Moving into the Future

How to Be Innovative

Systemic Thinking

Value

Personas

Challenging Constraints

Innovation Workshops

Brainstorming

Table of Contents

Back to the Future

8 Starting the Solution: in which we bring the essence of the business into the technological world of the implementation

Iterative Development

Essential Business

Determine the Extent of the Product

Consider the Users

Designing the User Experience

Innovation

Convenience

Connections

Information

Feeling

Sketching the Interface

The Real Origin of the Business Event

Adjacent Systems and External Technology

Active Adjacent Systems

Autonomous Adjacent Systems

Cooperative Adjacent Systems

Cost, Benefit, and Risks

Document Your Design Decisions

Product Use Case Scenarios

Putting It All Together

9 Strategies for Today's Business Analyst: in which we consider strategies for the business analyst to guide requirements discovery in today's changing environments

Balancing Knowledge, Activities, and People

Common Project Requirements Profiles

Table of Contents

How Much Knowledge Is Needed Before Each Breakout?

External Strategy

- Conception to Scoping
- Scoping to Work Investigation
- Work Investigation to Product Determination
- Work Investigation to Atomic Requirements Definition
- Work Investigation to Building
- Product Determination to Atomic Requirements Definition
- Product Determination to Construction
- Atomic Requirements Definition to Building

Iterative Strategy

- Conception to Scoping
- Scoping to Work Investigation
- Work Investigation to Product Determination
- Work Investigation to Requirements Definition
- Product Determination to Requirements Definition
- Requirements Definition to Construction

Sequential Strategy

- Conception to Scoping
- Scoping to Work Investigation
- Work Investigation to Product Determination
- Product Determination to Requirements Definition
- Requirements Definition to Building

Your Own Strategy

Sharpening Your Requirements Skills

- No Longer a Stenographer
- Limiting the Number of Requirements That Are Written
- Reusing Requirements
- Innovation and the Business Analyst
- Looking for Business Rules

Table of Contents

The Business Analyst as Ideas Broker

Systemic Thinking and the Business Analyst

The Business Analyst as Visualizer

Summary

10 Functional Requirements: in which we look at those requirements that cause the product to do something

Formality Guide

Functional Requirements

Uncovering the Functional Requirements

Level of Detail or Granularity

Description and Rationale

Data, Your Secret Weapon

Data Models

Data Dictionary

Exceptions and Alternatives

Conditional Requirements

Avoiding Ambiguity

Technological Requirements

Grouping Requirements

Alternatives to Functional Requirements

Scenarios

User Stories

Business Process Models

Requirements for COTS

Summary

11 Non-functional Requirements: in which we look at the requirements that specify how well your product does what it does

An Introduction to Non-functional Requirements

Table of Contents

Formality Guide

Functional Versus Non-functional Requirements

Use Cases and Non-functional Requirements

The Non-functional Requirements Types

Look and Feel Requirements: Type 10

Usability and Humanity Requirements: Type 11

Performance Requirements: Type 12

Operational and Environmental Requirements: Type 13

Maintainability and Support Requirements: Type 14

Security Requirements: Type 15

- Access

- Privacy

- Integrity

- Auditing

- . . . And No More

Cultural Requirements: Type 16

Legal Requirements: Type 17

- Sarbanes-Oxley Act

- Other Legal Obligations

- Standards

Finding the Non-functional Requirements

- Blogging the Requirements

- Use Cases

- The Template

- Prototypes and Non-functional Requirements

- The Client

Dont Write a Solution

Summary

12 Fit Criteria and Rationale: in which we show how

Table of Contents

measuring requirements makes them unambiguous,
understandable, communicable, and testable

Formality Guide

Why Does Fit Need a Criterion?

The Rationale for the Rationale

Deriving Fit Criteria

Scale of Measurement

Fit Criteria for Non-functional Requirements

- Product Failure

- Subjective Tests

- Standards

- Look and Feel Requirements

- Usability and Humanity Requirements

- Performance Requirements

- Operational Requirements

- Maintainability Requirements

- Security Requirements

- Cultural Requirements

- Legal Requirements

Fit Criteria for Functional Requirements

- Test Cases

Forms of Fit Criteria

- Defining the Data

- Graphic Fit Criteria

- Decision Tables

- Graphs

Use Cases and Fit Criteria

Fit Criterion for Project Purpose

Fit Criteria for Solution Constraints

Table of Contents

Summary

13 The Quality Gateway: in which we prevent unsuitable requirements from becoming part of the specification

Formality Guide

Requirements Quality

Using the Quality Gateway

Within Scope?

Relevancy

Testing Completeness

Are There Any Missing Attributes?

Meaningful to Stakeholders?

Testing the Fit Criterion

Consistent Terminology

Viable within Constraints?

Requirement or Solution?

Requirement Value

Gold Plating

Requirements Creep

Implementing the Quality Gateway

Alternative Quality Gateways

Summary

14 Requirements and Iterative Development: in which we look at how to discover and implement requirements in an iterative development environment

The Need for Iterative Development

An Iterative Requirements Process

The Work

Analyze Business Needs

Table of Contents

Write User Stories

Develop Product

Business Value Analysis and Prioritization

How to Write a Good User Story

Questions to Ask

Formalizing Your User Stories

Fleshing out the Story

Iterative Requirements Roles

Business Knowledge

Analytical and Communication Knowledge

Technical Knowledge

Summary

15 Reusing Requirements: in which we look for requirements that have already been written and explore ways to make use of them

What Is Reusing Requirements?

Sources of Reusable Requirements

Requirements Patterns

Christopher Alexanders Patterns

A Business Event Pattern

Context of Event Response

Processing for Event Response

Data for Event Response

Forming Patterns by Abstracting

Patterns for Specific Domains

Patterns Across Domains

Domain Analysis

Summary

16 Communicating the Requirements: in which we turn the requirements into communicable form

Table of Contents

Formality Guide

Turning Potential Requirements into Written Requirements

Knowledge Versus Specification

The Volere Requirements Specification Template

- Template Table of Contents

- Template Divisions

Discovering Atomic Requirements

- Snow Cards

Attributes of Atomic Requirements

- Requirement Number

- Requirement Type

- Event/BUC/PUC #

- Description

- Rationale

- Originator

- Fit Criterion

- Customer Satisfaction and Customer Dissatisfaction

- Priority

- Conflicts

- Supporting Materials

- History

Assembling the Specification

Automated Requirements Tools

Functional Requirements

Non-functional Requirements

Project Issues

Summary

17 Requirements Completeness: in which we decide whether our specification is complete, and set the priorities of the

Table of Contents

requirements

Formality Guide

Reviewing the Specification

Inspections

Find Missing Requirements

Have All Business Use Cases Been Discovered?

1. Define the Scope
2. Identify Business Events and Non-events

Non-events

3. Model the Business Use Case
4. Define the Business Data
5. CRUD Check
6. Check for Custodial Processes

Repeat Until Done

Prioritizing the Requirements

Prioritization Factors

When to Prioritize

Requirement Priority Grading

Prioritization Spreadsheet

Conflicting Requirements

Ambiguous Specifications

Risk Assessment

Project Drivers

Project Constraints

Functional Requirements

Measure the Required Cost

Summary

Appendix A: Volere Requirements Specification Template: a guide
for writing a rigorous and complete requirements specification

Table of Contents

Contents

Project Drivers

Project Constraints

Functional Requirements

Non-functional Requirements

Project Issues

Use of This Template

Volere

Requirements Types

Testing Requirements

Atomic Requirements Shell

1. The Purpose of the Project

1a. The User Business or Background of the Project Effort

1b. Goals of the Project

2. The Stakeholders

2a. The Client

2b. The Customer

2c. Other Stakeholders

2d. The Hands-on Users of the Product

2e. Personas

2f. Priorities Assigned to Users

2g. User Participation

2h. Maintenance Users and Service Technicians

3. Mandated Constraints

3a. Solution Constraints

3b. Implementation Environment of the Current System

3c. Partner or Collaborative Applications

3d. Off-the-Shelf Software

3e. Anticipated Workplace Environment

3f. Schedule Constraints

Table of Contents

- 3g. Budget Constraints
- 3h. Enterprise Constraints
- 4. Naming Conventions and Terminology
 - 4a. Definitions of All Terms, Including Acronyms, Used by Stakeholders Involved in the Project
- 5. Relevant Facts and Assumptions
 - 5a. Relevant Facts
 - 5b. Business Rules
 - 5c. Assumptions
- 6. The Scope of the Work
 - 6a. The Current Situation
 - 6b. The Context of the Work
 - 6c. Work Partitioning
 - 6d. Specifying a Business Use Case
- 7. Business Data Model and Data Dictionary
 - 7a. Data Model
 - 7b. Data Dictionary
- 8. The Scope of the Product
 - 8a. Product Boundary
 - 8b. Product Use Case Table
 - 8c. Individual Product Use Cases
- 9. Functional and Data Requirements
 - 9a. Functional Requirements
- Non-functional Requirements
- 10. Look and Feel Requirements
 - 10a. Appearance Requirements
 - 10b. Style Requirements
- 11. Usability and Humanity Requirements
 - 11a. Ease of Use Requirements
 - 11b. Personalization and Internationalization Requirements

Table of Contents

- 11c. Learning Requirements
- 11d. Understandability and Politeness Requirements
- 11e. Accessibility Requirements
- 12. Performance Requirements
 - 12a. Speed and Latency Requirements
 - 12b. Safety-Critical Requirements
 - 12c. Precision or Accuracy Requirements
 - 12d. Reliability and Availability Requirements
 - 12e. Robustness or Fault-Tolerance Requirements
 - 12f. Capacity Requirements
 - 12g. Scalability or Extensibility Requirements
 - 12h. Longevity Requirements
- 13. Operational and Environmental Requirements
 - 13a. Expected Physical Environment
 - 13b. Requirements for Interfacing with Adjacent Systems
 - 13c. Productization Requirements
 - 13d. Release Requirements
- 14. Maintainability and Support Requirements
 - 14a. Maintenance Requirements
 - 14b. Supportability Requirements
 - 14c. Adaptability Requirements
- 15. Security Requirements
 - 15a. Access Requirements
 - 15b. Integrity Requirements
 - 15c. Privacy Requirements
 - 15d. Audit Requirements
 - 15e. Immunity Requirements
- 16. Cultural Requirements
 - 16a. Cultural Requirements
- 17. Legal Requirements

Table of Contents

17a. Compliance Requirements

17b. Standards Requirements

Project Issues

18. Open Issues

19. Off-the-Shelf Solutions

19a. Ready-Made Products

19b. Reusable Components

19c. Products That Can Be Copied

20. New Problems

20a. Effects on the Current Environment

20b. Effects on the Installed Systems

20c. Potential User Problems

20d. Limitations in the Anticipated Implementation Environment That May
Inhibit the New Product

20e. Follow-Up Problems

21. Tasks

21a. Project Planning

21b. Planning of the Development Phases

22. Migration to the New Product

22a. Requirements for Migration to the New Product

22b. Data That Must Be Modified or Translated for the New System

23. Risks

24. Costs

25. User Documentation and Training

25a. User Documentation Requirements

25b. Training Requirements

26. Waiting Room

27. Ideas for Solutions

Appendix B: Stakeholder Management Templates

Table of Contents

Stakeholder Map

Stakeholder Template

Appendix C: Function Point Counting: A Simplified Introduction:

in which we look at a way to accurately measure the size or functionality of the work area, with a view toward using the measurement to estimate the requirements effort

Measuring the Work

A Quick Primer on Counting Function Points

Scope of the Work

Data Stored by the Work

Business Use Cases

Counting Function Points for Business Use Cases

Counting Input Business Use Cases

Counting Output Business Use Cases

Counting Time-Triggered Business Use Cases

Counting the Stored Data

Internal Stored Data

Externally Stored Data

Adjust for What You Dont Know

Now That I Have Counted Function Points, Whats Next?

Appendix D: Volere Requirements Knowledge Model

Definitions of Requirements Knowledge Classes and Associations

Knowledge Classes

Associations

Knowledge Model Annotated with Template Section Numbers
