Indianapolis, Indiana 46240

## Contents at a Glance

Introduction	1
1 Development of the PC	5
2 PC Components, Features, and System Design	19
3 Processor Types and Specifications	29
4 Motherboards and Buses	155
5 BIOS	263
6 Memory	325
7 The ATA/IDE Interface	377
8 Magnetic Storage Principles	439
9 Hard Disk Storage	461
10 Flash and Removable Storage	507
11 Optical Storage	525
12 Video Hardware	609
13 Audio Hardware	679
14 External I/O Interfaces	703
15 Input Devices	739
16 Internet Connectivity	775
17 Local Area Networking	799
18 Power Supplies	845
19 Building or Upgrading Systems	929
20 PC Diagnostics, Testing, and Maintenance	975
Index	1035

# Upgrading and Repairing PCs

## Table of Contents

Contents

About the Author

Acknowledgments

Introduction

### 1 Development of the PC

Computer History: Before Personal Computers

Timeline

Electronic Computers

Modern Computers

From Tubes to Transistors

Integrated Circuits

History of the PC

Birth of the Personal Computer

The IBM Personal Computer

The PC Industry 30 Years Later

### 2 PC Components, Features, and System Design

What Is a PC?

Who Controls PC Software?

Who Controls PC Hardware?

White-Box Systems

System Types

System Components

### 3 Processor Types and Specifications

# Table of Contents

## Microprocessor History

- The First Microprocessor
- PC Processor Evolution
- 16-Bit to 64-Bit Architecture Evolution

## Processor Specifications

- Data I/O Bus
- Address Bus
- Internal Registers (Internal Data Bus)
- Processor Modes
- Processor Benchmarks
- Comparing Processor Performance
- Cache Memory

## Processor Features

- System Management Mode (SMM)
- Superscalar Execution
- MMX Technology
- Dynamic Execution
- Dual Independent Bus Architecture
- HT Technology
- Multicore Technology
- Hardware-Assisted Virtualization Support

## Processor Manufacturing

- Processor Re-Marking
- PGA Chip Packaging
- Single Edge Contact and Single Edge Processor Packaging

## Processor Socket and Slot Types

- Socket 478
- Socket LGA775
- Socket LGA1156
- Socket LGA1366

# Table of Contents

Socket LGA1155

Socket LGA2011

Socket 939 and 940

Socket AM2/AM2+/AM3/AM3+

Socket F (1207FX)

Socket FM1

Socket FM2

CPU Operating Voltages

Math Coprocessors (Floating-Point Units)

Processor Bugs and Steppings

Processor Code Names

P1 (086) Processors

P2 (286) Processors

P3 (386) Processors

P4 (486) Processors

P5 (586) Processors

AMD-K5

Intel P6 (686) Processors

Pentium Pro Processors

Pentium II Processors

Pentium III

Celeron

Intel Pentium 4 Processors

Pentium 4 Extreme Edition

Intel Pentium D and Pentium Extreme Edition

Intel Core Processors

Intel Core 2 Family

Intel (Nehalem) Core i Processors

AMD K6 Processors

# Table of Contents

NexGen Nx586

AMD-K6 Series

## AMD K7 Processors

AMD Athlon

AMD Duron

AMD Athlon XP

Athlon MP

## AMD K8 Processors

AMD Athlon 64 and 64 FX

AMD Sempron

AMD Athlon X2, 64 X2, and 64 FX

## AMD K10 Processors (Phenom, Phenom II, Athlon II, Athlon X2, Sempron)

## AMD Bulldozer and Piledriver FX Processors

## AMD Fusion/HSA (Heterogeneous Systems Architecture) APUs

## Processor Upgrades

### Overclocking

Quartz Crystals

Modern PC Clocks

Overclocking Tips

Unlocking Cores

Bus Speeds and Multipliers

### Processor Cooling

Heatsinks

Liquid Cooling

Thermally Advantaged Chassis

### Processor Troubleshooting Techniques

## 4 Motherboards and Buses

### Motherboard Form Factors

# Table of Contents

Obsolete Form Factors

ATX and Other Modern Form Factors

Processor Sockets/Slots

Chipsets

Chipset Evolution

Intel Chipsets

Intel Chipset Model Numbers

Intel Integrated Graphics Architecture

AMD Integrated Graphics Architecture

Traditional North/South Bridge Architecture

Hub Architecture

HyperTransport and Other Processor/Chipset Interconnects

Intels Early 386/486 Chipsets

Fifth-Generation (P5 Pentium Class) Chipsets

Sixth-Generation (P6 Pentium Pro/II/III Class) Chipsets

Seventh/Eighth-Generation (Pentium 4/D, Core 2, and Core i)  
Chipsets

Intel 915 Family

Intel 925X Family

Intel 945 Express Family

Intel 955X and 975X Family

Intel 96x Series

Intel 3x and 4x Series Chipsets

Intel 5x Series Chipsets

Intel 6x Series Chipsets

Intel 7x Series Chipsets

Third-Party Chipsets for Intel Processors

SiS Chipsets

ULi Electronics Chipsets

ATI Chipsets

# Table of Contents

VIA Chipsets

NVIDIA Chipsets for Intel Processors

## Chipsets for AMD Processors

### AMD Athlon Chipsets

### AMD Athlon 64 Chipsets

AMD 8000 (8151) Chipset

AMD (Formerly ATI) Chipsets for Athlon 64, Sempron, Phenom

Third-Party Chipsets for AMD Processors

VIA Chipsets

SiS Chipsets

NVIDIA Chipsets

## Super I/O Chips

## Motherboard Connectors

## System Bus Types, Functions, and Features

The Processor Bus (FSB)

## Types of I/O Buses

The ISA Bus

The Micro Channel Bus

The EISA Bus

Local Buses (VESA, PCI, PCI Express, AGP)

## System Resources

Interrupts

DMA Channels

I/O Port Addresses

## Motherboard Selection Criteria (Knowing What to Look For)

Chipset Documentation

## 5 BIOS

BIOS Basics

Motherboard ROM BIOS

# Table of Contents

- ROM Hardware
- ROM Shadowing
- ROM Chip Types
- ROM BIOS Manufacturers
- BIOS Hardware/Software

## Upgrading the BIOS

- Where to Get Your BIOS Update
- Determining Your BIOS Version
- Checking the BIOS Date
- Backing Up Your BIOS
- Backing Up Your BIOS Setup (CMOS RAM) Settings
- Upgrading a Flash BIOS
- Motherboard CMOS RAM Addresses

## Preboot Environment

### Unified Extensible Firmware Interface (UEFI)

- UEFI and BIOS Limitations
- UEFI Support

### BIOS Setup

- Running or Accessing the BIOS Setup Program
- BIOS Setup Menus
- Maintenance Menu
- Main Menu
- Advanced Menus
- Security Menu
- Power Menu
- Boot Menu (Boot Sequence, Order)
- Exit Menu
- Additional BIOS Setup Features

### PnP BIOS

- PnP Device IDs

# Table of Contents

ACPI

BIOS/MBR Error Messages

BIOS Boot Error Messages

MBR Boot Error Messages

## 6 Memory

Memory Basics

ROM

DRAM

Cache Memory: SRAM

Memory Standards

Speed and Performance

Fast Page Mode DRAM

Extended Data Out RAM

SDRAM

DDR SDRAM

DDR2 SDRAM

DDR3 SDRAM

DDR4 SDRAM

RDRAM

Memory Modules

Registered Modules

SDR DIMM Details

DDR DIMM Details

DDR2 DIMM Details

DDR3 DIMM Details

Determining a Memory Modules Size and Features

Memory Banks

Memory Module Speed

Parity and ECC

# Table of Contents

Parity Checking

How Parity Checking Works

ECC

## RAM Upgrades

Upgrade Options and Strategies

Purchasing Memory

Replacing Modules with Higher-Capacity Versions

Installing Memory Modules

## Troubleshooting Memory

Memory Defect Isolation Procedures

The System Logical Memory Layout

## 7 The ATA/IDE Interface

### An Overview of the IDE Interface

Precursors to IDE

IDE Origins

Origins of ATA

### ATA Standards

ATA-1 (ATA Interface for Disk Drives)

ATA-2 (ATA Interface with Extensions-2)

ATA-3 (ATA Interface-3)

ATA/ATAPI-4 (ATA with Packet Interface Extension-4)

ATA/ATAPI-5 (ATA with Packet Interface-5)

ATA/ATAPI-6 (ATA with Packet Interface-6)

ATA/ATAPI-7 (ATA with Packet Interface-7)

ATA/ATAPI-8

### PATA

PATA I/O Connector

PATA I/O Cable

Longer or Rounded Cables

# Table of Contents

PATA Signals

PATA Dual-Drive Configurations

PATA PIO Transfer Modes

PATA DMA Transfer Modes

## SATA

SATA Standards and Performance

SATA Express

SATA Cables and Connectors

eSATA

SATA Configuration

Advanced Host Controller Interface (AHCI)

Non-Volatile Memory Express (NVMe)

SATA Transfer Modes

## ATA Features

ATA Commands

ATA Security Mode

Host Protected Area

ATAPI

## ATA Drive Capacity Limitations

Prefixes for Decimal and Binary Multiples

BIOS Limitations

CHS Versus LBA

CHS/LBA and LBA/CHS Conversions

BIOS Commands Versus ATA Commands

CHS Limitations (the 528MB Barrier)

CHS Translation (Breaking the 528MB Barrier)

The 2.1GB and 4.2GB Barriers

LBA-Assist Translation

The 8.4GB Barrier

The 137GB Barrier and Beyond

# Table of Contents

Operating System and Other Software Limitations

GPT and the 2.2TB Barrier

PATA/SATA RAID

Software RAID

## 8 Magnetic Storage Principles

Magnetic Storage

History of Magnetic Storage

How Magnetic Fields Are Used to Store Data

Read/Write Head Designs

Ferrite

Metal-In-Gap

Thin-Film

Magneto-Resistive Heads

Giant Magneto-Resistive Heads

Head Sliders

Data-Encoding Schemes

Frequency Modulation Encoding

Modified FM Encoding

Run Length Limited Encoding

Encoding Scheme Comparisons

Partial-Response, Maximum-Likelihood Decoders

Capacity Measurements

Areal Density

Perpendicular Magnetic Recording

## 9 Hard Disk Storage

Definition of a Hard Disk

Hard Drive Advancements

Form Factors

# Table of Contents

5 1/4-Inch Drive

3 1/2-Inch Drive

2 1/2-Inch Drive

1.8-Inch Drive

1-Inch Drives

## HDD Operation

The Ultimate HDD Analogy

Tracks and Sectors

ECC

Disk Formatting

## Basic HDD Components

Hard Disk Platters (Disks)

Recording Media

Read/Write Heads

Head Actuator Mechanisms

Air Filters

Hard Disk Temperature Acclimation

Spindle Motors

Logic Boards

Cables and Connectors

Configuration Items

## Hard Disk Features

Capacity

Performance

Reliability

## 10 Flash and Removable Storage

### Alternative Storage Devices

### Flash Memory Devices

CompactFlash

SmartMedia

# Table of Contents

MultiMediaCard

SecureDigital

Sony Memory Stick

ATA Flash PC Card

xD-Picture Card

SSD (Solid-State Drive)

USB Flash Drives

Comparing Flash Memory Devices

SD Cards Speed Class and UHS Speed Class Markings

File Systems Used by Flash Memory

Flash Card Readers

Card Readers

ReadyBoost Support

Cloud-Based Storage

Floppy Disk Drives

Tape Drives

## 11 Optical Storage

Optical Technology

CD-Based Optical Technology

CDs: A Brief History

CD Construction and Technology

Mass-Producing CDs

Writable CDs

MultiRead Specifications

MultiPlay and MultiAudio

DVD

DVD History

DVD Construction and Technology

DVD Tracks and Sectors

# Table of Contents

- Handling DVD Errors
- DVD Capacity (Sides and Layers)
- Data Encoding on the DVD Disc
- Recordable DVD Standards
- Multiformat Rewritable DVD Drives

BD

HD-DVD

Optical Disc Formats

- CD Formats
- DVD Formats and Standards
- Optical Disc File Systems

Ripping/Copying Discs

- For Music Use Only CD-R/RW Discs
- CD Copy Protection
- CD Digital Rights Management
- DVD and Blu-ray Copy Protection

Optical Drive Performance Specifications

- CD Data Transfer Rate
- CD Drive Speed
- DVD Drive Speed
- Access Time
- Buffer/Cache
- Direct Memory Access and Ultra-DMA
- Interface
- Loading Mechanism
- Other Drive Features

How to Reliably Record Optical Discs

- Bootling from a Floppy Disk with Optical Drive Support
- Bootable Optical DiscsEl Torito
- LightScribe and LabelFlash

# Table of Contents

## Troubleshooting Optical Drives

Caring for Optical Media

Updating the Firmware in an Optical Drive

## 12 Video Hardware

### Display Adapters and Monitors

#### Video Display Adapters

Video Adapter Types

Integrated Video/Motherboard Chipsets

CPUs with Integrated Video

Video Adapter Components

Identifying the Video and System Chipsets

Video RAM

The DAC

#### Video Display Interfaces

The System Interface

The Display Interface

TV Display Interfaces

#### 3D Graphics Accelerators

How 3D Accelerators Work

APIs

Dual-GPU Scene Rendering

#### Monitors

Display Specifications

LCD Technology

LED Backlit Technology

CRT Display Technology

Plasma Display Technology

LCD and DLP Projectors

#### Using Multiple Monitors

# Table of Contents

Dualview

Homogeneous Adapters

Heterogeneous Adapters

Choosing the Best Display Hardware for a Particular Task

Video Troubleshooting and Maintenance

Troubleshooting Video Cards and Drivers

Video Drivers

Maintaining Monitors

Testing Monitors

Adjusting Monitors

Bad Pixels

Troubleshooting Monitors

Repairing Monitors

## 13 Audio Hardware

Audio Hardware Concepts and Terms

The Nature of Sound

Evaluating the Quality of Your Audio Hardware

Sampling

Early PC Sound Cards

Limitations of Sound Blaster Pro Compatibility

Microsoft Windows and Audio Support

DirectX and Audio Support Hardware

Core Audio APIs for Windows

3D Gaming Audio Standards

Legacy Audio Support Through Virtualization

Audio Hardware Features

Basic Connectors

Audio Signal Processing Methods

Advanced Audio Features

Volume Control

# Table of Contents

MIDI Support Features

Data Compression

Sound Drivers

Sound Cards for Sound Producers

## Motherboard Chipsets with Integrated Audio

Intel Azalia HD Audio

## Troubleshooting PC Audio Problems

Sound Card and Onboard Audio Problems

## Speakers

Speaker Selection Criteria

Theater and Surround Sound Considerations

## Microphones

## 14 External I/O Interfaces

### Introduction to Input/Output Ports

Serial Versus Parallel

Universal Serial Bus (USB)

IEEE 1394 (FireWire or i.LINK)

Comparing USB and IEEE 1394 (FireWire)

### Thunderbolt Technology

### Low-Speed External Connections

Serial Ports

Parallel Ports

## 15 Input Devices

### Keyboards

Enhanced 101-Key Keyboard

103/104-Key Windows Keyboard

### Keyboard Technology

Keyswitch Design

The Keyboard Interface

# Table of Contents

Typematic Functions

Keyboard Scan Codes

International Keyboard Layouts

Keyboard/Mouse Interface Connectors

USB Keyboards

Keyboards with Special Features

## Keyboard Troubleshooting and Repair

Cleaning a Keyboard

## Keyboard Recommendations

## Pointing Devices

Mouse Sensitivity

Ball-Type Mice

Optical Mice

Pointing Device Interface Types

Scroll Wheels

Mouse Troubleshooting

Cleaning Your Mouse

Alternative Pointing Devices

## Touchscreen Technology

## Wireless Input Devices

Power Management Features of Wireless Input Devices

Troubleshooting Wireless Input Devices

## 16 Internet Connectivity

### Internet Connectivity Trends

### Broadband Internet Access Types

Cable TV

Digital Subscriber Line

Wireless Broadband

Cellular Broadband 3G and 4G Services

# Table of Contents

Satellite Broadband

ISDN

Leased Lines

Comparing High-Speed Internet Access

## Dial-Up Modems

56Kbps Modems

## Internet Connection Security

Having a Backup Plan in Case of Service Interruptions

Sharing Your Internet Connection

Routers for Internet Sharing

Modem/Router Status LEDs

## 17 Local Area Networking

### Defining a Network

Types of Networks

Requirements for a Network

### Client/Server Versus Peer Networks

Client/Server Networks

Peer-to-Peer Networks

Comparing Client/Server and Peer-to-Peer Networks

### Network Architecture Overview

Wired Ethernet

Wireless Ethernet

Bluetooth

### Hardware Elements of Your Network

NICs for Wired Ethernet Networks

Network Cables for Wired Ethernet

Wired Network Topologies

Switches for Ethernet Networks

Wireless Ethernet Hardware

# Table of Contents

## Network Protocols

- IP and TCP/IP

- IPX and NetBEUI

## Other Home Networking Solutions

- HomePNA

- Power Line Networking

## Putting Your Network Together

- Network Adapters

- Cables and Connections Between Computers

- Switch/Access Point

## 18 Power Supplies

### The Power Supply

#### Primary Function and Operation

- Voltage Rails

- The Power Good Signal

#### Power Supply Form Factors

- Modern Form Factors

#### Power Switches

- ATX and Newer

- PC/XT/AT and LPX Power Switches

#### Motherboard Power Connectors

- AT/LPX Power Supply Connectors

- ATX and ATX12V Motherboard Power Connectors

- Backward and Forward Compatibility

- Dell Proprietary (Nonstandard) ATX Design

#### Additional Power Connectors

- Peripheral Power Connectors

- Floppy Power Connectors

- Serial ATA Power Connectors

# Table of Contents

PCI Express Auxiliary Graphics Power Connectors

## Power Supply Specifications

Power Supply Loading

Power Supply Ratings

Other Power Supply Specifications

Power Factor Correction

SLI-Ready and CrossFireX Certifications

Safety Certifications

## Power-Use Calculations

## Power Savings

80 Plus

ENERGY STAR

Advanced Power Management

Advanced Configuration and Power Interface

## Power Cycling

## Power Supply Troubleshooting

Overloaded Power Supplies

Inadequate Cooling

Using Digital Multimeters

Specialized Test Equipment

## Power Supply Recommendations

Modular Cables

Sources for Replacement Power Supplies

## Power-Protection Systems

Surge Suppressors (Protectors)

Network and Phone Line Surge Protectors

Line Conditioners

Backup Power

## Real-Time Clock/Nonvolatile RAM (CMOS RAM) Batteries

# Table of Contents

Modern CMOS Batteries

Obsolete or Unique CMOS Batteries

CMOS Battery Troubleshooting

## 19 Building or Upgrading Systems

### System Components

Before You Start: How to Decide What to Build

Case and Power Supply

Processor

Motherboard

Memory

I/O Ports

Hard Disk/Solid-State Drives
