

ZED SHAW'S HARD WAY SERIES

Learn the **RUBY** **HARD WAY**

THIRD EDITION

A Simple and Idiomatic Introduction
to the Imaginative World of
Computational Thinking with Code

ZED A. SHAW

LEARN RUBY THE HARD WAY

Third Edition

Learn Ruby the Hard Way: A Simple and Idiomatic Introduction to the Imaginative World Of Computational Thinking with Code

Table of Contents

Contents

Preface

Acknowledgments

The Hard Way Is Easier

Reading and Writing

Attention to Detail

Spotting Differences

Do Not Copy-Paste

Using the Included Videos

A Note on Practice and Persistence

A Warning for the Smarties

Exercise 0 The Setup

Mac OS X

OS X: What You Should See

Windows

Windows: What You Should See

Linux

Linux: What You Should See

Finding Things on the Internet

Table of Contents

Warnings for Beginners

Exercise 1 A Good First Program

What You Should See

Study Drills

Common Student Questions

Exercise 2 Comments and Pound Characters

What You Should See

Study Drills

Common Student Questions

Exercise 3 Numbers and Math

What You Should See

Study Drills

Common Student Questions

Exercise 4 Variables and Names

What You Should See

Study Drills

Common Student Questions

Exercise 5 More Variables and Printing

What You Should See

Study Drills

Common Student Questions

Exercise 6 Strings and Text

What You Should See

Study Drills

Common Student Question

Table of Contents

Exercise 7 More Printing

What You Should See

Study Drills

Common Student Questions

Exercise 8 Printing, Printing

What You Should See

Study Drills

Common Student Questions

Exercise 9 Printing, Printing, Printing

What You Should See

Study Drills

Common Student Questions

Exercise 10 What Was That?

What You Should See

Escape Sequences

Study Drills

Common Student Questions

Exercise 11 Asking Questions

What You Should See

Study Drills

Common Student Question

Exercise 12 Prompting People for Numbers

What You Should See

Study Drills

Exercise 13 Parameters, Unpacking, Variables

Table of Contents

What You Should See

Study Drills

Common Student Questions

Exercise 14 Prompting and Passing

What You Should See

Study Drills

Common Student Questions

Exercise 15 Reading Files

What You Should See

Study Drills

Common Student Questions

Exercise 16 Reading and Writing Files

What You Should See

Study Drills

Common Student Questions

Exercise 17 More Files

What You Should See

Study Drills

Common Student Questions

Exercise 18 Names, Variables, Code, Functions

What You Should See

Study Drills

Common Student Questions

Exercise 19 Functions and Variables

What You Should See

Study Drills

Table of Contents

Common Student Questions

Exercise 20 Functions and Files

What You Should See

Study Drills

Common Student Questions

Exercise 21 Functions Can Return Something

What You Should See

Study Drills

Common Student Questions

Exercise 22 What Do You Know So Far?

What You Are Learning

Exercise 23 Read Some Code

Exercise 24 More Practice

What You Should See

Study Drills

Common Student Questions

Exercise 25 Even More Practice

What You Should See

Study Drills

Common Student Questions

Exercise 26 Congratulations, Take a Test!

Common Student Questions

Exercise 27 Memorizing Logic

The Truth Terms

The Truth Tables

Table of Contents

Common Student Question

Exercise 28 Boolean Practice

What You Should See

Study Drills

Common Student Questions

Exercise 29 What If

What You Should See

Study Drills

Common Student Question

Exercise 30 Else and If

What You Should See

Study Drills

Common Student Question

Exercise 31 Making Decisions

What You Should See

Study Drills

Common Student Questions

Exercise 32 Loops and Arrays

What You Should See

Study Drills

Common Student Questions

Exercise 33 While Loops

What You Should See

Study Drills

Common Student Questions

Table of Contents

Exercise 34 Accessing Elements of Arrays

Study Drills

Exercise 35 Branches and Functions

What You Should See

Study Drills

Common Student Questions

Exercise 36 Designing and Debugging

Rules for If-Statements

Rules for Loops

Tips for Debugging

Homework

Exercise 37 Symbol Review

Keywords

Data Types

String Escape Sequences

Operators

Reading Code

Study Drills

Common Student Question

Exercise 38 Doing Things to Arrays

What You Should See

What Arrays Can Do

When to Use Arrays

Study Drills

Common Student Questions

Exercise 39 Hashes, Oh Lovely Hashes

Table of Contents

A Hash Example

What You Should See

What Hashes Can Do

Making Your Own Hash Module

The Code Description

Three Levels of Arrays

What You Should See (Again)

When to Use Hashes or Arrays

Study Drills

Common Student Questions

Exercise 40 Modules, Classes, and Objects

Modules Are Like Hashes

Classes Are Like Modules

Objects Are Like Require

Getting Things from Things

A First Class Example

What You Should See

Study Drills

Common Student Question

Exercise 41 Learning to Speak Object Oriented

Word Drills

Phrase Drills

Combined Drills

A Reading Test

Practice English to Code

Reading More Code

Table of Contents

Common Student Questions

Exercise 42 Is-A, Has-A, Objects, and Classes

How This Looks in Code

Study Drills

Common Student Questions

Exercise 43 Basic Object-Oriented Analysis and Design

The Analysis of a Simple Game Engine

Write or Draw about the Problem

Extract Key Concepts and Research Them

Create a Class Hierarchy and Object Map for the Concepts

Code the Classes and a Test to Run Them

Repeat and Refine

Top Down Versus Bottom Up

The Code for "Gothons from Planet Percal #25"

What You Should See

Study Drills

Common Student Question

Exercise 44 Inheritance Versus Composition

What Is Inheritance?

Implicit Inheritance

Override Explicitly

Alter Before or After

All Three Combined

Using super() with initialize

Composition

When to Use Inheritance or Composition

Study Drills

Table of Contents

Common Student Questions

Exercise 45 You Make a Game

Evaluating Your Game

Function Style

Class Style

Code Style

Good Comments

Evaluate Your Game

Exercise 46 A Project Skeleton

Creating the Skeleton Project Directory

Final Directory Structure

Testing Your Setup

Using the Skeleton

Required Quiz

Common Student Questions

Exercise 47 Automated Testing

Writing a Test Case

Testing Guidelines

What You Should See

Study Drills

Common Student Questions

Exercise 48 Advanced User Input

Our Game Lexicon

Breaking Up a Sentence

Lexicon Tuples

Scanning Input

Table of Contents

Exceptions and Numbers

A Test First Challenge

What You Should Test

Study Drills

Common Student Questions

Exercise 49 Making Sentences

Match and Peek

The Sentence Grammar

A Word on Exceptions

The Parser Code

Playing with the Parser

What You Should Test

Study Drills

Common Student Question

Exercise 50 Your First Website

Installing Sinatra

Make a Simple "Hello World" Project

What's Happening Here?

Stopping and Reloading Sinatra

Fixing Errors

Create Basic Templates

Study Drills

Common Student Questions

Exercise 51 Getting Input from a Browser

How the Web Works

How Forms Work

Table of Contents

Creating HTML Forms

Creating a Layout Template

Writing Automated Tests for Forms

Study Drills

Common Student Question

Exercise 52 The Start of Your Web Game

Refactoring the Exercise 43 Game

Sessions and Tracking Users

Creating an Engine

Your Final Exam
