Art of Network Architecture, The: Business-Driven Design

Table of Contents

Contents

Introduction

Part I: Framing the Problem

- Chapter 1 Business and Technology
  - Business Drives Technology
  - Technology Drives Business

Part II: Business-Driven Design

- Chapter 2 Designing for Change
  - Organic Growth and Decline
  - Mergers, Acquisitions, and Divestments
  - Centralizing Versus Decentralizing
- Chapter 3 Improving Business Operations
  - Workflow
  - BYOD
  - Business Continuity
  - Summary

Part III: Tools of the Trade

- Chapter 4 Models
  - The Seven-Layer Model
  - The Four-Layer Model
  - Iterative Layering Model
  - A Hybrid Model
  - Reactive and Proactive

Table of Contents

The Waterfall Model

Places in the Network

Summary

Chapter 5 Underlying Support

Questions You Should Ask

Spanning Tree

TRILL

Final Thoughts on the Physical Layer

Chapter 6 Principles of Modularity

Why Modularize?

How Do You Modularize?

Modularization and Optimization

Summary

Chapter 7 Applying Modularity

What Is Hierarchical Design?

Typical Hierarchical Design Patterns

Virtualization

Final Thoughts on Applying Modularity

Chapter 8 Weathering Storms

Redundancy as Resilience

MTTR, Resilience, and Redundancy

Fast Convergence Techniques

Fast Reroute

The Human Side of Resilience

Chapter 9 Securing the Premises

The OODA Loop

Brittleness

Building Defense In

Some Practical Considerations

Table of Contents

Summary

Chapter 10 Measure Twice

Why Manage?

Management Models

Deploying Management

Bare Necessities

Summary

Part IV: Choosing Materials

Chapter 11 The Floor Plan

Rings

Full Mesh

Clos Networks

Partial Mesh

Disjoint Parallel Planes

Divergent Data Planes

Cubes

Toroid Topologies

Summary

Chapter 12 Building the Second Floor

What Is a Tunnel?

Fundamental Virtualization Questions

MPLS-Based L3VPNs

VXLAN

Summary

Chapter 13 Routing Choices

Which Routing Protocol?

IPv6 Considerations

Deploying BGP

Summary

Table of Contents

Chapter 14 Considering Complexity

Control Plane State

Control Plane Policy Dispersion

Data Plane State

Reaction Time

Managing Complexity Trade-offs

Part V: Current and Future Trends

Chapter 15 Network in Motion

The Business Case for Mobility

Pinning the Hard Problems into Place

IP-Centric Mobility Solutions

Remote Access Solutions

What Solution Should You Deliver?

Chapter 16 On Psychologists, Unicorns, and Clouds

A Cloudy History

This Time Its Different

What Does It Cost?

What Are the Risks?

What Problems Can Cloud Solve Well?

What Services Is Cloud Good at Providing?

Deploying Cloud

Flying Through the Cloud

Looking Back Over the Clouds

Chapter 17 Software-Defined Networks

Understanding SDNs

Software-Defined Network Use Cases

Final Thoughts on SDNs

Chapter 18 Data Center Design

Data Center Spine and Leaf Fabrics

Table of Contents

The Control Plane Conundrum
Network Virtualization in the Data Center
Thoughts on Storage
Modularity and the Data Center
Summary

Index
