Patterns of Information Management

By Mandy Chessell and Harald Smith

ISBN-13: 978-0-13-315550-1

Use Best Practice Patterns to Understand and Architect Manageable, Efficient Information Supply Chains That Help You Leverage All Your Data and Knowledge

In the era of “Big Data,” information pervades every aspect of the organization. Therefore, architecting and managing it is a multi-disciplinary task. Now, two pioneering IBM architects present proven architecture patterns that fully reflect this reality. Using their pattern language, you can accurately characterize the information issues associated with your own systems, and design solutions that succeed over both the short- and long-term.

Beyond Big Data Using Social MDM to Drive Deep Customer Insight

By Martin Oberhofer, Eberhard Hechler,
Ivan Milman, Scott Schumacher, Dan Wolfson

ISBN-13: 978-0-13-350980-9

Enterprises have long relied on Master Data Management (MDM) to improve customer-related processes. But MDM was designed primarily for structured data. Today, crucial information is increasingly captured in unstructured, transactional, and social formats: from tweets and Facebook posts to call center transcripts.

In *Beyond Big Data*, five of IBM's leading data management experts draw on pioneering experience with IBM's enterprise customers and show how Social MDM can help you deepen relationships, improve prospect targeting, and fully engage customers through mobile channels.

Business leaders and practitioners will discover powerful new ways to combine social and master data to improve performance and uncover new opportunities. Architects and other technical leaders will find a complete reference architecture, in-depth coverage of relevant technologies and use cases, and domain-specific best practices for their own projects.

Common Information Models for an Open, Analytical, and Agile World

Table of Contents

Contents

Foreword

Preface

Chapter 1 Introduction

The Agile and Open World

GKDMR Travel

Adding Mobile Applications to the Enterprise

Social Computing

Insight Applications

Using Cloud Platforms

Security of Data

Summary

Chapter 2 Inside the Common Information Model

Introduction

Scope

Perspectives

Information Supply Chains

Model Types

Depth of Detail

A Comprehensive Common Information Model

Developing a Strategy

Table of Contents

Summary

Chapter 3 Structural Patterns for the Common Information Model

Summary

Chapter 4 Modeling Best Practices

What Should Be in a Model?

Deciding on the Scope of a Model

Table of Contents

Adopting Existing Models

Basic Modeling Skills

- Leveling the Content
- Standardizing Basic Types
- Dealing with Variation
- Dependent and Independent Behaviors
- When to Use Inheritance
- The Role Pattern
- Designing for Consistency
- Designing for Reuse
- Designing for Extensibility
- Linking Subject Areas

Tips for Modeling Interfaces

- Specialized Definitions of the Same Concept
- Context of a Request
- Versioning of Interfaces

Tips on Modeling for a Repository

- Removing DuplicationHow Far Do You Go?
- Storing Historical Information
- Effectivity Dating
- Modeling Unstructured Data
- Physical Implementation Details

Summary

Chapter 5 Governance

Introduction

Governance Definitions

- Governance Principles
- Governance Policies
- Governance Classification Schemes

Table of Contents

- Governance Standards
- Governance Rules, Guidelines, and Patterns
- Governance Process Definitions
- Governance Metrics

Managing Change

- Lifecycles of Governance

- Governance Leadership

- Governance Processes

- Governance Roles

- Everyday Decision Making

- Measurement and Audit

- Summary

Chapter 6 Moving Beyond the Hammer

- Structuring and Maintaining Models

- Configuration Management

 - Top-Down Configuration Management

 - Bottom-Up Configuration Management

 - Combining Approaches

- Consuming Models and Related Artifacts

- Managing Information Values

 - Quality Management

 - Reference Data Management

- Summary

Chapter 7 System Characteristics

- Introduction

- Non-Functional Characteristics

- Reviewing GKDMR Travel

Table of Contents

Systems of Record

SoR Non-Functional Characteristics.

CIM Implications for Systems of Record

Systems of Engagement

SoE Non-Functional Characteristics

CIM Implications for Systems of Engagement

Systems of Insight

SoI Non-Functional Characteristics

CIM Implications for Systems of Insight

Integration

Integration Requirements

CIM Implications for Integration

Summary

Chapter 8 Building Business Value

Complex Organizations

Points of View at GKDMR Travel

Adoption Maturity Model.

Repeatable Adoption Level

Defined Adoption Level

Managed Adoption Level

Investing in the Common Information Model

Optimizing Adoption Level

APIs from Business Partners

Unstructured Data Feeds

Summary

Chapter 9 Real-World Deployment Study

The Background and the Industry

Project Hydra

Table of Contents

The Common Information Model

Refining the TMF-SID into Services

Carving Up the TMF-SID.

Validating Consistency

Extending the TMF-SID objects

Pruning the Service Structures

Implementing the Integration Layer

Tools and Governance

Results

Chapter 10 Looking Forward

Where We Have Come From

Common Information Models Today

Thoughts for the Future

Concluding Remarks from the Authors

Appendix A: Industry Standards

Telecommunications Models

Finance Models

Utilities Industry

Appendix B: Non-Functional Behavior

Reliability and Availability

Performance Efficiency: Time Behavior Requirement

Performance Efficiency: Resource Utilization, Capacity Requirement

Compatibility Requirement

Maintainability Requirement

Security Requirement
