JEFF SCHEWE

The Digital Print: Preparing Images in Lightroom and Photoshop for Printing

Table of Contents

Table of Contents

Introduction

CHAPTER 1 A DIGITAL PRINTING PRIMER

A Brief History of Digital Printing

- A rock star and a hacksaw

- Jon Cone and Piezography

- Adoption of inkjet for fine art printing

- Ahead: Evolution, not revolution

Types of Digital Printers

- Piezoelectric vs. thermal print heads

- Dye sublimation

- Digital chromogenic

- Digital halftone

Picking a Printer

- Consumer grade

- Prosumer grade

- Professional grade

Printing In-House vs. a Service Bureau or Photo Lab

CHAPTER 2 COLOR MANAGEMENT

Understanding the Color of Color Management

- What is color and how do you see it?

- Measuring and specifying color

Understanding the Management of Color Management

Table of Contents

The basics of color management

Color management on Macintosh

Color management on Windows

Color management in Photoshop

Color management in Lightroom

Applied Color Management

Input profiles

Display calibration and profiling

Working-space profiles

Printer profiles

Buying a color management solution

CHAPTER 3 PREPARING IMAGES FOR PRINTING

Preparing the RGB Master Image

Optimizing tone and color

Image sharpening and noise reduction

Image and Output Resolution

How much resolution do you need?

Image vs. printer resolution

Image sizing and interpolation in Camera Raw and Lightroom

Image sizing and interpolation in Photoshop

Preparing a Color Image for Black-And-White Printing

Converting an image in Camera Raw or Lightroom

Color toning a black-and-white image in Camera Raw or Lightroom

Converting color to black and white in Photoshop

Color toning a black-and-white image in Photoshop

Soft Proofing

Soft proofing in Lightroom

Soft proofing in Photoshop

Soft proofing for dynamic range in Lightroom

Table of Contents

Preparing Images For Halftone Reproduction

CHAPTER 4 MAKING THE PRINT

Before You Print

Installing a printer on a Mac

Installing a printer on Windows

Printing from Photoshop

The Photoshop Print Settings dialog box

Printer-specific settings

Printing from a Photoshop printer plug-in

Automated printing using Actions

Printing from Lightroom

The Layout Style panel

The Image Settings panel

The Layout panel

The Guides panel

The Page panel

The Print Job panel

The Preview panel

The Template Browser panel

The Collections panel

Creating a saved print collection

The Toolbar

Printing

Printing a Black-and-White Image

Printing black-and-white toned images using ICC-based color management

Printing black-and-white images using a special black-and-white mode

Printing black-and-white images using a third-party RIP

Alternative black-and-white printing

CHAPTER 5 ATTRIBUTES OF A PERFECT PRINT

Table of Contents

What Is a Perfect Print?

- Print-viewing environment

- Digital print artifacts

Print Substrates (Paper/Media)

- Types of paper

- Paper coatings

- Paper attributes

- Maximum density of ink on paper

- Contrast range of a print

- Photo papers

- Matte/watercolor or fine art paper

- Canvas

- Alternative substrates and printing processes

- Picking the right paper for the image

Print Finishing

- Coatings

- Matting

- Framing

Print Presentation

- Portfolios and bindings

- Folios

Print Storage

Print Longevity

- Variables that affect longevity

- Longevity tests

- Final thoughts about longevity

CHAPTER 6 DEVELOPING A PRINTING WORKFLOW

An Example Fine Art Print Workflow

1. Confirm settings and specifications

Table of Contents

2. Cropping (nondestructive, if possible)
3. Cleaning and spotting
4. Global noise reduction and sharpening
5. Shadow and highlight recovery
6. Global tone and color correction
7. Major image editing and retouching
8. Regional tone and color correction
9. Regional hue and saturation correction
10. Creative sharpening, blurring, noise
11. Burning, dodging, sculpting, and midtone enhancement
12. Output sharpening
13. Final image check
14. Proofing with BAT and annotated printing
15. Final output and evaluation

When to print in Photoshop vs. LightroomThe Best Workflow

Photoshop and Lightroom workflows
