C Programming Absolute Beginner's Guide

Table of Contents

Table of Contents

Introduction

Whos This Book For?

What Makes This Book Different?

This Books Design Elements

How Can I Have Fun with C?

What Do I Do Now?

Part I: Jumping Right In

1 What Is C Programming, and Why Should I Care?

What Is a Program?

What You Need to Write C Programs

The Programming Process

Using C

2 Writing Your First C Program

A Down-and-Dirty Chunk of Code

The main() Function

Kinds of Data

Wrapping Things Up with Another Example Program

3 What Does This Do? Clarifying Your Code with Comments

Commenting on Your Code

Specifying Comments

Whitespace

A Second Style for Your Comments

Table of Contents

4 Your World PremierePutting Your Programs Results Up on the Screen

- How to Use printf()
- Printing Strings
- Escape Sequences
- Conversion Characters
- Putting It All Together with a Code Example

5 Adding Variables to Your Programs

- Kinds of Variables
- Naming Variables
- Defining Variables
- Storing Data in Variables

6 Adding Words to Your Programs

- Understanding the String Terminator
- The Length of Strings
- Character Arrays: Lists of Characters
- Initializing Strings

7 Making Your Programs More Powerful with #include and #define

- Including Files
- Placing #include Directives
- Defining Constants
- Building a Header File and Program

8 Interacting with Users

- Looking at scanf()
- Prompting for scanf()
- Problems with scanf()

Part II: Putting C to Work for You with Operators and Expressions

9 Crunching the NumbersLetting C Handle Math for You

Table of Contents

Basic Arithmetic

Order of Operators

Break the Rules with Parentheses

Assignments Everywhere

10 Powering Up Your Variables with Assignments and Expressions

Compound Assignment

Watch That Order!

Typcasting: Hollywood Could Take Lessons from C

11 The Fork in the Road Testing Data to Pick a Path

Testing Data

Using if

Otherwise: Using else

12 Juggling Several Choices with Logical Operators

Getting Logical

Avoiding the Negative

The Order of Logical Operators

13 A Bigger Bag of Tricks Some More Operators for Your Programs

Goodbye ifelse; Hello, Conditional

The Small-Change Operators: ++ and --

Sizing Up the Situation

Part III: Fleshing Out Your Programs

14 Code Repeat Using Loops to Save Time and Effort

while We Repeat

Using while

Using dowhile

15 Looking for Another Way to Create Loops

for Repeats Sake!

Working with for

Table of Contents

16 Breaking in and out of Looped Code

Take a break

Lets continue Working

17 Making the case for the switch Statement

Making the switch

break and switch

Efficiency Considerations

18 Increasing Your Programs Output (and Input)

putchar() and getchar()

The Newline Consideration

A Little Faster: getch()

19 Getting More from Your Strings

Character-Testing Functions

Is the Case Correct?

Case-Changing Functions

String Functions

20 Advanced Math (for the Computer, Not You!)

Practicing Your Math

Doing More Conversions

Getting into Trig and Other Really Hard Stuff

Getting Random

Part IV: Managing Data with Your C Programs

21 Dealing with Arrays

Reviewing Arrays

Putting Values in Arrays

22 Searching Arrays

Filling Arrays

Finders, Keepers

23 Alphabetizing and Arranging Your Data

Table of Contents

Putting Your House in Order: Sorting

Faster Searches

24 Solving the Mystery of Pointers

Memory Addresses

Defining Pointer Variables

Using the Dereferencing

25 Arrays and Pointers

Array Names Are Pointers

Getting Down in the List

Characters and Pointers

Be Careful with Lengths

Arrays of Pointers

26 Maximizing Your Computers Memory

Thinking of the Heap

But Why Do I Need the Heap?

How Do I Allocate the Heap?

If Theres Not Enough Heap Memory

Freeing Heap Memory

Multiple Allocations

27 Setting Up Your Data with Structures

Defining a Structure

Putting Data in Structure Variables

Part V: Files and Functions

28 Saving Sequential Files to Your Computer

Disk Files

Opening a File

Using Sequential Files

29 Saving Random Files to Your Computer

Opening Random Files

Table of Contents

Moving Around in a File

30 Organizing Your Programs with Functions

Form Follows C Functions

Local or Global?

31 Passing Variables to Your Functions

Passing Arguments

Methods of Passing Arguments

32 Returning Data from Your Functions

Returning Values

The return Data Type

One Last Step: Prototype

Wrapping Things Up

Appendixes

A: The ASCII Table

B: The Draw Poker Program

Index
