Python: Visual QuickStart Guide

Table of Contents

Table of Contents

Chapter 1 Introduction to Programming

- The Python Language

- What Is Python Useful For?

- How Programmers Work

- Installing Python

Chapter 2 Arithmetic, Strings, and Variables

- The Interactive Command Shell

- Integer Arithmetic

- Floating Point Arithmetic

- Other Math Functions

- Strings

- String Concatenation

- Getting Help

- Converting Between Types

- Variables and Values

- Assignment Statements

- How Variables Refer to Values

- Multiple Assignment

Chapter 3 Writing Programs

- Using IDLEs Editor

- Compiling Source Code

Table of Contents

Reading Strings from the Keyboard

Printing Strings on the Screen

Source Code Comments

Structuring a Program

Chapter 4 Flow of Control

Boolean Logic

If-Statements

Code Blocks and Indentation

Loops

Comparing For-Loops and While-Loops

Breaking Out of Loops and Blocks

Loops Within Loops

Chapter 5 Functions

Calling Functions

Defining Functions

Variable Scope

Using a main Function

Function Parameters

Modules

Chapter 6 Strings

String Indexing

Characters

Slicing Strings

Standard String Functions

Regular Expressions

Chapter 7 Data Structures

Table of Contents

The type Command

Sequences

Tuples

Lists

List Functions

Sorting Lists

List Comprehensions

Dictionaries

Sets

Chapter 8 Input and Output

Formatting Strings

String Formatting

Reading and Writing Files

Examining Files and Folders

Processing Text Files

Processing Binary Files

Reading Webpages

Chapter 9 Exception Handling

Exceptions

Catching Exceptions

Clean-Up Actions

Chapter 10 Object-Oriented Programming

Writing a Class

Displaying Objects

Flexible Initialization

Setters and Getters

Table of Contents

Inheritance

Polymorphism

Learning More

Chapter 11 Case Study: Text Statistics

Problem Description

Keeping the Letters We Want

Testing the Code on a Large Data File

Finding the Most Frequent Words

Converting a String to a Frequency Dictionary

Putting It All Together

Exercises

The Final Program

Appendix A: Popular Python Packages

Some Popular Packages

Appendix B: Comparing Python 2 and Python 3

Whats New in Python 3
