

COUNCIL OF SUPPLY CHAIN MANAGEMENT PROFESSIONALS

THE DEFINITIVE GUIDE TO MANUFACTURING AND SERVICE OPERATIONS

Master the Strategies and Tactics
for Planning, Organizing, and Managing
How Products and Services Are Produced

Council of Supply Chain Management Professionals and

Nada Sanders

**THE DEFINITIVE GUIDE
TO MANUFACTURING
AND SERVICE OPERATIONS**

Definitive Guide to Manufacturing and Service Operations, The: Master the Strategies and Tactics for Planning, Organizing, and Managing How Products and Services Are Produced

Table of Contents

Contents

Preface

1 Operations Management Defined

Defining Operations Management

The Transformation Role of Operations Management

Differences in Manufacturing Versus Service Operations

The Role of Manufacturing and Service Operations in the
Organization and Supply Chain

Organizational Decision Levels

Key Terminology

Critical Processes

Production Planning Processes

Master Production Schedule (MPS)

Material Requirements Planning (MRP)

Rough Cut Capacity Planning (RCCP)

Measuring Productivity Levels

Inventory Determination

Reasons for Carrying Inventory

Table of Contents

Types of Inventory

Inventory Policy Choices

Fixed-Order Quantity System

Fixed-Time Period System

Inventory Policy in a Fixed-Order Quantity System

How Much to Order?

When to Order?

Independent Versus Dependent Demand

ABC Inventory Classification

Vendor Managed Inventory (VMI)

Challenges Facing the Modern Operations Manager

Discussion Questions

Endnote

2 Key Elements and Processes

Levels of Planning Decisions

Strategic Versus Tactical Operations Decisions

Production Planning

Different Types of Production Plans

Facility Requirements Planning

Resource Planning

Master Production Scheduling (MPS)

Material Requirements Planning (MRP)

Rough Cut Capacity Planning (RCCP)

Scheduling Work

High-Volume Operations

Low-Volume Operations

Sequencing Jobs

Total Quality Management (TQM)

Table of Contents

Statistical Process Control (SPC): Process Capability and Control Charts

- Variation

- Process Capability

- Process Control Charts

Six Sigma

Six Sigma Methodology

ISO Standards

Theory of Constraints (TOC)

The 5S

Discussion Questions

3 Understanding Operations Strategies

What Operations Strategy Is and Why It Is Important

Strategic Alignment

Competitive Priorities

- Cost

- Quality

- Time

- Flexibility

- Operations Structure and Infrastructure

- Order Winners and Order Qualifiers

Process Strategy

- Intermittent Processes

- Repetitive Processes

- The Product-Process Matrix

Types of Operations Processes

Facility Layout Strategies

- Fixed Position Layout

Table of Contents

Process Layout

Product Layout

Cellular Layouts

Line Balancing

Step 1: Identify Task Times and Precedence Relationships

Step 2: Determine Cycle Time

Step 3: Assign Tasks to Workstation

Step 4: Compute Efficiency

Inventory Positioning Strategy

Make-to-Order

Make-to-Stock

Assemble-to-Order

Comparing Inventory Positioning Strategies

Outsourcing Strategy

Outsourcing Versus Vertical Integration

Discussion Questions

Endnote

4 Role of Technology in Managing Operations

The Role of Technology

Types of Operations Technologies

Enterprise Resource Planning (ERP)

Evolution of ERP

Pre-Enterprise Resource Planning Software

Real-Time Processing

Focus of Systems

Benefits of ERP

The Planning Capabilities of ERP

Step 1: Strategic Business Planning

Table of Contents

Step 2: Production Planning

Step 3: Master Production Schedule (MPS)

Step 4: Materials Requirements Planning (MRP)

Step 5: Capacity Requirements Planning (CRP)

Step 6: Operations Execution and Control

Two-Tier ERP

Shortcomings of ERP Software

Successful ERP Implementation

Step 1: Determine Technical Requirements

Step 2: Software Installation

Step 3: Data Cleaning

Step 4: Testing

Step 5: Employee Training

Step 6: Run Pilot

Other Information Technologies

Global Positioning Systems (GPS)

Radio Frequency Identification (RFID)

Advantages and Disadvantages of Automation

Automated Material Handling

Flexible Manufacturing Systems (FMS)

Robotics

E-Manufacturing

Computer-Aided Design (CAD)

Computer-Integrated Manufacturing (CIM)

Emerging Technologies

3D Printing

Responsive Web Design

Small Data

Table of Contents

Discussion Questions

5 Understanding the Role of Global Operations in the Modern Marketplace

Benefits of Global Operations

Factors Impacting Global Operations

Challenges to Global Operations

The Global Consumer

Global Versus Local Marketing

Cultural Challenge

Global Infrastructure Design

Labor

Transportation

Suppliers

Importance of Technology

Cost Considerations

Hidden Costs

Noncost Considerations

The Reshoring Trend

Importance of Total Cost of Ownership (TCO)

Cost of Goods Sold or Landed Cost

Other Hard Costs

Potential Risk-Related Costs

Strategic Costs

Environmental Costs

The Role of Political and Economic Factors

Exchange Rate Fluctuations

Regional Trade Agreements

Impact of Nontariff Barriers

Table of Contents

Discussion Questions

6 Metrics and Frameworks for Assessing Performance

Importance of Metrics and Measurement

Categories of Metrics

Organizational Focused Metrics

Predictive and Outcome Metrics

Managing Trade-Offs

Productivity Measures

Productivity

Efficiency

Cycle Time

Customer Service Measures

Elements of Customer Service

Critical Key Performance Indicators (KPIs)

Measurement Systems and Frameworks

Monitoring Options

Balanced Scorecard

Discussion Questions

Endnote
