Film Speed and Film Grain

Photographic Exposure

Matching Lens Imperfections

Exercises

Chapter Seven: Composition and Staging

Types of Shot

Camera Angles

Improving Your Composition

Table of Contents

Framing for Film and Video

Exercises

Chapter Eight: The Art and Science of Color

Working in a Linear Workflow

Color Mixing

Developing Color Schemes

Using Color Balance

Working with Digital Color

Exercises

Chapter Nine: Shaders and Rendering Algorithms

Shading Surfaces

Anti-Aliasing

Raytracing

Reyes Algorithms

Global Illumination

Caustics

Exercises

Chapter Ten: Designing and Assigning Textures

Mapping Surface Attributes

Aligning Maps with Models

Creating Texture Maps

Using Procedural Textures

Chapter Eleven: Rendering in Layers and Passes for Compositing

Rendering in Layers

Rendering in Passes

Table of Contents

Matching Live-Action Background Plates

Managing Colors in Your Composite

Choosing Your Approach

Exercises

Chapter Twelve: Production Pipelines and Professional Practices

Production Pipelines

Lighting on Larger Productions

Advancing in Your Career

Appendix: Getting a Job in 3D Graphics
