An Introduction to
Data Visualization
in **JavaScript™**

VISUAL STORYTELLING WITH **D3**

RITCHIE S. KING

Visual Storytelling with D3

Visual Storytelling with D3: An Introduction to Data Visualization in JavaScript

Table of Contents

Contents

Foreword

Preface

Acknowledgments

About the Author

1 Visual Storytelling and D3

Visualization, Visualized

Charts Give Data a Form That Form Tells a Story

Quality: It Is All about Content

Design: It Is All about Form

Visual Storytelling

Enter D3

Things You Designers Will Love about D3

Things You Coders Will Love about D3

Things for Which You Should Not Use D3

Notes on Using D3

Tools You Will Need

Summary

2 Finding a Data-Driven Story and Telling It Visually

Getting Started

Table of Contents

Is the World Getting Older?

Finding and Inspecting Data

Honing the Concept

Choosing a Form

- Showing the Data as a Column Chart

- Showing the Data as a Stacked Column Chart

- Showing the Data as a Line Chart

- Showing the Data as a Pie Chart

- Showing the Data as a Bar Chart

- Showing the Data as a Small Multiple Bar Chart

- Chart SuggestionsA Thought Starter

The Example We Will Build in This Book

Summary

3 Scalable Vector Graphics

Peeking under the Hood

What Is SVG, Exactly?

Playing with Circles in SVG

Inspecting SVG in the Web Inspector

Styling SVG Elements with CSS

Other Shapes

- Rectangles

- Rounded Rectangles

- Circles

- Ellipses

- Polygons

- Lines

- Paths

SVG Text

Table of Contents

SVG Style Properties

- Color and Transparency

- Stroke Properties

Drawing Order and Groups

Transformations

Building a Bar Chart in SVG

Summary

4 Shaping Web Pages with D3 Selections

Getting Set Up with D3

Making Selections

- Using CSS Selectors to Create Selections

- Creating Selections from Other Selections

- Assigning Selections to Variables

Changing a Selections Attributes

- How attr() Works

- Using attr() to Apply Classes and Style Rules

D3 Strives to be Declarative

Chaining Methods

- Creating New Selections in the Middle of a Chain

- Chains and Variable Assignment

Appending New Elements

Putting It All Together

Selecting Multiple Elements with d3.selectAll()

Building a Bar Chart with Selections

- Use Variables

- Do Math

- Use Better Variables

- Use a Variable for your Data

Table of Contents

Make Your Constraints Explicit

Use Loops

Summary

5 Data-Joins: Enter

What Are Data-Joins?

A Conceptual Overview of Data-Joins: Enter

Enter and Binding Data

Using a Data-Join to Make a Bar Chart

Using Anonymous Functions to Access Bound Data

Finishing the Rest of the Chart

Storing Data in Objects

Summary

6 Sizing Charts and Adding Axes

Linear Scales

Using Smart Margin Conventions

Adding Axes

Ordinal Scales and Axes

Summary

7 Loading and Filtering External Data

Building a Graphic that Uses All of the Population Distribution Data

Data Formats You Can Use with D3

Creating a Server to Upload Your Data

Initiating a Server on the Command Line

Creating an Index File

D3s Functions for Loading Data

Callback Functions

How D3 Interprets CSV Tables

Table of Contents

Dealing with Asynchronous Requests

 Creating a Bar Chart with External Data

Loading and Filtering a Large(r) Data Set

Putting It All Together

Summary

8 Making Charts Interactive and Animated

Data-Joins: Update and Exit

Interactive Buttons

 Making Buttons Using a Data Join

 Making the Buttons Clickable

Updating Charts

Adding Transitions

Using Keys

Summary

9 Adding a Play Button

Wrapping the Update Phase in a Function

Adding a Play Button to the Page

Making the Play Button Go

Allowing the User to Interrupt the Play Sequence

Summary

10 Striking Out on Your Own

This Book is a Foundation for Learning D3

How to Get Unstuck

Always Be Coding

Summary

A: JavaScript for Beginners

Table of Contents

JavaScript in Brief

Your Browsers JavaScript Console

Basic Math, Variables, and Data Types

Writing JavaScript in Markup and .js Files

Arrays and Objects

Methods and Functions

If Statements and for Loops

Debugging

B: Cleaning the Population Distribution Data

Index
