UNIX System V Network Programming

Table of Contents

Contents

Preface

PART 1: Background Material

1. Introduction to Networks

1.1. Background

1.2. Network Characteristics

1.3. Networking Models

Summary

Bibliographic Notes

2. UNIX Programming

2.1. Overview

2.2. Concepts

2.3. Conventions

2.4. Writing Programs

Summary

Exercises

Bibliographic Notes

PART 2: User-level Network Programming

3. STREAMS

3.1. STREAMS Background

3.2. STREAMS Architecture

3.3. System Calls

3.4. Nonblocking I/O and Polling

3.5. Service Interfaces

3.6. IPC with STREAMS Pipes

Table of Contents

3.7. Advanced Topics

Summary

Exercises

Bibliographic Notes

4. The Transport Layer Interface

4.1. Introduction

4.2. Transport Endpoint Management

4.3. Connectionless Service

4.4. Connection-oriented Service

4.5. TLI and Read/Write

Summary

Exercises

Bibliographic Notes

5. Selecting Networks and Addresses

5.1. Introduction

5.2. Network Selection

5.3. Name-to-Address Translation

5.4. Name-to-Address Library Design

Summary

Exercises

Bibliographic Notes

6. The Network Listener Facility

6.1. The Service Access Facility

6.2. Port Monitors

6.3. The Listener Process

6.4. One-shot Servers

6.5. Standing Servers

6.6. The NLPS Server

Summary

Exercises

Bibliographic Notes

Table of Contents

7. Sockets

- 7.1. Introduction
- 7.2. Socket Management
- 7.3. Connection Establishment
- 7.4. Data Transfer
- 7.5. UNIX Domain Sockets
- 7.6. Advanced Topics
- 7.7. Comparison with the TLI
- 7.8. Name-to-Address Translation
- Summary
- Exercises
- Bibliographic Notes

8. Remote Procedure Calls

- 8.1. Introduction
- 8.2. XDR
- 8.3. High-level RPC Programming
- 8.4. Low-level RPC Programming
- 8.5. rpcgen
- 8.6. Advanced RPC Features
- Summary
- Exercises
- Bibliographic Notes

PART 3: Kernel-level Network Programming

9. The STREAMS Subsystem

- 9.1. The Kernel Environment
- 9.2. The STREAMS Environment
- 9.3. STREAMS Messages
- 9.4. STREAMS Queues
- 9.5. Communicating with Messages
- 9.6. Message Types
- Summary

Table of Contents

Exercises

Bibliographic Notes

10. STREAMS Drivers

10.1. Introduction

10.2. Driver Entry Points

10.3. The Data Link Provider Interface

10.4. Ethernet Driver Example

Summary

Exercises

Bibliographic Notes

11. STREAMS Modules

11.1. Introduction

11.2. Module Entry Points

11.3. The Terminal Interface

11.4. Network TTY Emulator Example

Summary

Exercises

Bibliographic Notes

12. STREAMS Multiplexors

12.1. Introduction

12.2. How Multiplexors Work

12.3. The Transport Provider Interface

12.4. Transport Provider Example

Summary

Exercises

Bibliographic Notes

PART 4: Design Project

13. Design Project: Implementing SLIP

13.1. Introduction to SLIP

13.2. Software Architecture

13.3. User-level Components

Table of Contents

13.4. Kernel-level Components

Summary

Exercises

Bibliographic Notes

Bibliography
