Introduction

Chapter 1 Inter-Domain Routing Concepts

Early Inter-Domain Routing: The Exterior Gateway Protocol
(EGP)

Origins of EGP

Operation of EGP

EGP Topology Issues

EGP Functions

Neighbor Acquisition Protocol

Neighbor Reachability Protocol

Network Reachability Protocol

Shortcomings of EGP

The Advent of BGP

BGP Basics

Autonomous System Types

Table of Contents

External and Internal BGP

Multihoming

- Transit AS Multihoming

- Stub AS Multihoming

- Multihoming and Routing Policies

- Multihoming Issues: Load Sharing and Load Balancing

- Multihoming Issues: Traffic Control

- Multihoming Issues: Provider-Assigned Addressing

Classless Inter-Domain Routing

- A Summarization Summary

- Classless Routing

- Summarization: The Good, the Bad, and the Asymmetric

- CIDR: Reducing Class B Address Space Depletion

- CIDR: Reducing Routing Table Explosion

- Managing and Assigning IPv4 Address Blocks

- CIDR Issues: Multihoming and Provider-Assigned Addresses

- CIDR Issues: Address Portability

- CIDR Issues: Provider-Independent Addresses

- CIDR Issues: Traffic Engineering

- CIDR Approaches Its Limits

- IPv6 Comes of Age

- Routing Table Explosion, Again

Looking Ahead

Review Questions

Chapter 2 Introduction to BGP

Who Needs BGP?

- Connecting to Untrusted Domains

- Connecting to Multiple External Neighbors

- Setting Routing Policy

Table of Contents

BGP Hazards

Operation of BGP

BGP Message Types

Open Message

Keepalive Message

Update Message

Notification Message

BGP Finite State Machine

Idle State

Connect State

Active State

OpenSent State

OpenConfirm State

Established State

Path Attributes

ORIGIN Attribute

AS_PATH Attribute

NEXT_HOP Attribute

Weight

BGP Decision Process

BGP Message Formats

Open Message

Update Message

Keepalive Message

Notification Message

Configuring and Troubleshooting BGP Peering

Case Study: EBGPeering

Case Study: EBGPeering over IPv6

Case Study: IBGP Peering

Case Study: Connected Check and EBGPeering Multihop

Case Study: Managing and Securing BGP Connections

Looking Ahead

Table of Contents

Review Questions

Configuration Exercises

Troubleshooting Exercises

Chapter 3 BGP and NLRI

Configuring and Troubleshooting NLRI in BGP

Injecting Prefixes with the network Statement

Using the network mask Statement

Injecting Prefixes with Redistribution

NLRI and IBGP

Managing Prefixes in an IBGP Topology

IBGP and IGP Synchronization

Advertising BGP NLRI into the Local AS

Redistributing BGP NLRI into the IGP

Case Study: Distributing NLRI in a Stub AS with IBGP

Distributing NLRI in a Stub AS with Static Routes

Advertising a Default Route to a Neighboring AS

Advertising Aggregate Routes with BGP

Case Study: Aggregation Using Static Routes

Aggregation Using the aggregate-address Statement

ATOMIC_AGGREGATE and AGGREGATOR Attributes

Using AS_SET with Aggregates

Looking Ahead

Configuration Exercises

Troubleshooting Exercises

Chapter 4 BGP and Routing Policies

Policy and the BGP Database

IOS BGP Implementation

Table of Contents

InQ and OutQ

IOS BGP Processes

NHT, Event, and the Open Processes

Table Versions

Managing Policy Changes

Clearing BGP Sessions

Soft Reconfiguration

Route Refresh

Route Filtering Techniques

Filtering Routes by NLRI

Case Study: Using Distribute Lists

Route Filtering with Extended ACLs

Case Study: Using Prefix Lists

Filtering Routes by AS_PATH

Regular Expressions

Literals and Metacharacters

Delineation: Matching the Start and End of Lines

Bracketing: Matching a Set of Characters

Negating: Matching Everything Except a Set of Characters

Wildcard: Matching Any Single Character

Alternation: Matching One of a Set of Characters

Optional Characters: Matching a Character That May or May Not Be There

Repetition: Matching a Number of Repeating Characters

Boundaries: Delineating Literals

Putting It All Together: A Complex Example

Case Study: Using AS-Path Filters

Case Study: Setting Policy with Route Maps

Filter Processing

Influencing the BGP Decision Process

Case Study: Administrative Weights

Case Study: Using the LOCAL_PREF Attribute

Table of Contents

Case Study: Using the MULTI_EXIT_DISC Attribute

Case Study: Prepending the AS_PATH

Case Study: Administrative Distances and Backdoor Routes

Controlling Complex Route Maps

Continue Clauses

Policy Lists

Chapter 5 Scaling BGP

Scaling the Configuration

Peer Groups

Peer Templates

Session Templates

Policy Templates

Communities

Well-Known Communities

Arbitrary Communities

Using the AA:NN Format

Expanded Community Lists

Adding and Deleting Communities

Extended Community Lists

Scaling BGP Functions

Route Flap Dampening

Outbound Route Filters (ORF)

Next-Hop Tracking

Fast External Fallover

Bidirectional Forwarding Detection (BFD)

BGP Prefix Independent Convergence (PIC)

Table of Contents

ADD-PATHS Capability

Graceful Restart

Maximum Prefixes

Tuning BGP CPU

Tuning BGP Memory

BGP Transport Optimization

Optimizing TCP

Optimizing BGP Update Generation

Optimizing TCP ACK Message Receipt

Scaling the BGP Network

Private AS Numbers

4-Byte AS Numbers

IBGP and the N-Squared Problem

Confederations

Route Reflectors

Looking Ahead

Troubleshooting Exercises

Chapter 6 Multiprotocol BGP

Multiprotocol Extensions to BGP

MBGP Support for the IPv6 Address Family

Configuring MBGP for IPv6

IPv4 and IPv6 Prefixes over an IPv4 TCP Session

Upgrading IPv4 BGP Configurations to the Address Family Format

IPv4 and IPv6 over an IPv6 TCP Connection

Dual Stack MBGP Connection

Multihop Dual Stack MBGP Connection

Mixed IPv4 and IPv6 Sessions

Table of Contents

Multiprotocol IBGP

Case Study: Multiprotocol Policy Configuration

Looking Ahead

Question 1:

Troubleshooting Exercises

Chapter 7 Introduction to IP Multicast Routing

Requirements for IP Multicast

IPv4 Multicast Addresses

IPv6 Multicast Addresses

Group Membership Concepts

Joining and Leaving a Group

Join Latency

Leave Latency

Group Maintenance

Multiple Routers on a Network

Internet Group Management Protocol (IGMP)

IGMPv2 Host Functions

IGMPv2 Router Functions

IGMPv1

IGMPv3

IGMP Message Format

Multicast Listener Discovery (MLD)

IGMP/MLD Snooping

Cisco Group Management Protocol (CGMP)

Multicast Routing Issues

Multicast Forwarding

Multicast Routing

Sparse Versus Dense Topologies

Table of Contents

- Implicit Joins Versus Explicit Joins
- Source-Based Trees Versus Shared Trees
- Source-Specific Multicast (SSM)
- Multicast Scoping
 - TTL Scoping
 - Administrative Scoping
- Looking Ahead
- Recommended Reading
- Review Questions
- Configuration Exercises

Chapter 8 Protocol Independent Multicast

- Introduction to Protocol Independent Multicast (PIM)
- Operation of Protocol Independent Multicast-Dense Mode (PIM-DM)
 - PIM-DM Basics
 - Prune Overrides
 - Unicast Route Changes
 - PIM-DM Designated Routers
 - PIM Forwarder Election
- Operation of Protocol Independent Multicast-Sparse Mode (PIM-SM)
 - PIM-SM Basics
- Finding the Rendezvous Point
 - Bootstrap Protocol
 - Auto-RP Protocol
 - Embedded RP Addresses
- PIM-SM and Shared Trees
- Source Registration
- PIM-SM and Shortest Path Trees

Table of Contents

PIMv2 Message Formats

- PIMv2 Message Header Format
- PIMv2 Hello Message Format
- PIMv2 Register Message Format
- PIMv2 Register Stop Message Format
- PIMv2 Join/Prune Message Format
- PIMv2 Bootstrap Message Format
- PIMv2 Assert Message Format
- PIMv2 Graft Message Format
- PIMv2 Graft-Ack Message Format
- Candidate-RP-Advertisement Message Format

Configuring IP Multicast Routing

- Case Study: Configuring Protocol Independent Multicast-Dense Mode (PIM-DM)

- Configuring Protocol Independent Multicast-Sparse Mode (PIM-SM)

- Case Study: Statically Configuring the RP
 - Case Study: Configuring Auto-RP
 - Case Study: Configuring Sparse-Dense Mode
 - Case Study: Configuring the Bootstrap Protocol

- Case Study: Multicast Load Sharing

Troubleshooting IP Multicast Routing

- Using mroute
- Using mtrace and mstat

Looking Ahead

Chapter 9 Scaling IP Multicast Routing

Table of Contents

Multicast Scoping

Case Study: Multicasting Across Non-Multicast Domains

Connecting to DVMRP Networks

Inter-AS Multicasting

- Multiprotocol Extensions for BGP (MBGP)

- Operation of Multicast Source Discovery Protocol (MSDP)

- MSDP Message Formats

 - Source Active TLV

 - Source Active Request TLV

 - Source Active Response TLV

 - Keepalive TLV

 - Notification TLV

Case Study: Configuring MBGP

Case Study: Configuring MSDP

Case Study: MSDP Mesh Groups

Case Study: Anycast RP

Case Study: MSDP Default Peers

Configuration Exercise

Chapter 10 IPv4 to IPv4 Network Address Translation (NAT44)

Operation of NAT44

- Basic NAT Concepts

- NAT and IP Address Conservation

- NAT and ISP Migration

- NAT and Multihomed Autonomous Systems

- Port Address Translation (PAT)

- NAT and TCP Load Distribution

Table of Contents

NAT and Virtual Servers

NAT Issues

Header Checksums

Fragmentation

Encryption

Security

Protocol-Specific Issues

ICMP

DNS

FTP

SMTP

SNMP

Routing Protocols

Traceroute

Configuring NAT44

Case Study: Static NAT

NAT44 and DNS

Case Study: Dynamic NAT

Case Study: A Network Merger

Case Study: ISP Multihoming with NAT

Port Address Translation

Case Study: TCP Load Balancing

Case Study: Service Distribution

Troubleshooting NAT44

Looking Ahead

Troubleshooting Exercises

Chapter 11 IPv6 to IPv4 Network Address Translation

Table of Contents

(NAT64)

Stateless IP/ICMP Translation (SIIT)

IPv4/IPv6 Header Translation

ICMP/ICMPv6 Translation

Fragmentation and PMTU

Upper-Layer Header Translation

Network Address Translation with Port Translation (NAT-PT)

Operation of NAT-PT

Configuring NAT-PT

Why Is NAT-PT Obsolete?

Stateless NAT64

Operation of Stateless NAT64

Configuration of Stateless NAT64

Limitations of NAT64

Stateful NAT64

Operation of Stateful NAT64

Configuration of Stateful NAT64

Limitations of Stateful NAT64
