About the Authors

PART I: Overview

1 Business Need for SAFe

Why Do Businesses Need SAFe?

The Challenge of System Development

Applying New Bodies of Knowledge

Improving System Development Outcomes

The Business Benefits of SAFe

Summary

2 SAFe Overview

The Big Picture

The Levels

The Foundation

The Spanning Palette

Summary

Table of Contents

PART II: The Foundation of SAFe

3 Lean-Agile Mindset

Overview

Thinking Lean

Embracing Agility

Applying the Agile Manifesto at Scale

Summary

4 Lean-Agile Leaders

Exhibit the Lean-Agile Mindset

Lead the Change

Know the Way and Emphasize Lifelong Learning

Develop People

Inspire and Align with Mission. Minimize Constraints

Decentralize Decision-Making

Unlock the Intrinsic Motivation of Knowledge Workers

Evolve the Development Manager Role

Summary

5 SAFe Principles

Why Focus on Principles?

Principle #1: Take an Economic View

Principle #2: Apply Systems Thinking

Principle #3: Assume Variability; Preserve Options

Principle #4: Build Incrementally with Fast, Integrated Learning Cycles

Principle #5: Base Milestones on Objective Evaluation of Working Systems

Principle #6: Visualize and Limit WIP, Reduce Batch Sizes, and Manage Queue Lengths

Principle #7: Apply Cadence; Synchronize with Cross-Domain Planning

Principle #8: Unlock the Intrinsic Motivation of Knowledge Workers

Principle #9: Decentralize Decision-Making

Table of Contents

Summary

PART III: Program and Team Level

6 The Agile Release Train

Over view

ART Organization

Develop on Cadence. Release Any Time

Vision

Features

Program Backlog

Roadmap

Agile Teams Power the Train

User Stories and the Team Backlog

Summary

7 Planning a Program Increment

Overview

Preparation for the PI Planning Event

Day 1 Create and Review Draft Plans

Day 2 Finalize Plans and Commit

Summary

8 Executing a Program Increment

Overview

The Iteration Cycle

Building Quality In

Improving Team Flow with Kanban

Managing ART Flow

System Demo

Innovation and Planning

Inspect and Adapt

Summary

Table of Contents

9 Inspect and Adapt

Overview

PI System Demo

Quantitative Measurement

Retrospective and Problem-Solving Workshop

Inspect and Adapt at the Value Stream Level

Summary

PART IV: Value Stream Level

10 Value Stream Overview

Overview

Economic Framework

Capabilities and the Value Stream Backlog

Value Stream Epics

Defining and Building the Solution

Value Stream Flow

Summary

11 Defining Large and Complex Solutions

Overview

The Solution

Solution Intent

Fixed and Variable Solution Intent

Developing Solution Intent

Documenting Solution Intent

Solution Context

Summary

12 Coordinating ARTs and Suppliers

Overview

Value Stream PI Planning

ART PI Planning

Table of Contents

Value Stream Post-PI Planning
Frequent Solution Integration
Value Stream Sync
Solution Demo
Value Stream Inspect and Adapt
Summary

PART V: Portfolio

13 Portfolio Level Overview

Overview
Connecting the Portfolio to the Business
Defining Strategic Themes for a Portfolio
Influence of Strategic Themes
Measuring Progress against Strategic Themes
Portfolio Roles
Lean-Agile Program Portfolio Management
Advancing Solution Behavior with Portfolio Epics
Establishing Enterprise Value Flow
Coordinating Value Streams
Summary

14 Lean-Agile Budgeting, Forecasting, and Contracting

Introduction
Lean-Agile Budgeting
Lean-Agile Planning and Forecasting
Lean-Agile Contracting
Agile Capitalization Strategies
Summary

PART VI: Implementing SAFe

15 The Guiding Coalition

Introduction

Table of Contents

The Implementation Roadmap
Reaching the Tipping Point
The Need for a Powerful Coalition
Train Lean-Agile Change Agents
Train Executives, Managers, and Leaders
Charter a Lean-Agile Center of Excellence
Summary

16 Design the Implementation

Introduction
Create the Implementation Plan
Summary

17 Implementing Agile Release Trains

Introduction
Prepare for the ART Launch
Train Teams and Launch the ART
The Quick-Start Approach to ART Launch
Coach ART Execution
Launch More ARTs in the Value Stream
Launch More Value Streams in the Portfolio
Summary

18 Sustain and Improve

Introduction
Advance Organizational Maturity
Implement Agile HR Practices
Measure and Take Action
Improve Agile Architecture and Technical Practices
Focus on DevOps and Continuous Delivery
Reduce Time to Market with Value Stream Mapping
Summary

Table of Contents

19 Essential SAFe

Overview

Lean-Agile Principles

Agile Teams and Release Trains

Cadence and Synchronization

Essential Team and Program Roles

PI Planning

System Demo

Inspect and Adapt

IP Iteration

DevOps Pipeline

Lean-Agile Leadership
