

ANALYSIS PATTERNS

REUSABLE OBJECT MODELS

MARTIN FOWLER

Forewords by
Ward Cunningham and Ralph Johnson

Analysis Patterns: Reusable Object Models

Analysis Patterns: Reusable Object Models

Table of Contents

Contents

Foreword

Foreword

Preface

Chapter 1. Introduction

1.1 Conceptual Models

1.2 The World of Patterns

1.3 The Patterns in this Book

1.4 Conceptual Models and Business Process Reengineering

1.5 Patterns and Frameworks

1.6 Using the Patterns

References

Part 1. Analysis Patterns

Chapter 2. Accountability

2.1 Party

2.2 Organization Hierarchies

2.3 Organization Structure

2.4 Accountability

2.5 Accountability Knowledge Level

2.6 Party Type Generalizations

2.7 Hierarchic Accountability

2.8 Operating Scopes

2.9 Post

Table of Contents

References

Chapter 3. Observations and Measurements

3.1 Quantity

3.2 Conversion Ratio

3.3 Compound Units

3.4 Measurement

3.5 Observation

3.6 Subtyping Observation Concepts

3.7 Protocol

3.8 Dual Time Record

3.9 Rejected Observation

3.10 Active Observation, Hypothesis, and Projection

3.11 Associated Observation

3.12 Process of Observation

References

Chapter 4. Observations for Corporate Finance

4.1 Enterprise Segment

4.2 Measurement Protocol

4.3 Range

4.4 Phenomenon with Range

4.5 Using the Resulting Framework

References

Chapter 5. Referring to Objects

5.1 Name

5.2 Identification Scheme

5.3 Object Merge

5.4 Object Equivalence

References

Chapter 6. Inventory and Accounting

6.1 Account

6.2 Transactions

Table of Contents

- 6.3 Summary Account
- 6.4 Memo Account
- 6.5 Posting Rules
- 6.6 Individual Instance Method
- 6.7 Posting Rule Execution
- 6.8 Posting Rules for Many Accounts
- 6.9 Choosing Entries
- 6.10 Accounting Practice
- 6.11 Sources of an Entry
- 6.12 Balance Sheet and Income Statement
- 6.13 Corresponding Account
- 6.14 Specialized Account Model
- 6.15 Booking Entries to Multiple Accounts
- Further Reading
- References

Chapter 7. Using the Accounting Models

- 7.1 Structural Models
- 7.2 Implementing the Structure
- 7.3 Setting Up New Phone Services
- 7.4 Setting Up Calls
- 7.5 Implementing Account-based Firing
- 7.6 Separating Calls into Day and Evening
- 7.7 Charging for Time
- 7.8 Calculating the Tax
- 7.9 Concluding Thoughts
- References

Chapter 8. Planning

- 8.1 Proposed and Implemented Action
- 8.2 Completed and Abandoned Actions
- 8.3 Suspension
- 8.4 Plan

Table of Contents

8.5 Protocol

8.6 Resource Allocation

8.7 Outcome and Start Functions

References

Chapter 9. Trading

9.1 Contract

9.2 Portfolio

9.3 Quote

9.4 Scenario

References

Chapter 10. Derivative Contracts

10.1 Forward Contracts

10.2 Options

10.3 Product

10.4 Subtype State Machines

10.5 Parallel Application and Domain Hierarchies

References

Chapter 11. Trading Packages

11.1 Multiple Access Levels to a Package

11.2 Mutual Visibility

11.3 Subtyping Packages

11.4 Concluding Thoughts

References

Part 2. Support Patterns

Chapter 12. Layered Architecture for Information Systems

12.1 Two-Tier Architecture

12.2 Three-Tier Architecture

12.3 Presentation and Application Logic

12.4 Database Interaction

12.5 Concluding Thoughts

References

Table of Contents

Chapter 13. Application Facades

13.1 A Health Care Example

13.2 Contents of a Facade

13.3 Common Methods

13.4 Operations

13.5 Type Conversions

13.6 Multiple Facades

References

Chapter 14. Patterns for Type Model Design Templates

14.1 Implementing Associations

14.2 Implementing Generalization

14.3 Object Creation

14.4 Object Destruction

14.5 Entry Point

14.6 Implementing Constraints

14.7 Design Templates for Other Techniques

References

Chapter 15. Association Patterns

15.1 Associative Type

15.2 Keyed Mapping

15.3 Historic Mapping

References

Chapter 16. Afterword

References

Part 3. Appendix

Appendix A. Techniques and Notations

A.1 Type Diagrams

A.2 Interaction Diagrams

A.3 Event Diagrams

A.4 State Diagrams

Table of Contents

A.5 Package Diagrams

References

Appendix B. Table of Patterns

Index
