Introduction

Part I: General Network Design

Chapter 1 Network Design Methodology

Do I Know This Already? Quiz

Foundation Topics

Cisco Architectures for the Enterprise

Borderless Networks Architecture

Collaboration and Video Architecture

Data Center and Virtualization Architecture

Cisco Design Lifecycle: Plan, Build, Manage

Plan Phase

Build Phase

Manage Phase

Prepare, Plan, Design, Implement, Operate, and Optimize Phases

Prepare Phase

Plan Phase

Design Phase

Implement Phase

Operate Phase

Optimize Phase

Summary of PPDIOO Phases

Project Deliverables

Design Methodology

Table of Contents

Identifying Customer Design Requirements

Characterizing the Existing Network

- Steps in Gathering Information

- Network Audit Tools

- Network Checklist

Designing the Network Topology and Solutions

- Top-Down Approach

- Pilot and Prototype Tests

- Design Document

References and Recommended Reading

Exam Preparation Tasks

- Review All Key Topics

- Complete Tables and Lists from Memory

- Define Key Terms

Q&A

Chapter 2 Network Design Models

Do I Know This Already? Quiz

Foundation Topics

Hierarchical Network Models

- Benefits of the Hierarchical Model

- Hierarchical Network Design

 - Core Layer

 - Distribution Layer

 - Access Layer

- Hierarchical Model Examples

- Hub-and-Spoke Design

- Collapsed Core Design

Cisco Enterprise Architecture Model

- Enterprise Campus Module

- Enterprise Edge Area

 - E-Commerce Module

 - Internet Connectivity Module

 - VPN/Remote Access

 - Enterprise WAN

- Service Provider Edge Module

- Remote Modules

 - Enterprise Branch Module

 - Enterprise Data Center Module

Table of Contents

Enterprise Teleworker Module

High Availability Network Services

Workstation-to-Router Redundancy and LAN High Availability Protocols

ARP

Explicit Configuration

RDP

RIP

HSRP

VRRP

GLBP

Server Redundancy

Route Redundancy

Load Balancing

Increasing Availability

Link Media Redundancy

References and Recommended Reading

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Part II: LAN and WAN Design

Chapter 3 Enterprise LAN Design

Do I Know This Already? Quiz

Foundation Topics

LAN Media

Ethernet Design Rules

100Mbps Fast Ethernet Design Rules

Gigabit Ethernet Design Rules

1000BASE-LX Long-Wavelength Gigabit Ethernet

1000BASE-SX Short-Wavelength Gigabit Ethernet

1000BASE-CX Gigabit Ethernet over Coaxial Cable

1000BASE-T Gigabit Ethernet over UTP

10 Gigabit Ethernet Design Rules

10GE Media Types

EtherChannel

Comparison of Campus Media

LAN Hardware

Table of Contents

Repeaters

Hubs

Bridges

Switches

Routers

Layer 3 Switches

Campus LAN Design and Best Practices

Best Practices for Hierarchical Layers

Access Layer Best Practices

Distribution Layer Best Practices

Core Layer Best Practices

STP Design Considerations

Cisco STP Toolkit

PortFast

UplinkFast

BackboneFast

Loop Guard

Root Guard

BPDU Guard

BPDU Filter

VLAN and Trunk Considerations

Unidirectional Link Detection (UDLD) Protocol

Large-Building LANs

Enterprise Campus LANs

Edge Distribution

Medium-Size LANs

Small and Remote Site LANs

Server Farm Module

Server Connectivity Options

Enterprise Data Center Infrastructure

Campus LAN QoS Considerations

Multicast Traffic Considerations

CGMP

IGMP Snooping

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Table of Contents

Chapter 4 Data Center Design

Do I Know This Already? Quiz

Foundation Topics

Enterprise DC Architecture

Data Center Foundation Components

Data Center Topology Components

Data Center Network Programmability

SDN

Controllers

APIs

ACI

Challenges in the DC

Data Center Facility Aspects

Data Center Space

Data Center Power

Data Center Cooling

Data Center Heat

Data Center Cabling

Enterprise DC Infrastructure

Data Center Storage

Data Center Reference Architecture

Defining the DC Access Layer

Defining the DC Aggregation Layer

Defining the DC Core Layer

Security in the DC

Fabric Extenders

Virtualization Overview

Challenges

Defining Virtualization and Benefits

Virtualization Risks

Types of Virtualization

Virtualization Technologies

VSS

VRF

vPC

Device Contexts

Server Virtualization

Server Scaling

Table of Contents

Virtual Switching

Network Virtualization Design Considerations

Access Control

Path Isolation

Services Edge

Data Center Interconnect

DCI Use Cases

DCI Transport Options

DCI L2 Considerations

Load Balancing in the DC

Application Load Balancing

Network Load Balancing

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Chapter 5 Wireless LAN Design

Do I Know This Already? Quiz

Foundation Topics

Wireless LAN Technologies

WLAN Standards

ISM and UNII Frequencies

Summary of WLAN Standards

Service Set Identifier

WLAN Layer 2 Access Method

WLAN Security

Unauthorized Access

WLAN Security Design Approach

IEEE 802.1X-2001 Port-Based Authentication

Dynamic WEP Keys and LEAP

Controlling WLAN Access to Servers

Cisco Unified Wireless Network

Cisco UWN Architecture

Autonomous Access Points

Centralized WLAN Architecture

LWAPP

Table of Contents

CAPWAP

Cisco Unified Wireless Network Split-MAC Architecture

Local MAC

AP Modes

LAP Discovery of WLC Using CAPWAP

WLAN Authentication

Authentication Options

WLAN Controller Components

WLC Interface Types

AP Controller Equipment Scaling

Roaming and Mobility Groups

Intracontroller Roaming

Layer 2 Intercontroller Roaming

Layer 3 Intercontroller Roaming

Mobility Groups

WLAN Design

Controller Redundancy Design: Deterministic vs. Dynamic

N+1 WLC Redundancy

N+N WLC Redundancy

N+N+1 WLC Redundancy

Radio Management and Radio Groups

RF Groups

RF Site Survey

Using EoIP Tunnels for Guest Services

Wireless Mesh for Outdoor Wireless

Mesh Design Recommendations

Campus Design Considerations

Power over Ethernet (PoE)

Wireless and Quality of Service (QoS)

Branch Design Considerations

Local MAC

REAP

Hybrid REAP

Branch Office Controller Options

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Table of Contents

Chapter 6 WAN Technologies and the Enterprise Edge

Do I Know This Already? Quiz

Foundation Topics

WAN and Enterprise Edge Overview

 WAN Defined

 WAN Edge Module

 Enterprise Edge Modules

WAN Transport Technologies

 ISDN

 ISDN BRI Service

 ISDN PRI Service

 Digital Subscriber Line

 Cable

 Wireless

 Frame Relay

 Time-Division Multiplexing

 Metro Ethernet

 SONET/SDH

 Multiprotocol Label Switching (MPLS)

 Dark Fiber

 Dense Wavelength-Division Multiplexing

 Ordering WAN Technology and Contracts

WAN and Edge Design Methodologies

 Response Time

 Throughput

 Reliability

 Bandwidth Considerations

 WAN Link Categories

 Optimizing Bandwidth Using QoS

 Weighted Fair Queuing

 Class-Based Weighted Fair Queuing

 Low-Latency Queuing

 Traffic Shaping and Policing

 Link Efficiency

 Window Size

 Queuing, Traffic Shaping, and Policing

 Classification

 Congestion Management

 Priority Queuing

Table of Contents

Custom Queuing

DMZ Connectivity

Segmenting DMZs

DMZ Services

Internet Connectivity

Centralized Internet (Branch) vs. Direct Internet (Branch)

High Availability for the Internet Edge

VPN Network Design

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Chapter 7 WAN Design

Do I Know This Already? Quiz

Foundation Topics

Traditional WAN Technologies

Hub-and-Spoke Topology

Full-Mesh Topology

Partial-Mesh Topology

Point-to-Point Topology

Remote Site Connectivity

Enterprise VPN vs. Service Provider VPN

Enterprise Managed VPN: IPsec

IPsec Direct Encapsulation

Generic Routing Encapsulation

IPsec DMVPN

IPsec Virtual Tunnel Interface Design

GETVPN

Service Provider Managed Offerings

Metro Ethernet

Service Provider VPNs: L2 vs. L3

Virtual Private Wire Services

VPWS L2 VPN Considerations

Virtual Private LAN Services

VPLS L2 VPN Considerations

MPLS

Table of Contents

MPLS Layer 3 Design Overview

MPLS L3 VPN Considerations

VPN Benefits

WAN Backup Design

WAN Backup over the Internet

Enterprise WAN Architecture

Cisco Enterprise MAN/WAN

Enterprise WAN/MAN Architecture Comparison

Enterprise WAN Components

Comparing Hardware and Software

Enterprise Branch Architecture

Branch Design

Branch Connectivity

Redundancy for Branches

Single WAN Carrier vs. Dual WAN Carriers

Single MPLS Carrier Site

Dual MPLS Carriers

Hybrid WAN: L3 VPN with IPsec VPN

Internet for Branches

Flat Layer 2 vs. Collapsed Core

Enterprise Branch Profiles

Small Branch Design

Medium Branch Design

Large Branch Design

Enterprise Teleworker Design

ISRs for Teleworkers

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Part III: The Internet Protocol and Routing Protocols

Chapter 8 Internet Protocol Version 4 Design

Do I Know This Already? Quiz

Foundation Topics

IPv4 Header

Table of Contents

ToS

IPv4 Fragmentation

IPv4 Addressing

IPv4 Address Classes

Class A Addresses

Class B Addresses

Class C Addresses

Class D Addresses

Class E Addresses

IPv4 Address Types

IPv4 Private Addresses

NAT

IPv4 Address Subnets

Mask Nomenclature

IP Address Subnet Design Example

Determining the Network Portion of an IP Address

Variable-Length Subnet Masks

VLSM Address Assignment: Example 1

Loopback Addresses

IP Telephony Networks

VLSM Address Assignment: Example 2

IPv4 Addressing Design

Goal of IPv4 Address Design

Plan for Future Use of IPv4 Addresses

Performing Route Summarization

Plan for a Hierarchical IP Address Network

Private and Public IP Address and NAT Guidelines

Steps for Creating an IPv4 Address Plan

Case Study: IP Address Subnet Allocation

Address Assignment and Name Resolution

Recommended Practices of IP Address Assignment

BOOTP

DHCP

DNS

ARP

References and Recommended Readings

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Chapter 9 Internet Protocol Version 6 Design

Table of Contents

Do I Know This Already? Quiz

Foundation Topics

Introduction to IPv6

IPv6 Header

IPv6 Address Representation

- IPv4-Compatible IPv6 Addresses

- IPv6 Prefix Representation

IPv6 Address Scope Types and Address Allocations

- IPv6 Address Allocations

- IPv6 Unicast Address

 - Global Unicast Addresses

 - Link-Local Addresses

 - Unique Local IPv6 Address

 - Global Aggregatable IPv6 Address

 - IPv4-Compatible IPv6 Address

- IPv6 Anycast Addresses

- IPv6 Multicast Addresses

IPv6 Mechanisms

- ICMPv6

- IPv6 Neighbor Discovery Protocol

- IPv6 Name Resolution

- Path MTU Discovery

- IPv6 Address-Assignment Strategies

 - Manual Configuration

 - SLAAC of Link-Local Address

 - SLAAC of Globally Unique IPv6 Address

 - DHCPv6

 - DHCPv6 Lite

- IPv6 Security

IPv6 Routing Protocols

- RIPng

- EIGRP for IPv6

- OSPFv3

- IS-IS for IPv6

- BGP4 Multiprotocol Extensions (MP-BGP) for IPv6

IPv6 Addressing Design

- Planning for Addressing with IPv6

- Route Summarization with IPv6

Table of Contents

IPv6 Private Addressing

IPv6 for the Enterprise

IPv6 Address Allocation

Partly Linked IPv4 Address into IPv6

Whole IPv4 Address Linked into IPv6

IPv6 Addresses Allocated Per Location and/or Type

IPv4-to-IPv6 Transition Mechanisms and Deployment Models

Dual-Stack Mechanism

IPv6 over IPv4 Tunnels

Protocol Translation Mechanisms

IPv6 Deployment Models

Dual-Stack Model

Hybrid Model

Service Block Model

IPv6 Deployment Model Comparison

IPv6 Comparison with IPv4

Exam Preparation Tasks

Review All Key Topics

Complete Tables and Lists from Memory

Define Key Terms

Q&A

Chapter 10 Routing Protocol Characteristics, RIP, EIGRP, and IS-IS

Do I Know This Already? Quiz

Foundation Topics

Routing Protocol Characteristics

Static Versus Dynamic Route Assignment

Interior Versus Exterior Routing Protocols

Distance-Vector Routing Protocols

EIGRP

Link-State Routing Protocols

Distance-Vector Routing Protocols Versus Link-State Protocols

Hierarchical Versus Flat Routing Protocols

Classless Versus Classful Routing Protocols

IPv4 Versus IPv6 Routing Protocols

Administrative Distance

Routing Protocol Metrics and Loop Prevention

Hop Count

Table of Contents

Bandwidth

Cost

Load

Delay

Reliability

Maximum Transmission Unit

Routing Loop-Prevention Schemes

- Split Horizon

- Poison Reverse

- Counting to Infinity

Triggered Updates

Summarization

RIPv2 and RIPv6

Authentication

- MD5 Authentication

RIPv2 Routing Database

RIPv2 Message Format

RIPv2 Timers

RIPv2 Design

RIPv2 Summary

RIPv6

- RIPv6 Timers

- Authentication

- RIPv6 Message Format

- RIPv6 Design

- RIPv6 Summary

EIGRP

EIGRP Components

- Protocol-Dependent Modules

- Neighbor Discovery and Recovery

- RTP

- DUAL

EIGRP Timers

EIGRP Metrics

EIGRP Packet Types

EIGRP Design

- EIGRP Stub Routers

- EIGRP Variance Command

EIGRP for IPv4 Summary

EIGRP for IPv6 (EIGRPv6) Networks

Table of Contents

EIGRP for IPv6 Design

EIGRP for IPv6 Summary

IS-IS

IS-IS Metrics

IS-IS Operation and Design

IS-IS NET Addressing

IS-IS DRs

IS-IS Areas

IS-IS Authentication

IS-IS Summary

References and Recommended Readings

Q&A

Chapter 11 OSPF, BGP, Route Manipulation, and IP Multicast

Do I Know This Already? Quiz

Foundation Topics

OSPFv2

OSPFv2 Metric

OSPFv2 Adjacencies and Hello Timers

OSPFv2 Areas

OSPF Area Design Considerations

OSPF Router Types

OSPF DRs

LSA Types

Autonomous System External Path Types

OSPF Stub Area Types

Stub Areas

Totally Stubby Areas

NSSAs

Virtual Links

OSPFv2 Router Authentication

OSPFv2 Summary

OSPFv3

OSPFv3 Changes from OSPFv2

OSPFv3 Areas and Router Types

OSPFv3 LSAs

Table of Contents

OSPFv3 Summary

BGP

BGP Neighbors

eBGP

iBGP

Route Reflectors

Confederations

BGP Administrative Distance

BGP Attributes, Weight, and the BGP Decision Process

BGP Path Attributes

Next-Hop Attribute

Local Preference Attribute

Origin Attribute

Autonomous System Path Attribute

MED Attribute

Community Attribute

Atomic Aggregate and Aggregator Attributes

Weight

BGP Decision Process

BGP Summary

Route Manipulation

PBR

Route Summarization

Route Redistribution

Default Metric

OSPF Redistribution

Route Filtering

Transit Traffic

Routing Protocols on the Hierarchical Network Infrastructure

IP Multicast Review

Multicast Addresses

Layer 3 to Layer 2 Mapping

IGMP

IGMPv1

IGMPv2

IGMPv3

CGMP

IGMP Snooping

Sparse Versus Dense Multicast

Multicast Source and Shared Trees

PIM

PIM-SM

Table of Contents

PIM DR

Q&A

Part IV: Security, Convergence, Network Management

Chapter 12 Managing Security

Do I Know This Already? Quiz

Foundation Topics

Network Security Overview

Security Legislation

Security Threats

Reconnaissance and Port Scanning

Vulnerability Scanners

Unauthorized Access

Security Risks

Targets

Loss of Availability

Integrity Violations and Confidentiality Breaches

Security Policy and Process

Security Policy Defined

Basic Approach of a Security Policy

Purpose of Security Policies

Security Policy Components

Risk Assessment

Risk Index

Continuous Security

Integrating Security Mechanisms into Network Design

Trust and Identity Management

Trust

Domains of Trust

Identity

Table of Contents

Passwords

Tokens

Certificates

Network Access Control

Secure Services

Encryption Fundamentals

Encryption Keys

Q&A

Chapter 13 Security Solutions

Do I Know This Already? Quiz

Foundation Topics

Cisco SAFE Architecture

Network Security Platforms

Cisco Security Control Framework

Trust and Identity Technologies

Firewall Fundamentals

Types of Firewalls

Next-Gen Firewalls

NAT Placement

Firewall Guidelines

Firewall ACLs

Cisco Identity-Based Network Services

Identity and Access Control Deployments

Detecting and Mitigating Threats

IPS/IDS Fundamentals

Table of Contents

IPS/IDS Guidelines

Threat Detection and Mitigation Technologies

Threat-Detection and Threat-Mitigation Solutions

FirePOWER IPS

Cisco ESA

Cisco WSA

Security Management Applications

Security Platform Solutions

Security Management Network

Integrating Security into Network Devices

IOS Security

ISR G2 Security Hardware Options

Cisco Security Appliances

Catalyst 6500 Service Modules

Endpoint Security

Securing the Enterprise

Implementing Security in the Campus

Implementing Security in the Data Center

Chapter 14 Voice and Video Design

Do I Know This Already? Quiz

Foundation Topics

Traditional Voice Architectures

PBX and PSTN Switches

Local Loop and Trunks

Ports

Major Analog and Digital Signaling Types

Loop-Start Signaling

Ground-Start Signaling

E&M Signaling

CAS and CCS Signaling

Table of Contents

PSTN Numbering Plan

Other PSTN Services

- Centrex Services
- Voice Mail
- Database Services
- IVR
- ACD

Voice Engineering Terminology

- Grade of Service
- Erlangs
- Centum Call Second
- Busy Hour
- Busy-Hour Traffic
- Blocking Probability
- Call Detail Records

Converged Multiservice Networks

VoIP

IPT Components

- Design Goals of IP Telephony

IPT Deployment Models

- Single-Site Deployment
- Multisite WAN with Centralized Call Processing Model
- Multisite WAN with Distributed Call Processing Model
- Unified CallManager Express Deployments

Video Deployment Considerations

Codecs

- Analog-to-Digital Signal Conversion
- Codec Standards

VoIP Control and Transport Protocols

- DHCP, DNS, and TFTP
- SCCP
- RTP and RTCP
- MGCP
- H.323
- H.264
- SIP

IPT Design

Bandwidth

- VAD

Calculating Voice Bandwidth
