About the Author

Chapter 1 Introduction to Business Analytics and
Decision-Making

Data and Business Analytics

An Overview of the Human Decision-Making Process

Simons Theory of Decision-Making

An Overview of Business Analytics

Why the Sudden Popularity of Analytics?

What Are the Application Areas of Analytics?

What Are the Main Challenges of Analytics?

A Longitudinal View of Analytics

Table of Contents

A Simple Taxonomy for Analytics

Analytics Success Story: UPSs ORION Project

- Background

- Development of ORION

- Results

- Summary

Analytics Success Story: Man Versus Machine

- Checkers

- Chess

- Jeopardy!

- Go

- IBM Watson Explained

Conclusion

References

Chapter 2 Optimization and Optimal Decision-Making

Common Problem Types for LP Solution

Types of Optimization Models

- Linear Programming

- Integer and Mixed-Integer Programming

- Nonlinear Programming

- Stochastic Programming

Linear Programming for Optimization

- LP Assumptions

- Components of an LP Model

- Process of Developing an LP Model

- Hands-On Example: Product Mix Problem

- Formulating and Solving the Same Product-Mix Problem in

Table of Contents

Microsoft Excel

Sensitivity Analysis in LP

Transportation Problem

Hands-On Example: Transportation Cost Minimization Problem

Network Models

Hands-On Example: The Shortest Path Problem

Optimization Modeling Terminology

Heuristic Optimization with Genetic Algorithms

Terminology of Genetic Algorithms

How Do Genetic Algorithms Work?

Limitations of Genetic Algorithms

Genetic Algorithm Applications

Conclusion

References

Chapter 3 Simulation Modeling for

Decision-Making

Simulation Is Based on a Model of the System

What Is a Good Simulation Application?

Applications of Simulation Modeling

Simulation Development Process

Conceptual Design

Input Analysis

Model Development, Verification, and Validation

Output Analysis and Experimentation

Different Types of Simulation

Simulation May Be Dynamic (Time-Dependent) or Static
(Time-Independent)

Simulations May Be Stochastic or Deterministic

Table of Contents

Simulations May Be Discrete and Continuous

Monte Carlo Simulation

Simulating Two-Dice Rolls

Process of Developing a Monte Carlo Simulation

Illustrative ExampleA Business Planning Scenario

Advantages of Using Monte Carlo Simulation

Disadvantages of Monte Carlo Simulation

Discrete Event Simulation

DES Modeling of a Simple System

How Does DES Work?

DES Terminology

System Dynamics

Other Varieties of Simulation Models

Lookahead Simulation

Visual Interactive Simulation Modeling

Agent-Based Simulation

Advantages of Simulation Modeling

Disadvantages of Simulation Modeling

Simulation Software

Conclusion

References

Chapter 4 Multi-Criteria Decision-Making

Types of Decisions

A Taxonomy of MCDM Methods

Weighted Sum Model

Hands-On Example: Which Location Is the Best for Our Next
Retail Store?

Analytic Hierarchy Process

Table of Contents

How to Perform AHP: The Process of AHP

AHP for Group Decision-Making

Hands-On Example: Buying a New Car/SUV

Analytics Network Process

How to Conduct ANP: The Process of Performing ANP

Other MCDM Methods

TOPSIS

ELECTRE

PROMETHEE

MACBETH

Fuzzy Logic for Imprecise Reasoning

Illustrative Example: Fuzzy Set for a Tall Person

Conclusion

References

Chapter 5 Decisioning Systems

Artificial Intelligence and Expert Systems for Decision-Making

An Overview of Expert Systems

Experts

Expertise

Common Characteristics of ES

Applications of Expert Systems

Classical Applications of ES

Newer Applications of ES

Structure of an Expert System

Knowledge Base

Inference Engine

User Interface

Blackboard (Workplace)

Table of Contents

Explanation Subsystem (Justifier)

Knowledge-Refining System

Knowledge Engineering Process

1. Knowledge Acquisition
2. Knowledge Verification and Validation
3. Knowledge Representation
4. Inferencing
5. Explanation and Justification

Benefits and Limitations of ES

Benefits of Using ES

Limitations and Shortcomings of ES

Critical Success Factors for ES

Case-Based Reasoning

The Basic Idea of CBR

The Concept of a Case in CBR

The Process of CBR

Example: Loan Evaluation Using CBR

Benefits and Usability of CBR

Issues and Applications of CBR

Conclusion

References

Chapter 6 The Future of Business Analytics

Big Data Analytics

Where Does the Big Data Come From?

The Vs That Define Big Data

Fundamental Concepts of Big Data

Big Data Technologies

Data Scientist

Table of Contents

Big Data and Stream Analytics

Deep Learning

An Introduction to Deep Learning

Deep Neural Networks

Convolutional Neural Networks

Recurrent Networks and Long Short-Term Memory Networks

Computer Frameworks for Implementation of Deep Learning

Cognitive Computing

How Does Cognitive Computing Work?

How Does Cognitive Computing Differ from AI?

Conclusion

References
