

Excel® 2016

# PIVOT TABLE DATA CRUNCHING

Bill Jelen  
Michael Alexander

Excel® 2016

# PIVOT TABLE DATA CRUNCHING

This book is part of Que's exciting new Content Update Program, which provides automatic content updates for major technology improvements!

- ▶ As Microsoft makes significant updates to Excel 2016, sections of this book will be updated or new sections will be added to match the updates to the software.
- ▶ The updates will be delivered to you via a free Web Edition of this book, which can be accessed with any Internet connection.
- ▶ This means your purchase is protected from immediately outdated information!

For more information on Que's Content Update program, see the inside back cover or go to

[www.quepublishing.com/CUP](http://www.quepublishing.com/CUP).

# Excel 2016 Pivot Table Data Crunching

## Table of Contents

### Contents

#### Introduction

What You Will Learn from This Book

What Is New in Excel 2016s Pivot Tables

Skills Required to Use This Book

Invention of the Pivot Table

Sample Files Used in This Book

Conventions Used in This Book

Referring to Versions

Referring to Ribbon Commands

Special Elements

#### 1 Pivot Table Fundamentals

Defining a Pivot Table

Why You Should Use a Pivot Table

Advantages of Using a Pivot Table

When to Use a Pivot Table

Anatomy of a Pivot Table

Values Area

Rows Area

Columns Area

Filters Area

Pivot Tables Behind the Scenes

Pivot Table Backward Compatibility

# Table of Contents

A Word About Compatibility

Next Steps

## 2 Creating a Basic Pivot Table

Preparing Data for Pivot Table Reporting

Ensuring That Data Is in a Tabular Layout

Avoiding Storing Data in Section Headings

Avoiding Repeating Groups as Columns

Eliminating Gaps and Blank Cells in the Data Source

Applying Appropriate Type Formatting to Fields

Summary of Good Data Source Design

How to Create a Basic Pivot Table

Adding Fields to a Report

Fundamentals of Laying Out a Pivot Table Report

Adding Layers to a Pivot Table

Rearranging a Pivot Table

Creating a Report Filter

Understanding the Recommended Pivot Table Feature

Using Slicers

Creating a Standard Slicer

Creating a Timeline Slicer

Keeping Up with Changes in the Data Source

Dealing with Changes Made to the Existing Data Source

Dealing with an Expanded Data Source Range Due to the Addition of Rows  
or Columns

Sharing the Pivot Cache

Saving Time with New Pivot Table Tools

Deferring Layout Updates

Starting Over with One Click

Relocating a Pivot Table

# Table of Contents

Next Steps

## 3 Customizing a Pivot Table

### Making Common Cosmetic Changes

Applying a Table Style to Restore Gridlines

Changing the Number Format to Add Thousands Separators

Replacing Blanks with Zeros

Changing a Field Name

### Making Report Layout Changes

Using the Compact Layout

Using the Outline Layout

Using the Traditional Tabular Layout

Controlling Blank Lines, Grand Totals, and Other Settings

### Customizing a Pivot Tables Appearance with Styles and Themes

Customizing a Style

Modifying Styles with Document Themes

### Changing Summary Calculations

Understanding Why One Blank Cell Causes a Count

Using Functions Other Than Count or Sum

### Adding and Removing Subtotals

Suppressing Subtotals with Many Row Fields

Adding Multiple Subtotals for One Field

### Changing the Calculation in a Value Field

Showing Percentage of Total

Using % Of to Compare One Line to Another Line

Showing Rank

Tracking Running Total and Percentage of Running Total

Displaying a Change from a Previous Field

Tracking the Percentage of a Parent Item

Tracking Relative Importance with the Index Option

# Table of Contents

Next Steps

## 4 Grouping, Sorting, and Filtering Pivot Data

### Automatically Grouping Dates

Undoing Automatic Grouping

Understanding How Excel 2016 Decides What to Group

Grouping Date Fields Manually

Including Years When Grouping by Months

Grouping Date Fields by Week

Grouping Numeric Fields

### Using the PivotTable Fields List

Docking and Undocking the PivotTable Fields List

Rearranging the PivotTable Fields List

Using the Areas Section Drop-Downs

### Sorting in a Pivot Table

Sorting Customers into High-to-Low Sequence Based on Revenue

Using a Manual Sort Sequence

Using a Custom List for Sorting

### Filtering a Pivot Table: An Overview

#### Using Filters for Row and Column Fields

Filtering Using the Check Boxes

Filtering Using the Search Box

Filtering Using the Label Filters Option

Filtering a Label Column Using Information in a Values Column

Creating a Top-Five Report Using the Top 10 Filter

Filtering Using the Date Filters in the Label Drop-down

#### Filtering Using the Filters Area

Adding Fields to the Filters Area

Choosing One Item from a Filter

Choosing Multiple Items from a Filter

# Table of Contents

Replicating a Pivot Table Report for Each Item in a Filter

Filtering Using Slicers and Timelines

Using Timelines to Filter by Date

Driving Multiple Pivot Tables from One Set of Slicers

Next Steps

## 5 Performing Calculations in Pivot Tables

Introducing Calculated Fields and Calculated Items

Method 1: Manually Add a Calculated Field to the Data Source

Method 2: Use a Formula Outside a Pivot Table to Create a Calculated Field

Method 3: Insert a Calculated Field Directly into a Pivot Table

Creating a Calculated Field

Creating a Calculated Item

Understanding the Rules and Shortcomings of Pivot Table

Calculations

Remembering the Order of Operator Precedence

Using Cell References and Named Ranges

Using Worksheet Functions

Using Constants

Referencing Totals

Rules Specific to Calculated Fields

Rules Specific to Calculated Items

Managing and Maintaining Pivot Table Calculations

Editing and Deleting Pivot Table Calculations

Changing the Solve Order of Calculated Items

Documenting Formulas

Next Steps

## 6 Using Pivot Charts and Other Visualizations

# Table of Contents

What Is a Pivot Chart Really?

Creating a Pivot Chart

Understanding Pivot Field Buttons

Keeping Pivot Chart Rules in Mind

Changes in the Underlying Pivot Table Affect a Pivot Chart

Placement of Data Fields in a Pivot Table Might Not Be Best Suited for a Pivot Chart

A Few Formatting Limitations Still Exist in Excel 2016

Examining Alternatives to Using Pivot Charts

Method 1: Turn the Pivot Table into Hard Values

Method 2: Delete the Underlying Pivot Table

Method 3: Distribute a Picture of the Pivot Chart

Method 4: Use Cells Linked Back to the Pivot Table as the Source Data  
for the Chart

Using Conditional Formatting with Pivot Tables

An Example of Using Conditional Formatting

Preprogrammed Scenarios for Condition Levels

Creating Custom Conditional Formatting Rules

Next Steps

## 7 Analyzing Disparate Data Sources with Pivot Tables

Using the Internal Data Model

Building Out Your First Data Model

Managing Relationships in the Data Model

Adding a New Table to the Data Model

Removing a Table from the Data Model

Creating a New Pivot Table Using the Data Model

Limitations of the Internal Data Model

Building a Pivot Table Using External Data Sources

Building a Pivot Table with Microsoft Access Data

Building a Pivot Table with SQL Server Data

# Table of Contents

## Leveraging Power Query to Extract and Transform Data

- Power Query Basics

- Understanding Query Steps

- Refreshing Power Query Data

- Managing Existing Queries

- Understanding Column-Level Actions

- Understanding Table Actions

- Power Query Connection Types

Next Steps

## 8 Sharing Pivot Tables with Others

- Designing a Workbook as an Interactive Web Page

- Sharing a Link to a Web Workbook

- Sharing with Power BI

  - Preparing Data for Power BI

  - Importing Data to Power BI

  - Building a Report in Power BI

  - Using Q&A to Query Data

  - Sharing Your Dashboard

Next Steps

## 9 Working with and Analyzing OLAP Data

- Introduction to OLAP

- Connecting to an OLAP Cube

- Understanding the Structure of an OLAP Cube

- Understanding the Limitations of OLAP Pivot Tables

- Creating an Offline Cube

- Breaking Out of the Pivot Table Mold with Cube Functions

  - Exploring Cube Functions

- Adding Calculations to OLAP Pivot Tables

# Table of Contents

- Creating Calculated Measures
- Creating Calculated Members
- Managing OLAP Calculations
- Performing What-If Analysis with OLAP Data

Next Steps

## 10 Mashing Up Data with Power Pivot

Understanding the Benefits and Drawbacks of Power Pivot and the Data Model

- Merging Data from Multiple Tables Without Using VLOOKUP
- Importing 100 Million Rows into a Workbook
- Creating Better Calculations Using the DAX Formula Language
- Other Benefits of the Power Pivot Data Model in All Editions of Excel
- Benefits of the Full Power Pivot Add-in with Excel Pro Plus
- Understanding the Limitations of the Data Model

Joining Multiple Tables Using the Data Model in Regular Excel 2016

- Preparing Data for Use in the Data Model
- Adding the First Table to the Data Model
- Adding the Second Table and Defining a Relationship
- Tell Me Again Why Is This Better Than Doing a VLOOKUP?
- Creating a New Pivot Table from an Existing Data Model
- Getting a Distinct Count

Using the Power Pivot Add-in Excel 2016 Pro Plus

- Enabling Power Pivot
- Importing a Text File Using Power Query
- Adding Excel Data by Linking
- Defining Relationships
- Adding Calculated Columns Using DAX
- Building a Pivot Table

Understanding Differences Between Power Pivot and Regular Pivot

# Table of Contents

## Tables

### Using DAX Calculations

Using DAX Calculations for Calculated Columns

Using DAX to Create a Calculated Field in a Pivot Table

Filtering with DAX Calculated Fields

Defining a DAX Calculated Field

Using Time Intelligence

### Next Steps

## 11 Dashboarding with Power View and 3D Map

### Preparing Data for Power View

#### Creating a Power View Dashboard

Every New Dashboard Element Starts as a Table

Subtlety Should Be Power Views Middle Name

Converting a Table to a Chart

Adding Drill-down to a Chart

Beginning a New Element by Dragging a Field to a Blank Spot on the Canvas

Filtering One Chart with Another One

Adding a Real Slicer

Understanding the Filters Pane

Using Tile Boxes to Filter a Chart or a Group of Charts

#### Replicating Charts Using Multiples

#### Showing Data on a Map

#### Using Images

#### Changing a Calculation

#### Animating a Scatter Chart over Time

#### Some Closing Tips on Power View

#### Analyzing Geographic Data with 3D Map

# Table of Contents

- Preparing Data for 3D Map
- Geocoding Data
- Building a Column Chart in 3D Map
- Navigating Through the Map
- Labeling Individual Points
- Building Pie or Bubble Charts on a Map
- Using Heat Maps and Region Maps
- Exploring 3D Map Settings
- Fine-Tuning 3D Map
- Animating Data over Time
- Building a Tour
- Creating a Video from 3D Map

Next Steps

## 12 Enhancing Pivot Table Reports with Macros

- Why Use Macros with Pivot Table Reports
- Recording a Macro
- Creating a User Interface with Form Controls
- Altering a Recorded Macro to Add Functionality
  - Inserting a Scrollbar Form Control

Next Steps

## 13 Using VBA to Create Pivot Tables

- Enabling VBA in Your Copy of Excel
- Using a File Format That Enables Macros
- Visual Basic Editor
- Visual Basic Tools
- The Macro Recorder
- Understanding Object-Oriented Code
- Learning Tricks of the Trade

# Table of Contents

Writing Code to Handle a Data Range of Any Size

Using Super-Variables: Object Variables

Using With and End With to Shorten Code

## Understanding Versions

### Building a Pivot Table in Excel VBA

Adding Fields to the Data Area

Formatting the Pivot Table

### Dealing with Limitations of Pivot Tables

Filling Blank Cells in the Data Area

Filling Blank Cells in the Row Area

Preventing Errors from Inserting or Deleting Cells

Controlling Totals

Converting a Pivot Table to Values

### Pivot Table 201: Creating a Report Showing Revenue by Category

Ensuring That Tabular Layout Is Utilized

Rolling Daily Dates Up to Years

Eliminating Blank Cells

Controlling the Sort Order with AutoSort

Changing the Default Number Format

Suppressing Subtotals for Multiple Row Fields

Handling Final Formatting

Adding Subtotals to Get Page Breaks

Putting It All Together

### Calculating with a Pivot Table

Addressing Issues with Two or More Data Fields

Using Calculations Other Than Sum

Using Calculated Data Fields

Using Calculated Items

Calculating Groups

# Table of Contents

Using Show Values As to Perform Other Calculations

## Using Advanced Pivot Table Techniques

Using AutoShow to Produce Executive Overviews

Using ShowDetail to Filter a Recordset

Creating Reports for Each Region or Model

Manually Filtering Two or More Items in a Pivot Field

Using the Conceptual Filters

Using the Search Filter

Setting Up Slicers to Filter a Pivot Table

## Using the Data Model in Excel 2016

Adding Both Tables to the Data Model

Creating a Relationship Between the Two Tables

Defining the Pivot Cache and Building the Pivot Table

Adding Model Fields to the Pivot Table

Adding Numeric Fields to the Values Area

Putting It All Together

## Next Steps

## 14 Advanced Pivot Table Tips and Techniques

Tip 1: Force Pivot Tables to Refresh Automatically

Tip 2: Refresh All Pivot Tables in a Workbook at the Same Time

Tip 3: Sort Data Items in a Unique Order, Not Ascending or  
Descending

Tip 4: Turn Pivot Tables into Hard Data

Tip 5: Fill the Empty Cells Left by Row Fields

Option 1: Implement the Repeat All Data Items Feature

Option 2: Use Excel's Go To Special Functionality

Tip 6: Add a Rank Number Field to a Pivot Table

Tip 7: Reduce the Size of Pivot Table Reports

# Table of Contents

Delete the Source Data Worksheet

Tip 8: Create an Automatically Expanding Data Range

Tip 9: Compare Tables Using a Pivot Table

Tip 10: AutoFilter a Pivot Table

Tip 11: Force Two Number Formats in a Pivot Table

Tip 12: Create a Frequency Distribution with a Pivot Table

Tip 13: Use a Pivot Table to Explode a Data Set to Different Tabs

Tip 14: Apply Restrictions on Pivot Tables and Pivot Fields

Pivot Table Restrictions

Pivot Field Restrictions

Tip 15: Use a Pivot Table to Explode a Data Set to Different Workbooks

Next Steps

## 15 Dr Jekyll and Mr GetPivotData

Avoiding the Evil GetPivotData Problem

Preventing GetPivotData by Typing the Formula

Simply Turning Off GetPivotData

Speculating on Why Microsoft Forced GetPivotData on Us

Using GetPivotData to Solve Pivot Table Annoyances

Building an Ugly Pivot Table

Building the Shell Report

Using GetPivotData to Populate the Shell Report

Updating the Report in Future Months

Conclusion

Index
