# Players Making Decisions: Game Design Essentials and the Art of Understanding Your Players

## Table of Contents

Contents

Preface

Who Is This Book For?

How Is This Book Organized?

**PART 1 Getting Started**

**1 What Is a Game Designer**

Responsibilities of a Game Designer

Attributes of a Game Designer

Make Things

Cultivate Your Gardens

On Ontology and Dogma

Formalism

Summary

**2 Problem Statements**

Defining the Problem

Low-Hanging Fruit

Functional Fixedness

Brainstorming

Summary

**3 Development Structures**

Production Methodologies

Scope

# Table of Contents

Summary

## 4 Starting Practices

Analog Games

Theme and Mechanics

Next Steps

Designing for Others

Opening Questions

Summary

## PART 2 Prototypes and Playtesting

### 5 Paper Prototyping Development Techniques

Software and Materials

Art

Cards

InDesign Data Merge

Summary

### 6 Playtesting

Playtesting Goals

Playtesting Benefits

Listening to Feedback

Finding Playtesters

Iterating

Summary

### 7 Playtesting Methods

The Testing Environment

Keep Playtesters Talking

A/B Testing

Self-Playtesting

Summary

### 8 Prototypes and Intellectual Property

# Table of Contents

Do I Need an NDA?

Ideas and Value

Summary

## **PART 3 Meaningful Decisions**

### **9 Flow and the Fundamental Game Design Directive**

Game Flow

Interest Curves

Learning Curves

Individual Differences

Summary

### **10 Decision-Making**

Player Agency

Anatomy of a Choice

Less-Interesting Decision-Making

More-Interesting Decision-Making

Summary

### **11 Randomness**

Completely Random Games

Completely Skill-Based Games

Fairness and Mitigating Randomness

Summary

### **12 Goals**

How Players Determine Game Goals

Criteria for Goals

Solving Goal Problems

Summary

## **PART 4 Describing Game Elements**

### **13 Mechanics, Dynamics, and Aesthetics (MDA)**

What Are Games About

# **Table of Contents**

MDA

More Dynamics

Summary

## **14 Milieu**

What Is Milieu

Polish

Player Types

Motivation

Milieu as Design Focus

Summary

## **15 Rules and Verbs**

Rules

Qualities of Rules

Types of Rules

Verbs

Summary

## **16 Balance**

Symmetry

Self-Balancing Mechanisms

Progression and Numeric Relationships

Balance Heuristics

Summary

## **17 Feedback Loops**

Positive Feedback Loops

Negative Feedback Loops

Feedback Loops in Action

Fixing Problems

Summary

## **18 Puzzle Design**

# Table of Contents

- What Is a Puzzle
- Possibility Space
- Breadcrumbs
- Features of Ineffective Puzzles
- Types of Puzzles
- Other Puzzle Types
- Summary

## **PART 5 Game Theory and Rational Decision-Making**

### **19 Equilibria in Normal Form Games**

- The Prisoners Dilemma
- Solving Games Using Strict Dominance
- Using (and Abusing) Dominance
- Zero-Sum Games
- Stag Hunt and Coordination
- Determining Nash Equilibria in a Larger Matrix
- Mixed Strategies
- Stag Hunt Redux
- Summary

### **20 Sequential and Iterated Games**

- Game Trees
- Promises and Commitment Problems
- Iterated Games
- Experimenting with Strategies
- Successful Strategies
- Summary

### **21 Problems with Game Theory**

- Rational Actors
- The Dollar Auction
- The Guess Two-Thirds Game

# Table of Contents

Second-Price Auctions

Summary

## 22 Marginal Decision Analysis

Marginal Nuggets

Balance on Margins

Summary

## PART 6 Human Behavior in Games

### 23 Behaviorism and Schedules of Reinforcement

Operant Conditioning

Schedules of Reinforcement

Anticipation and Uncertainty

Ethical and Practical Concerns

Summary

### 24 Learning and Constructivism

Historic Approaches

Novices and Experts

Cognitive Load

Expertise Reversal Effect

Split-Attention Effect

Tutorials and Learning Design

Summary

### 25 Motivation

Two Types of Motivation

Whats the Problem with Rewards

Self-Determination Theory and Challenges

Competition and Motivation

Personality

Other Motivation Effects

Summary

# **Table of Contents**

## **26 Human Decision-Making**

- Mental Shortcuts
- Attribution Errors
- Misunderstanding Randomness
- Anchoring and Adjustment
- Understanding Value in Uncertain Situations
- Loss
- Framing Decisions
- Summary

## **27 Attention and Memory**

- Attention
- Memory
- Helping with Memory Limitations
- Perception
- Summary

## **PART 7 Game Design Tools**

### **28 Documentation and Written Communication**

- The Game Design Document
- The GDD Creation Process
- References
- Documentation for Tabletop Games
- States and Flowcharts
- Summary

### **29 Probability**

- Probability Is Fancy Counting
- Adding Die Rolls
- Example: The H/T Game
- Being Careful
- Summary

# **Table of Contents**

## **30 Spreadsheets for Simulation**

Why Use Spreadsheets

Basics

Formulas

Goal Seek and Solver in Excel

One-Way Data Tables

Summary

## **31 Monte Carlo Simulation**

Answering Design Questions

Hot Hand

Monty Hall

Once Around the Board

Martingale Betting

Summary

## **32 Presenting Ideas**

The Thesis

Text on Slides

Data-Ink

Do Not Waste Time

Documentation

Acquiring Images

Example: State of Mobile Games 2014

Risk

Risk Analysis

Pitch Questions

Summary

## **PART 8 The Game Design Business**

### **33 Profit, Loss, and Metrics**

Profit and Loss

# **Table of Contents**

Metrics

Virality

Cash Flow

Summary

## **34 Sustainable Lifestyles**

Life in AAA Digital Game Development

Life as an Independent Developer of Digital Games

Life in Tabletop Game Development

Market Luck

Summary

Conclusion

Ludography

Index
