

LEARNING Swift 2 PROGRAMMING

Learning Swift 2 Programming

Second Edition

Learning Swift 2 Programming

Table of Contents

Cover

Table of Contents

Introduction

1 Getting Your Feet Wet: Variables, Constants, and Loops

Building Blocks of Swift

Computed Properties (Getters and Setters)

Using Comments

Inference

Merging Variables into a String

Optionals: A Gift to Unwrap

Printing Your Results

Implicitly Unwrapped Optionals

Tuples

Number Types

From Objective-C to Swift

Control Flow: Making Choices

Switching It Up: switch Statements

Stop...Hammer Time

Summary

2 Collecting Your Data: Arrays and Dictionaries

Using Arrays

Your First Array the Long Way

A Quicker Array

Using AnyObject

Differences Between NSArrays and Swift Arrays

Modifying Arrays

Accessing Array Elements

Adding Elements to an Array

Removing Elements from Arrays

Iterating Over Arrays

Extra Bits of Arrays

Emptying an Array

Using Dictionaries

Adding, Removing, and Inserting with Dictionaries

Iterating Over Dictionaries

Extra Bits of Dictionaries

Emptying a Dictionary

Testing Dictionaries for the Presence of Values

Putting It All Together

Summary

3 Making Things Happen: Functions

Defining Functions

Return Types

Multiple Return Values

More on Parameters

External Parameter Names

Default Parameter Values

Variadic Parameters

In-Out Parameters

Functions as Types

Putting It All Together

Summary

4 Structuring Code: Enums, Structs, and Classes

Enums

Which Member Was Set?

Associated Values

Raw Values

Structs

Defining Methods in Structs

Structs Are Always Copied

Mutating Methods

Classes

Initialization

What Is a Reference Type?

Do I Use a Struct or a Class?

Forgot Your Pointer Syntax?

Property Observers

Methods in Classes

Summary

5 SpriteKit

Introducing SpriteKit

The SKNode and SKSpriteNode

Creating a Game

The New Project Screen

The Game

Summary

6 Reusable Code: Closures

What Are Closures?

Closures in Other Languages

How Closures Work and Why Theyre Awesome

The Closure Syntax

Inferring Using Context

Arguments Have a Shorthand, Too

Sorting a Custom Car Class

Closures Are Reference Types

Automatic Reference Counting

Strong Reference Cycles

Trailing Closures

Summary

7 Creating Your Own Syntax: Subscripts and Advanced Operators

Writing Your First Subscript

Bits and Bytes with Advanced Operators

Bitwise NOT

Bitwise AND

Bitwise OR

Bitwise XOR

Shifting Bits

UInt8, UInt16, UInt32, Int8, Int16, Int32, and So On

Value Overflow and Underflow

Customizing Operators

Making Your Own Operators

Bits and Bytes in Real Life

Summary

8 Protocols

Writing Your First Protocol

Properties

Animizable and Humanizable

Methods

Delegation

Protocols as Types

Protocols in Collections

Protocol Inheritance

Protocol Composition

Protocol Conformity

Optional Protocol Prerequisites

Optional Chaining

Back to Optional Protocol Requisites

Useful Built-in Swift Protocols

Summary

9 Becoming Flexible with Generics

The Problem That Generics Solve

Other Uses for Generics

Generics for Protocols

The where Clause

Summary

10 Games with SpriteKit

The Game

The Setup

Tour the Code

The Game

Step 1: Create the World

Step 2: Making Things Move

Summary

11 Making Games with Physics

Making a Physics-Based Game

Creating the Project

Adding the Assets

Adding the Levels

Generating the Levels

Making a Playable Game

Creating the Cage

Summary

12 Making Apps with UIKit

Application Types

Single-View Applications

Creating the User Interface

Adding Constraints

Hooking Up the UI to Code

Writing the Code

The TableView

Summary

Index
