Table of Contents

Introduction

- Learning Front-End Web Development

- Prerequisites

- How This Book Is Organized

- How to Use This Book

- Challenges

- For the More Curious

Part I. Core Browser Programming

- Chapter 1 Setting Up Your Development Environment

  - Installing Google Chrome

  - Installing and Configuring Atom

    - Atom plug-ins

  - Documentation and Reference Sources

  - Crash Course in the Command Line

    - Finding out what directory you are in

    - Creating a directory

    - Changing directories

    - Listing files in a directory

    - Getting administrator privileges

    - Quitting a program

  - Installing Node.js and browser-sync

  - For the More Curious: Alternatives to Atom

- Chapter 2 Setting Up Your First Project

# Table of Contents

## Setting Up Ottergram

- Initial HTML
- Linking a stylesheet
- Adding content
- Adding images

## Viewing the Web Page in the Browser

## The Chrome Developer Tools

## For the More Curious: CSS Versions

## For the More Curious: The favicon.ico

## Silver Challenge: Adding a favicon.ico

## Chapter 3 Styles

### Creating a Styling Baseline

### Preparing the HTML for Styling

### Anatomy of a Style

### Your First Styling Rule

- The box model

### Style Inheritance

### Making Images Fit the Window

### Color

### Adjusting the Space Between Items

- Relationship selectors

### Adding a Font

### Bronze Challenge: Color Change

### For the More Curious: Specificity! When Selectors Collide

## Chapter 4 Responsive Layouts with Flexbox

### Expanding the Interface

- Adding the detail image
- Horizontal layout for thumbnails

### Flexbox

- Creating a flex container
- Changing the flex-direction
- Grouping elements within a flex item
- The flex shorthand property
- Ordering, justifying, and aligning flex items
- Centering the detail image

# Table of Contents

Absolute and Relative Positioning

## Chapter 5 Adaptive Layouts with Media Queries

Resetting the Viewport

Adding a Media Query

Bronze Challenge: Portrait

For the More Curious: Common Solutions (and Bugs) with Flexbox Layouts

Gold Challenge: Holy Grail Layout

## Chapter 6 Handling Events with JavaScript

Preparing the Anchor Tags for Duty

Your First Script

Overview of the JavaScript for Ottergram

Declaring String Variables

Working in the Console

Accessing DOM Elements

Writing the setDetails Function

Accepting arguments by declaring parameters

Returning Values from Functions

Adding an Event Listener

Accessing All the Thumbnails

Iterating Through the Array of Thumbnails

Silver Challenge: Link Hijack

Gold Challenge: Random Otters

For the More Curious: Strict Mode

For the More Curious: Closures

For the More Curious: NodeLists and HTMLCollections

For the More Curious: JavaScript Types

## Chapter 7 Visual Effects with CSS

Hiding and Showing the Detail Image

Creating styles to hide the detail image

Writing the JavaScript to hide the detail image

Listening for the keypress event

Showing the detail image again

State Changes with CSS Transitions

# Table of Contents

Working with the transform property

Adding a CSS transition

Using a timing function

Transition on class change

Triggering transitions with JavaScript

Custom Timing Functions

For the More Curious: Rules for Type Coercion

## Part II. Modules, Objects, and Forms

### Chapter 8 Modules, Objects, and Methods

Modules

The module pattern

Modifying an object with an IIFE

Setting Up CoffeeRun

Creating the DataStore Module

Adding Modules to a Namespace

Constructors

A constructors prototype

Adding methods to the constructor

Creating the Truck Module

Adding orders

Removing orders

Debugging

Locating bugs with the DevTools

Setting the value of this with bind

Initializing CoffeeRun on Page Load

Creating the Truck instance

Bronze Challenge: Truck ID for Non-Trekkies

For the More Curious: Private Module Data

Silver Challenge: Making data Private

For the More Curious: Setting this in forEachs Callback

### Chapter 9 Introduction to Bootstrap

Adding Bootstrap

How Bootstrap works

Creating the Order Form

Adding text input fields

# Table of Contents

- Linking a label and a form element
- Adding autofocus
- Adding an email input field
  - Showing example input with placeholder text

- Offering choices with radio buttons
- Adding a dropdown menu
- Adding a range slider
- Adding Submit and Reset buttons

## Chapter 10 Processing Forms with JavaScript

### Creating the FormHandler Module

- Introduction to jQuery
- Importing jQuery
- Configuring instances of FormHandler with a selector

### Adding the submit Handler

- Extracting the data
- Accepting and calling a callback

### Using FormHandler

- Registering createOrder as a submit handler

### UI Enhancements

#### Bronze Challenge: Supersize It

#### Silver Challenge: Showing the Value as the Slider Changes

#### Gold Challenge: Adding Achievements

## Chapter 11 From Data to DOM

### Setting Up the Checklist

### Creating the CheckList Module

### Creating the Row Constructor

- Creating DOM elements with jQuery

### Creating CheckList Rows on Submit

- Manipulating this with call

### Delivering an Order by Clicking a Row

- Creating the CheckList.prototype.removeRow method
- Removing overwritten entries
- Writing the addClickHandler method
- Calling addClickHandler

#### Bronze Challenge: Adding the Strength to the Description

#### Silver Challenge: Color Coding by Flavor Shot

# Table of Contents

Gold Challenge: Allowing Order Editing

## Chapter 12 Validating Forms

The required Attribute

Validating with Regular Expressions

Constraint Validation API

Listening for the input event

Associating the validation check with the input event

Triggering the validity check

Styling Valid and Invalid Elements

Silver Challenge: Custom Validation for Decaf

For the More Curious: The Webshims Library

## Chapter 13 Ajax

XMLHttpRequest Objects

RESTful Web Services

The RemoteDataStore Module

Sending Data to the Server

Using jQuerys \$.post method

Adding a callback

Inspecting the Ajax request and response

Retrieving Data from the Server

Inspecting the response data

Adding a callback argument

Deleting Data from the Server

Using jQuerys \$.ajax method

Replacing DataStore with RemoteDataStore

Silver Challenge: Validating Against the Remote Server

For the More Curious: Postman

## Chapter 14 Deferreds and Promises

Promises and Deferreds

Returning Deferred

Registering Callbacks with then

Handling Failures with then

Using Deferreds with Callback-Only APIs

Giving DataStore a Promise

# Table of Contents

- Creating and returning Promises
- Resolving a Promise
- Promise-ifying the other DataStore methods

Silver Challenge: Fallback to DataStore

## Part III. Real-Time Data

### Chapter 15 Introduction to Node.js

Node and npm

- npm init
- npm scripts

Hello, World

Adding an npm Script

Serving from Files

- Reading a file with the fs module
- Working with the request URL
- Using the path module
- Creating a custom module
- Using your custom module

Error Handling

For the More Curious: npm Module Registry

Bronze Challenge: Creating a Custom Error Page

For the More Curious: MIME Types

Silver Challenge: Providing a MIME Type Dynamically

Gold Challenge: Moving Error Handling to Its Own Module

### Chapter 16 Real-Time Communication with WebSockets

Setting Up WebSockets

Testing Your WebSockets Server

Creating the Chat Server Functionality

First Chat!

For the More Curious: socket.io WebSockets Library

For the More Curious: WebSockets as a Service

Bronze Challenge: Am I Repeating Myself?

Silver Challenge: Speakeasy

Gold Challenge: Chat Bot

### Chapter 17 Using ES6 with Babel

# Table of Contents

Tools for Compiling JavaScript

The Chattrbox Client Application

First Steps with Babel

Class syntax

Using Browserify for Packaging Modules

Running the build process

Adding the ChatMessage Class

Creating the ws-client Module

Connection handling

Handling events and sending messages

Sending and echoing a message

For the More Curious: Compiling to JavaScript from Other Languages

Bronze Challenge: Default Import Name

Silver Challenge: Closed Connection Alert

For the More Curious: Hoisting

For the More Curious: Arrow Functions

## Chapter 18 ES6, the Adventure Continues

Installing jQuery as a Node Module

Creating the ChatForm Class

Connecting ChatForm to the socket

Creating the ChatList Class

Using Gravatars

Prompting for Username

User Session Storage

Formatting and Updating Message Timestamps

Bronze Challenge: Adding Visual Effects to Messages

Silver Challenge: Caching Messages

Gold Challenge: Separate Chat Rooms

## Part IV. Application Architecture

### Chapter 19 Introduction to MVC and Ember

Tracker

Ember: An MVC Framework

Installing Ember

Creating an Ember application

# Table of Contents

Starting up the server

External Libraries and Addons

Configuration

For the More Curious: npm and Bower Install

Bronze Challenge: Limiting Imports

Silver Challenge: Adding Font Awesome

Gold Challenge: Customizing the NavBar

## Chapter 20 Routing, Routes, and Models

ember generate

Nesting Routes

Ember Inspector

Assigning Models

beforeModel

For the More Curious: setupController and afterModel

## Chapter 21 Models and Data Binding

Model Definitions

createRecord

get and set

Computed Properties

For the More Curious: Retrieving Data

For the More Curious: Saving and Destroying Data

Bronze Challenge: Changing the Computed Property

Silver Challenge: Flagging New Sightings

Gold Challenge: Adding Titles

## Chapter 22 Data Adapters, Serializers, and Transforms

Adapters

Content Security Policy

Serializers

Transforms

For the More Curious: Ember CLI Mirage

Silver Challenge: Content Security

Gold Challenge: Mirage

## Chapter 23 Views and Templates

# Table of Contents

Handlebars

Models

Helpers

- Conditionals

- Loops with `{{#each}}`

- Binding element attributes

- Links

Custom Helpers

Bronze Challenge: Adding Link Rollovers

Silver Challenge: Changing the Date Format

Gold Challenge: Creating a Custom Thumbnail Helper

## Chapter 24 Controllers

New Sightings

Editing a Sighting

Deleting a Sighting

Route Actions

Bronze Challenge: Sighting Detail Page

Silver Challenge: Sighting Date

Gold Challenge: Adding and Removing Witnesses

## Chapter 25 Components

Iterator Items as Components

Components for DRY Code

Data Down, Actions Up

Class Name Bindings

Data Down

Actions Up

Bronze Challenge: Customizing the Alert Message

Silver Challenge: Making the NavBar a Component

Gold Challenge: Array of Alerts

## Chapter 26 Afterword

The Final Challenge

Shameless Plugs

Thank You
