## Video Instruction from Technology Experts

### Advance Your Skills

Get started with fundamentals, become an expert, or get certified.

### Train Anywhere

Train anywhere, at your own pace, on any device.

### Learn

Learn from trusted author trainers published by Cisco Press.

## Try Our Popular Video Training for FREE!

[ciscopress.com/video](http://ciscopress.com/video)

Explore hundreds of **FREE** video lessons from our growing library of Complete Video Courses, LiveLessons, networking talks, and workshops.

Introduction

Section I: Getting Started with Network Programmability

Chapter 1 Introduction: Why Network Programmability

What Is Network Programmability

Network Programmability Benefits

Simplified Networking

Network Innovation with Programmability

Cloud, SDN, and Network Programmability

SDN

Is Programmability a New Idea?

Network Automation

Automation Example

Summary

Chapter 2 Foundational Skills

# Table of Contents

## Introduction to Software Development

Common ConstructsVariables, Flow Control, Functions, and Objects

Variables

Flow ControlConditions

Flow ControlLoops

Functions

Objects

A Basic Introduction to Python

More on Strings

Help!

Flow Control

Python Conditions

Python Loops

While Loop

Python Functions

Python Files

Importing Libraries

Installing Python Libraries

Using PIP

Using Common Python Libraries

APIs and SDKs

Web Technologies

Web TechnologiesData Formatting

XML

JSON

Google Postman

Using Postman

Using JSON in Python

Basic Introduction to Version Control, Git, and GitHub

GitAdd a File

Creating and Editing Source Code

Getting Started with PyCharm

Writing Code in PyCharmGet the Weather

Debugging in PyCharm

# Table of Contents

- Introduction to Linux
- Working in Linux
- Linux Architecture
- Display Linux Process
- Using Systemd
- Linux File System and Permissions
- Linux Directories
- Installing Applications on Linux
- Where to Go for Help

Summary

## Section II: Cisco Programmable Data Center

### Chapter 3 Next-Generation Cisco Data Center Networking

- Cisco Application-Centric Infrastructure (ACI)

- Nexus Data Broker

  - Use CaseNexus Data Broker

- Evolution of Data Center Network Architecture

- Cisco Data Center Network Controllers

  - Nexus Fabric Manager

  - Virtual Topology System (VTS)

  - Cisco ACI

Summary

### Chapter 4 On-Box Programmability and Automation with Cisco Nexus

#### NX-OS

- Open NX-OS AutomationBootstrap and Provisioning

  - Cisco POAP

  - Cisco Ignite

  - Using Ignite

  - NX-OS iPXE

Bash

  - Bash Scripting

  - Bash Variables, Conditions, and Loops

# Table of Contents

- Bash Arithmetic
- Bash Conditions and Flow Control
- Bash Redirection and Pipes
- Working with Text in Bash

## Awk

## Bash on Nexus 9000

- ifconfig
- Tcpdump

## ethtool

- Run a Bash Script at Startup
- Bash ExampleConfigure NTP Servers at boot

## Linux Containers (LXC)

- Network Access in Guestshell
- Installing Applications in Guestshell
- Puppet Agent Installation in Guestshell
- NMap Installation in Guestshell
- Embedded Nexus Data Broker
- Nexus Embedded Event Manager
- EEM Variables
- On-box Python Scripting
- Using the NX-OS Python CLI Library
- Using NX-OS Cisco Python Library
- Non-Interactive Python
- Cisco or CLI Package?

## On-Box PythonUse Cases and Examples

- EEM Neighbor Discovery

## Summary

## Chapter 5 Off-Box Programmability and Automation with Cisco Nexus NX-OS

### Nexus NX-API

- NX-API Transport
- NX-API Message Format

# Table of Contents

- NX-API Security
- NX-API Sandbox
- Using NX-API in Python
- Configuring an IP Address with Python and NX-API
- NX-API REST: An Object-Oriented Data Model
- NX-API REST Object Model Data
- Authenticating to NX-API (nxapi\_auth cookie)
- Changing NX-API Objects Data via Postman
- Modifying NX-API Objects Data via Python
- NX-API Event Subscription
- NXTool Kit
- Using NXTool Kit
- NXTool Kit BGP Configuration
- Automation and DevOps Tools
- Puppet
- Using Puppet
- Puppet and Nexus 9000
- Ansible and Nexus 9000

Summary

Resources

## Chapter 6 Network Programmability with Cisco ACI

### Cisco ACI Automation

- ACI Policy Instantiation
- A Bit More Python
- Virtualenv
- Virtualenv in PyCharm
- Python Exceptions Handling

### ACI Fundamentals

- ACI Management Information Model
- ACI Object Naming
- Fault Severity
- ACI Health Scores

### ACI Programmability

# Table of Contents

- Invoking the API
- GUI
- APIC Object Save-as
- APIC API Inspector
- APIC Object Store Browser (Visore)
- APIC API Authentication
- Using Python to Authenticate to APIC
- Using Postman to Automate APIC Configurations
- Using Postman
- Creating New Postman Calls
- Programmability Using the APIC RESTful API
- ACI Event Subscription
- Cobra SDK
- Using APIC Cobra
- Working with Objects
- Example Cobra SDKCreating a Complete Tenant Configuration
- APIC REST Python Adapter (Arya)
- Using AryaLogger
- APIC Automation with UCS Director

Summary

## Section III: Cisco Programmable Campus and WAN

### Chapter 7 On-Box Automation and Operations Tools

- Automated Port Profiling
- AutoSmart Ports
  - Enabling AutoSmart Ports on a Cisco Catalyst Switch
- AutoConf
  - Enabling AutoConf on a Cisco Catalyst Switch
  - Modifying a Built-in Template
- Auto Security
  - Enabling Auto Security on a Cisco Catalyst Switch
- Quality of Service for Campus Architectures
  - AutoQoS on Campus LAN Devices

# **Table of Contents**

Enabling AutoQoS on a Cisco Catalyst Switch

AutoQoS on Campus WAN Devices

Enabling AutoQoS on a Cisco ISR Router

## **Automating Management and Monitoring Tasks**

Smart Call Home

Enabling Smart Call Home on an Cisco Catalyst Switch

Tcl Shell

Embedded Event Manager (EEM)

EEM Applets

EEM and Tcl Scripts

EEM Summary

## **Summary**

## **Chapter 8 Network Automation Tools for Campus Environments**

### **Data Models and Supporting Protocols**

YANG Data Models

NETCONF

ConfD

### **Application Policy Infrastructure Controller Enterprise Module (APIC-EM)**

APIC-EM Architecture

APIC-EM Applications

Intelligent WAN (IWAN) Application

Plug-and-Play (PnP) Application

Path Trace Application

### **Additional APIC-EM Features**

Topology

Device Inventory

Easy Quality of Service (Easy QoS)

Dynamic QoS

Policy Application

### **APIC-EM Programmability Examples Using Postman**

Ticket API

Host API

# **Table of Contents**

Network Device API

User API

Available APIC-EM APIs

APIC-EM Programmability Examples Using Python

Ticket API

Host API

Summary

Chapter 9 Piecing It All Together
