Introduction

Part I: Web Application Basics

CHAPTER 1: Understanding How the Web Works

A Brief History of HTML and the World Wide Web

Creating Web Content

Understanding Web Content Delivery

Selecting a Web Hosting Provider

Testing with Multiple Web Browsers

Creating a Sample File

Using FTP to Transfer Files

Understanding Where to Place Files on the Web Server

Summary

Q&A

Workshop

CHAPTER 2: Structuring HTML and Using Cascading Style Sheets

Table of Contents

Getting Started with a Simple Web Page
HTML Tags Every Web Page Must Have
Using Hyperlinks in Web Pages
Organizing a Page with Paragraphs and Line Breaks
Organizing Your Content with Headings
Understanding Semantic Elements
How CSS Works
A Basic Style Sheet
A CSS Style Primer
Using Style Classes
Using Style IDs
Internal Style Sheets and Inline Styles
Summary
Q&A
Workshop

CHAPTER 3: Understanding the CSS Box Model and Positioning

The CSS Box Model
The Whole Scoop on Positioning
Controlling the Way Things Stack Up
Managing the Flow of Text
Understanding Fixed Layouts
Understanding Fluid Layouts
Creating a Fixed/Fluid Hybrid Layout
Considering a Responsive Web Design
Summary
Q&A
Workshop

CHAPTER 4: Introducing JavaScript

Learning Web Scripting Basics

Table of Contents

How JavaScript Fits into a Web Page

Exploring JavaScripts Capabilities

Basic JavaScript Language Concepts

JavaScript Syntax Rules

Using Comments

Best Practices for JavaScript

Understanding JSON

Using the JavaScript Console to Debug JavaScript

Summary

Q&A

Workshop

CHAPTER 5: Introducing PHP

How PHP Works with a Web Server

The Basics of PHP Scripts

Code Blocks and Browser Output

Summary

Q&A

Workshop

Part II: Getting Started with Dynamic Websites

CHAPTER 6: Understanding Dynamic Websites and HTML5 Applications

Refresher on the Different Types of Scripting

Displaying Random Content on the Client Side

Understanding the Document Object Model

Using window Objects

Working with the document Object

Accessing Browser History

Working with the location Object

More About the DOM Structure

Table of Contents

Working with DOM Nodes

Creating Positionable Elements (Layers)

Hiding and Showing Objects

Modifying Text Within a Page

Adding Text to a Page

Changing Images Based on User Interaction

Thinking Ahead to Developing HTML5 Applications

Summary

Q&A

Workshop

CHAPTER 7: JavaScript Fundamentals: Variables, Strings, and Arrays

Using Variables

Understanding Expressions and Operators

Data Types in JavaScript

Converting Between Data Types

Using String Objects

Working with Substrings

Using Numeric Arrays

Using String Arrays

Sorting a Numeric Array

Summary

Q&A

Workshop

CHAPTER 8: JavaScript Fundamentals: Functions, Objects, and Flow Control

Using Functions

Introducing Objects

Using Objects to Simplify Scripting

Table of Contents

Extending Built-in Objects

Using the Math Object

Working with Math Methods

Working with Dates

The if Statement

Using Shorthand Conditional Expressions

Testing Multiple Conditions with if and else

Using Multiple Conditions with switch

Using for Loops

Using while Loops

Using dowhile Loops

Working with Loops

Looping Through Object Properties

Summary

Q&A

Workshop

CHAPTER 9: Understanding JavaScript Event Handling

Understanding Event Handlers

Using Mouse Events

Using Keyboard Events

Using the load and unload Events

Using click to Change a <div>'s Appearance

Summary

Q&A

Workshop

CHAPTER 10: The Basics of Using jQuery

Using Third-Party JavaScript Libraries

jQuery Arrives on the Scene

Preparing to Use jQuery

Table of Contents

Becoming Familiar with the \$ () .ready Handler
Selecting DOM and CSS Content
Manipulating HTML Content
Putting the Pieces Together to Create a jQuery Animation
Handling Events with jQuery
Summary
Q&A
Workshop

Part III: Taking Your Web Applications to the Next Level

CHAPTER 11: AJAX: Remote Scripting

Introducing AJAX
Using XMLHttpRequest
Creating a Simple AJAX Library
Creating an AJAX Quiz Using the Library
Debugging AJAX-Based Applications
Using jQuery's Built-in Functions for AJAX
Summary
Q&A
Workshop

CHAPTER 12: PHP Fundamentals: Variables, Strings, and Arrays

Variables
Data Types
Using Expressions and Operators
Constants
Understanding Arrays
Creating Arrays
Some Array-Related Constructs and Functions
Summary
Q&A

Table of Contents

Workshop

CHAPTER 13: PHP Fundamentals: Functions, Objects, and Flow Control

Calling Functions

Defining a Function

Returning Values from User-Defined Functions

Understanding Variable Scope

Saving State Between Function Calls with the static Statement

More About Arguments

Testing for the Existence of a Function

Creating an Object

Object Inheritance

Switching Flow

Implementing Loops

Summary

Q&A

Workshop

CHAPTER 14: Working with Cookies and User Sessions

Introducing Cookies

Setting a Cookie

Deleting a Cookie

Overview of Server-Side Sessions

Working with Session Variables

Destroying Sessions and Unsetting Session Variables

Using Sessions in an Environment with Registered Users

Summary

Q&A

Workshop

CHAPTER 15: Working with Web-Based Forms

Table of Contents

How HTML Forms Work

Creating a Form

Accepting Text Input

Naming Each Piece of Form Data

Labeling Each Piece of Form Data

Grouping Form Elements

Exploring Form Input Controls

Using HTML5 Form Validation

Submitting Form Data

Accessing Form Elements with JavaScript

Accessing Form Elements with PHP

Using Hidden Fields to Save State in Dynamic Forms

Sending Mail on Form Submission

Summary

Q&A

Workshop

Part IV: Integrating a Database into Your Applications

CHAPTER 16: Understanding the Database Design Process

The Importance of Good Database Design

Types of Table Relationships

Understanding Normalization

Following the Design Process

Summary

Q&A

Workshop

CHAPTER 17: Learning Basic SQL Commands

Learning the MySQL Data Types

Learning the Table-Creation Syntax

Using the INSERT Statement

Table of Contents

- Using the SELECT Statement
- Using WHERE in Your Queries
- Selecting from Multiple Tables
- Using the UPDATE Statement to Modify Records
- Using the REPLACE Statement
- Using the DELETE Statement
- Frequently Used String Functions in MySQL
- Using Date and Time Functions in MySQL
- Summary
- Q&A
- Workshop

CHAPTER 18: Interacting with MySQL Using PHP

- MySQL or MySQLi?
- Connecting to MySQL with PHP
- Working with MySQL Data
- Summary
- Q&A
- Workshop

Part V: Getting Started with Application Development

CHAPTER 19: Creating a Simple Discussion Forum

- Designing the Database Tables
- Creating an Include File for Common Functions
- Creating the Input Forms and Scripts
- Displaying the Topic List
- Displaying the Posts in a Topic
- Adding Posts to a Topic
- Modifying the Forum Display with JavaScript
- Summary
- Q&A

Table of Contents

Workshop

CHAPTER 20: Creating an Online Storefront

Planning and Creating the Database Tables

Displaying Categories of Items

Displaying Items

Using JavaScript with an Online Storefront

Summary

Q&A

Workshop

CHAPTER 21: Creating a Simple Calendar

Building a Simple Display Calendar

Creating the Calendar in JavaScript

Summary

Q&A

Workshop

CHAPTER 22: Managing Web Applications

Understanding Some Best Practices in Web Application Development

Writing Maintainable Code

Implementing Version Control in Your Work

Understanding the Value and Use of Code Frameworks

Summary

Q&A

Workshop

Appendixes

APPENDIX A: Installation QuickStart Guide with XAMPP

Using Third-Party Installation Packages

Installing XAMPP on Linux/UNIX

Installing XAMPP on Windows

Installing XAMPP on Mac OS X

Table of Contents

Securing XAMPP

Troubleshooting

APPENDIX B: Installing and Configuring MySQL

Current and Future Versions of MySQL

How to Get MySQL

Installing MySQL on Linux/UNIX

Installing MySQL on Mac OS X

Installing MySQL on Windows

Troubleshooting Your Installation

Basic Security Guidelines

Introducing the MySQL Privilege System

APPENDIX C: Installing and Configuring Apache

Current Versions of Apache

Choosing the Appropriate Installation Method

Installing Apache on Linux/UNIX

Installing Apache on Mac OS X

Installing Apache on Windows

Apache Configuration File Structure

Apache Log Files

Apache-Related Commands

Starting Apache for the First Time

Troubleshooting

APPENDIX D: Installing and Configuring PHP

Current and Future Versions of PHP

Building PHP on Linux/UNIX with Apache

Installing PHP on Mac OS X

Installing PHP on Windows

php.ini Basics

Testing Your Installation

Table of Contents

Getting Installation Help
