Introduction

Chapter 1 Introduction to Programmable Fabric

 Today's Data Center Challenges and Requirements

 The Data Center Fabric Journey

 Cisco Open Programmable Fabric

 Fabric-Related Terminology

 Data Center Network Fabric Properties

 Server or Endpoint Connectivity Options

 Summary

 References

Chapter 2 VXLAN BGP EVPN Basics

 Overlays

 Introduction to VXLAN

 VXLAN Flood and Learn (F&L)

Table of Contents

Introduction to BGP EVPN with VXLAN

- MP-BGP Features and Common Practices

- IETF Standards and RFCs

- Host and Subnet Route Distribution

- Host Deletion and Move Events

Summary

References

Chapter 3 VXLAN/EVPN Forwarding Characteristics

Multidestination Traffic

- Leveraging Multicast Replication in the Underlying Network

- Using Ingress Replication

VXLAN BGP EVPN Enhancements

- ARP Suppression

- Distributed IP Anycast Gateway

- Integrated Route and Bridge (IRB)

- Endpoint Mobility

- Virtual PortChannel (vPC) in VXLAN BGP EVPN

- DHCP

Summary

References

Chapter 4 The Underlay

Underlay Considerations

- MTU Considerations

- IP Addressing

IP Unicast Routing

- OSPF as an Underlay

- IS-IS as an Underlay

- BGP as an Underlay

Table of Contents

IP Unicast Routing Summary

Multidestination Traffic

Unicast Mode

Multicast Mode

PIM Any Source Multicast (ASM)

BiDirectional PIM (PIM BiDir)

Summary

References

Chapter 5 Multitenancy

Bridge Domains

VLANs in VXLAN

Layer 2 Multitenancy: Mode of Operation

VLAN-Oriented Mode

BD-Oriented Mode

VRF in VXLAN BGP EVPN

Layer 3 Multitenancy: Mode of Operation

Summary

References

Chapter 6 Unicast Forwarding

Intra-Subnet Unicast Forwarding (Bridging)

Non-IP Forwarding (Bridging)

Inter-Subnet Unicast Forwarding (Routing)

Routed Traffic to Silent Endpoints

Forwarding with Dual-Homed Endpoint

IPv6

Summary

Chapter 7 Multicast Forwarding

Table of Contents

Layer 2 Multicast Forwarding

IGMP in VXLAN BGP EVPN Networks

Layer 2 Multicast Forwarding in vPC

Layer 3 Multicast Forwarding

Summary

References

Chapter 8 External Connectivity

External Connectivity Placement

External Layer 3 Connectivity

U-Shaped and Full-Mesh Models

VRF Lite/Inter-AS Option A

LISP

MPLS Layer 3 VPN (L3VPN)

External Layer 2 Connectivity

Classic Ethernet and vPC

Extranet and Shared Services

Local/Distributed VRF Route Leaking

Downstream VNI Assignment

Summary

Reference

Chapter 9 Multi-Pod, Multifabric, and Data Center Interconnect (DCI)

Contrasting OTV and VXLAN

Multi-Pod

Interconnection at the Spine Layer

Interconnection at the Leaf Layer

Multifabric

Inter-pod/Interfabric

Table of Contents

Interfabric Option 1: Multi-Pod

Interfabric Option 2: Multifabric

Interfabric Option 3 (Multisite for Layer 3)

Interfabric Option 4 (Multisite for Layer 2)

Summary

References

Chapter 10 Layer 47 Services Integration

Firewalls in a VXLAN BGP EVPN Network

Routing Mode

Bridging Mode

Firewall Redundancy with Static Routing

Static Route Tracking at a Service Leaf

Static Routing at a Remote Leaf

Physical Connectivity

Inter-Tenant/Tenant-Edge Firewall

Services-Edge Design

Intra-Tenant Firewalls

Mixing Intra-Tenant and Inter-Tenant Firewalls

Application Delivery Controller (ADC) and Load Balancer in a VXLAN
BGP EVPN Network

One-Armed Source-NAT

Direct VIP Subnet Approach

Indirect VIP Subnet Approach

Return Traffic

Service Chaining: Firewall and Load Balancer

Summary

References

Chapter 11 Introduction to Fabric Management

Table of Contents

Day-0 Operations: Automatic Fabric Bring-Up

- In-Band Versus Out-of-Band POAP

- Other Day-0 Considerations

Day-0.5 Operations: Incremental Changes

Day-1 Operations: Overlay Services Management

Virtual Topology System (VTS)

Nexus Fabric Manager (NFM)

Data Center Network Manager (DCNM)

- Compute Integration

Day-2 Operations: Monitoring and Visibility

- VXLAN OAM (NGOAM)

Summary

References

Appendix A: VXLAN BGP EVPN Implementation Options

EVPN Layer 2 Services

EVPN IP-VRF to IP-VRF Model
