Table of Contents

Part I: TCP/IP Basics

    HOUR 1: What Is TCP/IP?

        Networks and Protocols

        The Development of TCP/IP

        TCP/IP Features

        Standards Organizations and RFCs

        Summary

        Q&A

        Workshop

        Key Terms

    HOUR 2: How TCP/IP Works

        The TCP/IP Protocol System

        TCP/IP and the OSI Model

        Data Packages

        A Quick Look at TCP/IP Networking

        Summary

        Q&A

        Workshop

        Key Terms

Part II: The TCP/IP Protocol System

# **Table of Contents**

## **HOURL 3: The Network Access Layer**

Protocols and Hardware

The Network Access Layer and the OSI Model

Network Architecture

Physical Addressing

Ethernet

Anatomy of an Ethernet Frame

Summary

Q&A

Workshop

Key Terms

## **HOURL 4: The Internet Layer**

IP Addresses: A Little Context

Addressing and Delivering

Internet Protocol

Address Resolution Protocol

Reverse ARP

Internet Control Message Protocol

Summary

Q&A

Workshop

Key Terms

## **HOURL 5: Subnetting and CIDR**

Subnets

Dividing the Network

The Old Way: Subnet Mask

The New Way: CIDR

Summary

Q&A

# Table of Contents

Workshop

Key Terms

## HOUR 6: The Transport Layer

Introducing the Transport Layer

Transport Layer Concepts

Understanding TCP and UDP

Firewalls and Ports

Summary

Q&A

Workshop

Key Terms

## HOUR 7: The Application Layer

What Is the Application Layer?

The TCP/IP Application Layer and OSI

Network Services

APIs and the Application Layer

TCP/IP Utilities

Summary

Q&A

Workshop

Key Terms

## Part III: Networking with TCP/IP

### HOUR 8: Routing

Routing in TCP/IP

Routing on Complex Networks

Examining Interior Routers

Exterior Routers: BGP

Classless Routing

Higher in the Stack

# Table of Contents

Summary

Q&A

Workshop

Key Terms

## HOURL 9: Getting Connected

Cable Broadband

Digital Subscriber Line

Wide Area Networks

Wireless Networking

Dial-Up Networking

Connectivity Devices

Switching Versus Routing

Summary

Q&A

Workshop

Key Terms

## HOURL 10: Name Resolution

What Is Name Resolution?

Name Resolution Using Hosts Files

DNS Name Resolution

Registering a Domain

Name Server Types

Dynamic DNS

NetBIOS Name Resolution

Summary

Q&A

Workshop

Key Terms

## HOURL 11: TCP/IP Security

# Table of Contents

What Is a Firewall?

Attack Techniques

What Do Intruders Want?

Summary

Q&A

Workshop

Key Terms

## HOURL 12: Configuration

Getting on the Network

The Case for Server-Supplied IP Addresses

What Is DHCP?

How DHCP Works

DHCP Server Configuration

Network Address Translation

Zero Configuration

Configuring TCP/IP

Summary

Q&A

Workshop

Key Terms

## HOURL 13: IPv6: The Next Generation

Why a New IP?

IPv6 Header Format

IPv6 Addressing

Subnetting

Multicasting

Link Local

Neighbor Discovery

Autoconfiguration

# Table of Contents

IPv6 and Quality of Service

IPv6 with IPv4

IPv6 Tunnels

Summary

Q&A

Workshop

Key Terms

## Part IV: Tools and Service

### Hour 14: Classic Tools

Connectivity Problems

Protocol Dysfunction and Misconfiguration

Line Problems

Name Resolution Problems

Network Performance Problems

Telnet

Berkeley Remote Utilities

Secure Shell

Network Management

Summary

Q&A

Workshop

Key Terms

### Hour 15: Classic Services

HTTP

Email

FTP

Trivial File Transfer Protocol

File and Print Services

Lightweight Directory Access Protocol

# Table of Contents

Remote Control

Summary

Q&A

Workshop

Key Terms

## Part V: The Internet

### Hour 16: The Internet: A Closer Look

How the Internet Looks

What Happens on the Internet

URIs and URLs

Summary

Q&A

Workshop

Key Terms

### Hour 17: HTTP, HTML, and the World Wide Web

What Is the World Wide Web?

Understanding HTML

Cascading Style Sheets

Understanding HTTP

Scripting

Web Browsers

The Semantic Web

XHTML

HTML5

Summary

Q&A

Workshop

Key Terms

### Hour 18: Web Services

# Table of Contents

Content Management Systems

Social Networking

Peer-to-Peer

Understanding Web Services

XML

SOAP

WSDL

Web Service Stacks

REST

E-Commerce

Summary

Q&A

Workshop

Key Terms

## HOUR 19: Encryption, Tracking, and Privacy

Encryption and Secrecy

Tracking

Anonymity Networks

Summary

Q&A

Workshop

Key Terms

## Part VI: TCP/IP at Work

### HOUR 20: Email

What Is Email?

Email Format

How Email Works

Simple Mail Transfer Protocol

Retrieving the Mail

# Table of Contents

Email Clients

Webmail

Spam

Phishing

Summary

Q&A

Workshop

Key Terms

## HOUR 21: Streaming and Casting

The Streaming Problem

A Brief Introduction to Multimedia Files

Real-Time Transport Protocol Streaming Over UDP

RTMP Streaming Over TCP

SCTP and DCCP Replacing the Transport Layer

Streaming Over HTTP

HTML5 and Multimedia

Podcasting

Voice over IP

Summary

Q&A

Workshop

Key Terms

## HOUR 22: Living in the Cloud

What Is the Cloud?

Private Clouds

Future of Computing

Summary

Q&A

Workshop

# Table of Contents

Key Terms

## HOURL 23: Internet of Things

What Is the Internet of Things?

IoT Platforms

Up Close: MQTT

RFID

Summary

Q&A

Workshop

Key Terms

## HOURL 24: Implementing a TCP/IP Network: 7 Days in the Life of a Sys Admin

A Brief History of Hypothetical, Inc

7 Days in the Life of Maurice

Summary

Q&A

Workshop

Key Terms

## APPENDIXES

### APPENDIX A: Answers to Quizzes and Exercises

Hour 1: What Is TCP/IP?

Hour 2: How TCP/IP Works

Hour 3: The Network Access Layer

Hour 4: The Internet Layer

Hour 5: Subnetting and CIDR

Hour 6: The Transport Layer

Hour 7: The Application Layer

Hour 8: Routing

Hour 9: Getting Connected

# **Table of Contents**

Hour 10: Name Resolution

Hour 11: TCP/IP Security

Hour 12: Configuration

Hour 13: IPv6: The Next Generation

Hour 14: Classic Tools

Hour 15: Classic Services

Hour 16: The Internet: A Closer Look

Hour 17: HTTP, HTML, and the World Wide Web

Hour 18: Web Services

Hour 19: Encryption, Tracking, and Privacy

Hour 20: Email

Hour 21: Streaming and Casting

Hour 22: Living in the Cloud

Hour 23: Internet of Things

Hour 24: Implementing a TCP/IP Network: 7 Days in the Life of a Sys  
Admin
