Contents

Foreword

Introduction

Part I: Introduction

Chapter 1 Laying the Groundwork

Overview of SIP

Brief Introduction to and History of SIP

Operation

SIP Messages

Breaking Down a SIP Call

Table of Contents

Forming a Request

Forming a Response

Analyzing a Basic SIP Call

Overview of H.323

H.323 Components

H.323 Call Flow

Introduction to SIP Trunking

SIP Trunking Architectural Models

Introduction to SDP

The Offer/Answer Framework

Operation of the Offer/Answer Framework

Generating the SDP Offer and Answer

Modifying a Session

Adding a Media Stream

Removing a Media Stream

Modifying the Address, Port, Transport or Media Format

Overview of B2BUAs

Session Border Controllers

SBCs versus Proxies

Common SBC Functions

Topology Abstraction

NAT Traversal

DoS and Overload Protection

Fixing Capability Mismatches

Cisco Unified Border Element

Summary

References

Chapter 2 SBC Deployment Models

Purposeful Deployments

External Integrations

Integrating for PSTN Access

Integrations with Mergers and Acquisitions

Table of Contents

Internal Integrations

Integrating with Third-Party Appliances

Contact Center Integration

Call Recording Integration

Line-Side Integrations

CUBE Deployment Options

Supported Platforms

Hardware Appliance versus Virtualization

Platform Feature Comparison

IOS versus IOS XE

Planning for Media Resources

Multi-VRF Support on CUBE

Multi-VRF Configuration

SBC High Availability

Checkpointing for Stateful Failover

Intra-box redundancy

Types of Failover

Synchronization for SSO

Intra-Box Redundancy Options for ASR Platforms

Configuration of RPR or SSO

Troubleshooting Redundancy

Inter-Box Redundancy

CUBE High Availability with HSRP

CUBE High Availability with Redundancy Groups

External Resiliency

External Peer Resilience with CUBE with Multiple Trunks

Summary

References

Part II: Architecture, Capabilities and Design

Chapter 3 Call Routing

Dialing and Routing a SIP Call

SIP INVITE Request Forwarding

Table of Contents

SIP INVITE Response Routing

SIP Record-Route and Route Header Fields

Call Routing Types

Directory NumberBased Routing

URI-Based Routing

Source-Based Routing

Trunk GroupBased Routing

Carrier-Based Routing

Next-Hop Determination

IP Address

Host Name

DNS SRV

Next-Hop Availability Check

SIP OPTIONS Ping

End-to-End Call Trace

Session-ID

Local and Remote UUID

CUBE Call Routing Mechanisms

Dial Peers

Inbound and Outbound Dial Peers

Inbound Dial Peer Matching Rules

Outbound Dial Peer Matching Rules

Translation Profiles

Called Number Transformation

Calling Number Transformation

Redirect Number Transformation

Call Blocking

Dial Peer Optimization

E.164 Pattern Map

Server Group

URI-Based Dialing

Call Routing in Multitenant Environments

Dial Peer Groups (DPGs)

Table of Contents

- Dial Peer Provisioning Policies
- Call Rerouting
- Rerouting Criteria
- Reroute Mechanisms
- Troubleshooting Call Setup Failures
- Troubleshooting Tools
- Common Call Setup Failure Reasons

Summary

References

Chapter 4 Signaling and Interworking

SIPSIP Interworking

- Early Offer and Delayed Offer Interworking
- Reliable Handling and Interworking of Provisional Responses
- Ringback and Provisional Response Interworking
- Signal Forking
- Mid-call Signaling
- Hold/Resume
- Music-on-Hold
- Call Transfer
- UPDATE
- Session Refresh
- Managing Mid-call Signaling

SIP Header Interworking

SIP Normalization

- SIP Profile Configuration
- Outbound SIP Profiles
- Inbound SIP Profiles
- SIP Copylist
- Common SIP Profiles
- Troubleshooting SIP Profiles

Transport and Protocol Interworking

- Layer 4 Transport Interworking

Table of Contents

Layer 3 IP Interworking

Interworking Protocol Extensions

Supplementary Services

Call Forwarding

Message Waiting Indicator (MWI)

Joins/Replaces

SIPH.323 Interworking

Troubleshooting SIPH.323 Interworking

Summary

References

Chapter 5 Media Processing

Real-Time Transport Protocol

RTP Packet Format

RTP Enhancements

Real-Time Transport Control Protocol

RTCP Packet Types

RTCP Sender Report (SR)

RTCP Receiver Report (RR)

RTCP Source Description (SDES) Packet

RTCP Goodbye Packet (BYE)

RTCP APP Packet (APP)

SBC Handling of RTP and RTCP

Media Flow-Around

Media Flow-Through

Configuration for Media Handling

Generic RTP and RTCP Handling by SBCs

Assisted RTCP on SBCs

Configuration of Assisted RTCP

Symmetric and Asymmetric RTP/RTCP

DSP-Based RTP Handling on SBCs

Overview of DSPs on SBCs

Transcoding

Table of Contents

Skinny Client Control Protocol (SCCP) Transcoder

Local Transcoding Interface (LTI) Transcoder

Transrating

Transrating on CUBE

Media Anti-Tromboning

Alternative Network Address Types

Solving NAT Traversal Challenges

How NAT Works

Problems with Real-Time Collaboration over NAT

ALG Fixup

Limitations of ALG for NAT Fixup

STUN

Limitations of STUN

TURN

Limitations of TURN

ICE

ICE-Lite

Troubleshooting RTP

Summary

References

Chapter 6 Secure Signaling and Media

Understanding Secure Technologies

Encryption and Decryption

Symmetric and Asymmetric Keys

Block and Stream Ciphers

Data Integrity Verification

Public Key Cryptography

Key Agreement

Public Key Encryption

Digital Certificates

Secure Sockets Layer (SSL) and Transport Layer Security (TLS)

Datagram Transport Layer Security (DTLS)

Table of Contents

Secure/Multipurpose Internet Mail Extensions (S/MIME)

Establishing Secure Sessions

Secure Signaling

Secure Media

Secure Media Key Management Protocols

SDP Security (SDES)

DTLS-SRTP

Zimmermann RTP (ZRTP)

SBC Signaling and Media Security

SBC Signaling Plane Security

SBC Media Plane Security

Best-Effort SRTP and SRTP Fallback

Hardening SBC Security

Troubleshooting Signaling and Media Security

Alternative Security Methods

Summary

Chapter 7 DTMF Interworking

Introduction to DTMF Relay

Variants of DTMF Relay

In-Band DTMF Relay

Named Telephony Events

Raw In-Band Tones

Out-of-Band DTMF Relay

SIP INFO

SIP KPML

SIP Notify

H.245 Alphanumeric and Signal

DTMF Relay on SBCs

In-Band DTMF Relay on SBCs

Named Telephony Events on SBCs

Raw In-Band DTMF on SBCs

Table of Contents

Out-of-Band DTMF Relay on SBCs

Configuring and Troubleshooting DTMF Relay

Configuring and Troubleshooting Named Telephony Events

Configuring Named Telephony Events

Troubleshooting Named Telephony Events

Configuring and Troubleshooting Raw In-Band DTMF

Configuring Raw In-Band DTMF

Troubleshooting Raw In-Band DTMF

Configuring and Troubleshooting SIP KPML, SIP NOTIFY, and SIP INFO

Configuring SIP KPML, SIP NOTIFY, and SIP INFO

Troubleshooting SIP KPML, SIP NOTIFY, and SIP INFO

Configuring and Troubleshooting H.245 Alphanumeric and H.245 Signal

Configuring H.245 Alphanumeric/Signal

Troubleshooting H.245 Alphanumeric and H.245 Signal

Summary

References

Chapter 8 Scalability Considerations

Platform Sizing

General Scalability Concepts

Calls per Second and Messages per Second

Concurrent Calls

Call Traffic Engineering

Case Study: Sizing a Generic SBC

CUBE Sizing

General CUBE Platform Sizing

Media Resource Sizing for CUBE

Troubleshooting Scalability Issues

CPU Utilization and System Load

Memory Utilization

Media Resource Capacity

Licensing

General Licensing Considerations

CUBE Licensing Models

Table of Contents

UC Feature Set Licensing

CUBE Licenses

Overload Prevention Techniques

SIP Overload Specifications

RFC 7339: Overload Control Communication Scheme

Overload Security Considerations

Additional Overload Challenges

Call Admission Control

CAC on CUBE

Summary

References

Part III: Integrations and Interoperability

Chapter 9 SIP Trunking for PSTN Access Through SBCs

Best Practices for ITSP Access with SBCs

Security

Dynamic Blacklisting

Secure Signaling and Media

Topology Abstraction

Availability

Overload Control

Plurality of Entry and Exit Trunks

SBC High Availability

Monitoring

Scalability

SIP Trunk Registration

Overview of RFC 3261 for SIP REGISTER

Discovering a Registrar Server and Constructing a Request

Refreshing Registrations

Service Provider Peering and Registration

Registration Mode

Peering Mode

Authentication

Table of Contents

- Digest Authentication in SIP
- User Agent Authentication
- Proxy Authentication
- Digest Authentication Considerations

Registration with SBCs

- Trunk-Side Registration
- Single Registrar
- Redundancy
- Multitenancy
- Line-Side Registration
- Peer-to-Peer (P2P) Mode
- End-to-End (E2E) Mode
- Overload Protection and Registration Rate Limiting
- Configuring Line-Side Registration

Troubleshooting

- SIP Trunk Not Registering with Service Provider

Summary

Chapter 10 Fax over IP (FoIP) on SBCs

Introduction to Fax

- Fax Group Classification
- Phases of a Fax Call

Analyzing a Basic Fax Call

- T.30 Messages
- DIS, CSI, and NSF
- DCS, TSI, and NSS
- TCF, CFR, and FTT
- EOP, MCF, MPS, RTP, RTN, and DCN
- Error Correction Mode
- Super G3 (SG3) Faxing
- Important Fax Timers

Fax over IP (FoIP)

Table of Contents

Switchover of Voice Calls to Fax

Fax Passthrough

Fax Passthrough over H.323

Fax Passthrough over SIP

Fax Relay

Fax Relay over H.323

Fax Relay over SIP

SBC Handling of FoIP

Uniform Fax Handling

QoS Implementation

Protocol Mismatch Handling

FoIP on CUBE

Fax Passthrough on CUBE

Fax Passthrough over H.323

Fax Passthrough over SIP

Configuration of Fax Passthrough

Troubleshooting Fax Passthrough on CUBE

SG3 Faxing and Protocol Interworking

Fax Relay on CUBE

Fax Relay over H.323

Fax Relay over SIP

Fax Relay Fallback to Passthrough

SG3 over Relay and Protocol Interoperability

Configuration of Fax Relay on CUBE

Troubleshooting Fax Relay on CUBE

ECM, NSF, and SG3 Considerations

Summary

Chapter 11 Network-Based Call Recording

The Business Need for Call Recording

Service Delivery Improvement

Regulatory Compliance

IETF SIP Recording Architecture (SIPREC)

Table of Contents

- SIPREC Terminology
- Communication Session
- Session Recording Client
- Session Recording Server
- Media Forking
- Recording Session
- Recording Metadata
- Recording Session Establishment

SIPREC Configuration

Inbound, Outbound, and Recording Dial Peers

- Anchor Legs
- Media Recording Profiles
- Media Class
- Audio-Only Recording
- Video Recording
- Verification

SIPREC Troubleshooting

- Recording Initiation Failures
- Missing Recording Metadata
- Missing Recording File

Cisco UC Gateway Services Architecture

- Extended Call Control Provider
- Extended Media Forking Provider
- Extended Call Detail Record Provider
- Extended Serviceability Provider

The XCC and XMF Data Model

- The XCC Call Control Model
- XCC Call Connection States
- XCC Media Event Filter
- XMF Media Forking

API-Based Recording

- The Registration Process
- The Subscription Process

Table of Contents

The Media Forking Process

API-Based Recording Configuration

HTTP Server and Client Parameters

UC Web Services API Parameters

CUCM Network-Based Recording

CUBE Configuration

CUCM Configuration

MediaSense Configuration

Verifying the Configuration

API-Based Recording Troubleshooting

XMF Application Registration Issues

Recording Not Being Initiated

Part IV: Security and Operations

Chapter 13 Security Threat Mitigation

An Overview of Security Threats to Collaboration Solutions

What Is the Target of an Attack?

Where Do Attacks Originate?

What Are the Targets of Attacks?

Types of Security Threats

Social Engineering and Impersonation

Mitigating Social Engineering and Impersonation

Caller ID Impersonation

Mitigating Caller ID Impersonation

Table of Contents

Man-in-the-Middle Attacks

Eavesdropping

Signaling Hijacking

Toll-Fraud Attacks

Mitigating Toll-Fraud Attacks

Telephony DoS

Mitigating Telephony DoS Attacks

Protocol Fuzzing

Mitigating Protocol Fuzzing

Brute-Force Attacks

Mitigating Brute-Force Attacks

Other SBC Security Features

Co-Resident Firewall

Address Hiding (Topology Abstraction)

Address Hiding on CUBE

Modifying and Disabling TCP/UDP Port Behavior

Media Source Port Validation

Cisco IOS and IOS XE Hardening

General Server Hardening

Designing Collaboration Networks for Security

Vulnerability and Risk Management

Access Control

Knowledge Management

Security Monitoring

Considerations for Integration Design

Local Peering Within the Trusted Network

Private Circuit Peering

Encrypted Peering over Public Circuits

Peering over Public Circuits

Network Security Mitigations External to the SBC

Summary

Chapter 14 Monitoring and Management

Table of Contents

Monitoring

- Monitoring Protocols
- Push-Based Mechanisms
- Poll Mechanisms
- Choosing a Monitoring Protocol
- Event Management Concepts
- Purposes and Types of Events
- Exception Monitoring
- Informational Monitoring
- General SBC Monitoring
- General Platform Assurance
- Voice/Video Assurance
- Security Assurance
- Advanced Call Monitoring
- Call Detail Record (CDR) Analysis
- Media Quality
- Big Data Log Analysis
- IOS and CUBE Device Monitoring
- General Cisco IOS and IOS XE Monitoring
- IOS XE REST API
- CUBE Monitoring
- Prime Collaboration Assurance

Management

- Access Management
- General Access Policies and Procedures
- Cisco Access Policies and Procedures for CUBE
- Call Detail Records (CDRs) for CUBE
- Configuration Management
- General Configuration Management
- CUBE Configuration Management
- Diagnostic Signatures
- Diagnostic Signature Configuration
