Contents

Introduction

Chapter 1 LISP Introduction

- LISP and the Internet

- Use Cases for LISP

- Standards of LISP

- Summary

- References

Chapter 2 LISP Architecture

- LISP Architecture

 - Routing Locators and Endpoint Identifiers

 - Ingress/Egress Tunnel Routers (xTRs)

 - Map Servers (MSs) and Map Resolvers (MRs)

 - Proxy Ingress/Egress Tunnel Router (PxTR)

 - The LISP ALT System

Table of Contents

LISP Canonical Address Format (LCAF)

LISP Packet Headers

 LISP IPv4-in-IPv4 Header Format

 LISP IPv6-in-IPv6 Header Format

LISP Control Plane Messages

 LISP Map Request

 LISP Map Reply

 LISP Map Register Message

 LISP Map Notify Message

LISP Database Architecture: LISP-DDT

 LISP-DDT Operations

LISP Architecture on Cisco Platforms

 LISP Software Architecture on NX-OS

 LISP Software Architecture on IOS-XR

Summary

References

Chapter 3 LISP IPv4 Unicast Routing

LISP IPv4 Unicast Routing Concepts

 RLOC Reachability

 LISP Ingress Traffic Engineering

 MTU Handling

 LISP IPv4 Unicast Routing Configuration

 LISP IPv4 Unicast Routing Control Plane Verification

 LISP IPv4 Unicast Routing Data Plane Verification

 Internetworking LISP and Non-LISP Sites

 Summary

 References

Chapter 4 LISP IPv6 Unicast Routing

Table of Contents

Address Family Versatility

IPv6 Transition Methods

- Connecting IPv6 Islands Using LISP

- Connecting to the IPv6 Internet Using LISP

Configuring LISP IPv6 Unicast Routing

LISP IPv6 Unicast Routing Control Plane Verification

LISP IPv6 Unicast Routing Data Plane Verification

Summary

References

Chapter 5 LISP Multicast Routing Fundamentals

LISP Multicast Routing Concepts

- LISP IPv4 Multicast

- Configuring LISP IPv4 Multicast

- Verifying LISP Multicast

- Troubleshooting LISP Multicast on IOS-XE and NX-OS

- LISP IPv6 Multicast

- Configuring and Verifying LISP IPv6 Multicast

- LISP Multicast with the VXLAN Data Plane

Summary

References

Chapter 6 LISP IP Mobility in Traditional Data Center Network

Design Considerations Related to Interconnecting Data Centers

Network Extension Solutions for Interconnecting Data Centers

- Evolving Requirements for Extending Layer 2

Interconnecting Traditional Data Center Networks

- Layer 2 Back-to-Back vPC for Interconnecting Traditional Data Center

- MPLS Layer 2 Virtual Private Networks (VPNs)

- Overlay Transport Virtualization (OTV)

Table of Contents

Deployment Considerations for Legacy Layer 2 DCI Solutions

- Interconnecting VXLAN MP-BGP EVPN-Based Fabrics

- VXLAN EVPN Multi-Pod

- VXLAN EVPN Multi-Fabric

Interconnecting Multiple VXLAN EVPN Fabrics: A Chronological Evolution

- VXLAN EVPN Multi-Site

- VXLAN EVPN Multi-Site and Rate Limiters

- VXLAN EVPN Multi-Site with Legacy Data Centers

- VXLAN EVPN Multi-Site and External Layer 3 Connectivity

Interconnecting ACI Fabrics

- Interconnecting Multiple ACI Fabrics: A Chronological Evolution

- ACI Remote Leaf Node

- ACI Multi-Pod

- ACI Multi-Site

- ACI and External Layer 3 Connectivity

Workload Mobility Types

- Bare-Metal Servers

- High-Availability Clusters

- Cost Containment

- Virtual Machines

- Workload Mobility Flows Between Data Centers

- Northbound Traffic

- EastWest Traffic

Traditional IP Mobility Solutions

LISP IP Mobility

- Traditional IPv4 and IPv6 Address Schemas

- LISP IP Mobility Overview

- IP Mobility Using LISP Extended Subnet Mode

Table of Contents

- LISP IP Mobility ESM Control Plane Operations
- LISP IP Mobility ESM Data Plane Operation
- LISP IP Mobility ESM Configuration
- IP Mobility Using LISP Across Subnets Mode
- LISP IP Mobility ASM Control Plane Operation
- EID Migration and the LISP Mapping Database Update
- Remote End-User Communication with a Roaming Application
- LISP IP Mobility ASM Data Plane Operation
- Configuring LISP IP Mobility Across Subnets Mode

LISP Feature Support by Operating System

IP Mobility Using LISP IGP Assist

- LISP IGP Assist with Extended Subnet Mode
- LISP IGP Assist Control Plane Operation
- LISP IGP Assist Data Plane Operation
- LISP IGP Assist with Network Services
- Endpoint Localization for EastWest Traffic
- Communication Within and Between Sites
- LISP IGP Assist and Host Route Injection
- LISP IGP Assist Basic Configuration
- LISP IGP Assist in DC 1
- LISP IGP Assist in DC 2
- LISP IGP Assist Verification
- LISP IGP Assist Full Configuration

Summary

References

Chapter 7 LISP IP Mobility in Modern Data Center Fabrics

- LISP IP Mobility Deployment with Modern Fabrics

- VXLAN EVPN Multi-Site with LISP IP Mobility

 - VXLAN EVPN: Endpoint Discovery and Notification

Table of Contents

VXLAN EVPN: Host Route Advertisement

VXLAN EVPN: Configuration for Host Route Advertisement

VXLAN EVPN and Layer 3 Connectivity to the External Network

ACI Multi-Pod with LISP IP Mobility

ACI Multi-Pod and ACI Multi-Site

ACI Multi-Pod and LISP IP Mobility

ACI Multi-Pod Configuration for Host Route Advertisement

The L3Out and Route Map for Selective Prefix Subnets

Bridge Domain Associated to a Particular L3Out

LISP IP Mobility Configuration with Host Route Advertisement

LISP Mapping Database

LISP Site Gateway, xTRs, and ACLs

LISP Site Gateway in Pod 1

LISP Site Gateway in Pod 2

LISP Site Gateway in the Branch Office

LISP IP Mobility Verification with Host Route Advertisement

Configuration Verification

Routing Table Verification

LISP Map Request Verification

Roaming an EID Across Two Sites: Verification

LISP Mobility for ACI in Conjunction with a Silent Host

Sending Data Packets Toward a Silent Host

Troubleshooting LISP IP Mobility with ACI or VXLAN Fabrics

LISP and MTU Considerations

Flowchart Depicting the Roaming Process

Summary

References

Chapter 8 LISP Network Virtualization/Multi-Tenancy

Multi-tenancy in the Network

Table of Contents

LISP Instance ID

LISP Virtualization Models

- Shared Model

- Parallel Model

- Hybrid Model

LISP Shared Model Virtualization Configuration

LISP Parallel Model Virtualization Configuration

LISP Virtualization Troubleshooting

Summary

References

Chapter 9 LISP in the Enterprise Multihome Internet/WAN Edge

LISP at the Enterprise Edge

Configuring LISP at the Enterprise Edge

Troubleshooting LISP at the Enterprise Edge

- Traffic Engineering with LISP Explicit Locator Path

- Explicit Locator Path

- Re-encapsulating Tunnel Routers

LISP Disjoint RLOC Domains

Summary

References

Chapter 10 LISP Security

Securing the LISP Control Plane Using LISP-SEC

- Configuring and Verifying LISP-SEC

Securing the LISP Data Plane

- Source RLOC Decapsulation Filtering

- LISP Reliable Transport

Table of Contents

Configuring Source RLOC Decapsulation Filtering

LISP and GETVPN

Configuring and Verifying LISP over GETVPN
