About the Authors

Chapter 1 Being an Effective Scrum Team

Collaboration Between Product Owner and Development Team

Dont Separate Business and IT

Taking Responsibility for a Valuable Product

Collaborative Product Backlog Management

Sprint Scope Isnt Fixed

The Product Owner Is Present

Creating Transparency as a Scrum Team

Hypothesis-Driven Product Backlog

Product Backlog Drives Conversation

Seeing the Big Picture

Product Backlog Items Need to Create Value

Sprint Backlog Is More than a Task Board

Who Should Update the Sprint Backlog?

Table of Contents

- The Sprint Backlog Should Not Be Hidden
- Sprint Backlog as Status Report
- Work Burndown Is Rarely Perfect
- Preventing Sprint Backlog from Growing Stale
- Done Is Releasable
- Measuring and Verifying Value in a Product

Summary

Chapter 2 Common Problems

Missing Basics

- Early Stumbles with Scrum
- Missing Common Values
- Missing Product Vision
- Missing Cross-functionality on the Scrum Team
- Missing Self-organization

Common Misunderstandings about Scrum

- Sealing the Sprint
- Committing Scope
- Too Many Meetings?
- No Stakeholder in Sprint Review
- Scrum Is Not a Religion

Avoidable Errors

- Scrum Master in Name Only
- Too Many Product Backlog Items
- Licking the Cookie
- Unavailable Product Owner
- A Daily Scrum Twice a Week?

Summary

Chapter 3 Scrum Is Not Enough

Table of Contents

Strategy: Take Care of the Big Picture

Who Is Solving Strategic Problems in Scrum?

What Is Emerging Structure?

Why #NoDocumentation Is a Bad Idea

Tactics: Work from Idea to Result

The Different Levels of Abstraction of a Product Backlog

How to Estimate Meaningfully

Do We Need Scrum When We Have Kanban?

How to Measure Success

How to Improve Cross-functionality

Collaboration Is an Improvement Driver

Does Everyone Need to Do Everything?

Using a Test-First Approach

Coping with Constant Change

Why Refactoring Is Not Optional

Fix Small Problems Before They Become Big Problems

Work with Principles, Not Rules

Summary

Chapter 4 Releasable Is Less Than Released

What Is DevOps?

Its a Role . . . Its a Tool . . . Its DevOps

How Does DevOps Relate to Tools?

Is DevOps Enough?

How to Combine Scrum and DevOps

Is DevOps Replacing Scrum?

Does Scrum Allow Continuous Deployment?

Scrum Principles and DevOps Culture Complement Each Other

How to Improve Flow Using DevOps

Summary

Table of Contents

Chapter 5 Resolving Conflict

Conflict That Can Be Solved by People Involved

Not All Disagreements Result in Conflict

Who Has the Last Say?

Conflict Should Be Solved by the People Involved

Conflict That Needs Outside Intervention

Healthy Conflict That Escalates

Some Conflict Needs to Be Uncovered

Be Loyal to the Scrum Team or to Your Department?

Toxic Conflict That Needs Stronger Intervention

Putting Pressure on the Scrum Team

Alter a Team to Protect It

Summary

Chapter 6 Measure Success

Working Toward Goals

We Need to Deliver Faster

Are We Delivering Value?

What Is Value?

The Experiment Loop

Improving Team Results

Velocity Is Not Performance

How to (Not) Incentivize Performance

You Can't Improve What You Can't Measure

Monitor Improvement, Not Measures

Summary

Chapter 7 Scrum and Management

The Role of Management in Scrum

Transparency Is Not Surveillance

Table of Contents

Responsibility Is Not Control

How to Enable Self-organization

Leading Is Not Directing

Self-organization Is Not Absence of Management

Self-organizing Is Not Easy

Summary

Chapter 8 The Agile Organization

Organizational Structures Can Either Help or Hinder Scrum

New Work, Old Environment

Functional Organizations Can Block Team Growth

Functional Organizations Provide Career Paths But at a Cost

Complex Organizations Need Radical Simplicity

Scrum Can Help Enable Radical Simplicity

Radical Simplicity Requires Radical Transparency

Replace Reporting Chains and Governance Processes with Transparency

Break Down Silos and Align around Customer Value

Summary

Chapter 9 Continuous Improvement Never Stops

How to Keep Improvement Continuous

F.A.I.L.: First Attempt in Learning

We Have Improved Everything We Can Already

Does a Scrum Master Become Obsolete?

Retrospectives as the Driver for Improvement

Reinforcing the Positive

Focus on a Single Improvement

Shift the Organizations Culture over Time to Improve Focus

Will Scrum Ever Be Complete?

When Are We Done Implementing Scrum?

Table of Contents

How to Use Scrum Once the Product Is Live

Scrum Doesnt Need Outside Expertise

Summary
