Table of Contents

Introduction

Learning Swift

Why Swift?

What About Objective-C?

Prerequisites

How This Book Is Organized

How to Use This Book

Challenges and For the More Curious

Typographical Conventions

Necessary Hardware and Software

Before You Begin

Part I. Getting Started

Chapter 1 Getting Started

Getting Started with Xcode

Playing in a Playground

Running Your Code

Troubleshooting Playgrounds

Varying Variables and Printing to the Console

Adding Comments

You Are on Your Way!

Table of Contents

Bronze Challenge

Chapter 2 Types, Constants, and Variables

Types

Constants vs Variables

String Interpolation

Bronze Challenge

Part II. The Basics

Chapter 3 Conditionals

if/else

Ternary Operator

Nested ifs

else if

Bronze Challenge

Chapter 4 Numbers

Integers

Creating Integer Instances

Operations on Integers

Integer division

Operator shorthand

Overflow operators

Converting Between Integer Types

Floating-Point Numbers

Ranges of Numbers

Bronze Challenge

For the More Curious: Numeric Literals

Chapter 5 Switch

Switch Syntax

Ranges

Value binding

where clauses

Tuples and Pattern Matching

switch vs if/else

Bronze Challenge

Table of Contents

Silver Challenge

Chapter 6 Loops

for-in Loops

where

while Loops

repeat-while Loops

Control Transfer Statements in Loops

Silver Challenge

Chapter 7 Strings

Working with Strings

Characters

Unicode

Unicode scalars

Canonical equivalence

Counting elements

Indices and ranges

Bronze Challenge

Silver Challenge

For the More Curious: Substrings

For the More Curious: Multiline Strings

Part III. Collections and Functions

Chapter 8 Arrays

Creating an Array

Accessing and Modifying Arrays

Combining Arrays

Array Equality

Immutable Arrays

Documentation

Bronze Challenge

Silver Challenge

Chapter 9 Optionals

Optional Types

Optional Binding

Implicitly Unwrapped Optionals

Table of Contents

- Optional Chaining
- Modifying an Optional in Place
- The Nil Coalescing Operator
- Bronze Challenge
- Silver Challenge
- Gold Challenge

Chapter 10 Dictionaries

- Creating a Dictionary
- Accessing and Modifying Values
- Adding and Removing Values
- Looping over a Dictionary
- Immutable Dictionaries
- Translating a Dictionary to an Array
- Silver Challenge
- Gold Challenge

Chapter 11 Sets

- What Is a Set?
- Getting a Set
- Working with Sets
 - Unions
 - Intersections
 - Disjoint
- Moving Between Types
- Bronze Challenge
- Silver Challenge

Chapter 12 Functions

- A Basic Function
- Function Parameters
 - Parameter names
 - Default parameter values
 - In-out parameters
- Returning from a Function
- Nested Function Definitions and Scope
- Multiple Returns

Table of Contents

- Optional Return Types
- Exiting Early from a Function
- Function Types
- Bronze Challenge
- Silver Challenge
- For the More Curious: Void
- For the More Curious: Variadic Parameters

Chapter 13 Closures

- Closure Syntax
- Closure Expression Syntax
- Functions as Arguments
- Closures Capture Their Enclosing Scope
- Functional Programming
- Higher-Order Functions
 - `map(_:)`
 - `filter(_:)`
 - `reduce(_:_:)`
- Bronze Challenge
- Silver Challenge
- Gold Challenge
- For the More Curious: Functions as Return Types

Part IV. Enumerations, Structures, and Classes

Chapter 14 Enumerations

- Basic Enumerations
- Enumerations with Raw Values
- Methods
- Associated Values
- Bronze Challenge
- Silver Challenge
- For the More Curious: Recursive Enumerations

Chapter 15 Structs and Classes

- A New Project
- Structures

Table of Contents

Instance Methods

- Mutating methods

Classes

- A Monster class

- Inheritance

 - A Zombie subclass

 - Preventing overriding

 - The zombie problem

 - Polymorphism and type casting

Looking Ahead: What Is the Real Difference?

- Bronze Challenge

- Silver Challenge

- For the More Curious: Type Methods

Chapter 16 Properties

- Basic Stored Properties

- Nested Types

- Lazy Stored Properties

- Computed Properties

 - A getter and a setter

- Property Observers

- Type Properties

- Access Control

 - Controlling getter and setter visibility

- Bronze Challenge

- Silver Challenge

- Gold Challenge

- For the More Curious: Key Paths

Chapter 17 Initialization

- Initializer Syntax

- Struct Initialization

 - Default initializers for structs

 - Custom initializers for structs

 - Initializer delegation

- Class Initialization

 - Default initializers for classes

Table of Contents

Initialization and class inheritance

Automatic initializer inheritance

Designated initializers for classes

Convenience initializers for classes

Required initializers for classes

Deinitialization

Failable Initializers

A failable Town initializer

Initialization Going Forward

Silver Challenge

Gold Challenge

For the More Curious: Initializer Parameters

Chapter 18 Value vs Reference Types

Value Semantics

Reference Semantics

Constant Value and Reference Types

Using Value and Reference Types Together

Copying

Equality vs Identity

What Should I Use?

For the More Curious: Copy on Write

Part V. Advanced Swift

Chapter 19 Protocols

Formatting a Table of Data

Protocols

Protocol Conformance

Protocol Inheritance

Protocols as Types

Protocol Composition

Mutating Methods

Bronze Challenge

Silver Challenge

Electrum Challenge

Gold Challenge

Table of Contents

Chapter 20 Extensions

- Extending an Existing Type

- Extending Your Own Type

 - Using extensions to add protocol conformance

 - Adding an initializer with an extension

 - Nested types and extensions

 - Extensions with methods

- Bronze Challenge

- Silver Challenge

Chapter 21 Generics

- Generic Data Structures

- Generic Functions and Methods

- Type Constraints

- Associated Types

- Type Constraints in where Clauses

- Generic Composition and Opaque Types

- Bronze Challenge

- Silver Challenge

- Gold Challenge

- For the More Curious: Understanding Optionals

Chapter 22 Protocol Extensions

- Modeling Exercise

- Extending Exercise

- Self Types and Type Values

- Protocol Extension where Clauses

- Default Implementations with Protocol Extensions

- Implementation Conflicts

- Bronze Challenge

- Silver Challenge

- Gold Challenge

- For the More Curious: Polymorphism and Protocol-Oriented Programming

Chapter 23 Error Handling

- Classes of Errors

Table of Contents

Lexing an Input String

Catching Errors

Parsing the Token Array

Handling Errors by Sticking Your Head in the Sand

Swift Error-Handling Philosophy

Bronze Challenge

Silver Challenge

Gold Challenge

For the More Curious: Storing Failable Results for Later

Chapter 24 Memory Management and ARC

Memory Allocation

Strong Reference Cycles

Breaking Strong Reference Cycles with weak

Reference Cycles with Closures

Escaping and Non-Escaping Closures

Tin Challenge

Bronze Challenge

Gold Challenge

For the More Curious: A Bit of History

For the More Curious: Do I Have the Only Reference?

Chapter 25 Equatable, Comparable, and Hashable

Equatable

Infix operators

Buy one method, get another free!

Comparable

Protocol inheritance

Hashable

Custom hashing

Bronze Challenge

Silver Challenge

Gold Challenge

Platinum Challenge

For the More Curious: Custom Operators

Chapter 26 Property Wrappers

Table of Contents

Defining a Property Wrapper

 Additional configuration

Accessing the Wrapper Itself

Projecting Related Values

Bronze Challenge

Silver Challenge

Gold Challenge

Part VI. Writing Applications

Chapter 27 Command-Line Utilities

Introduction to the Command Line

Building the Word Finder

 Loading the words from disk

Retrieving Command-Line Arguments

Receiving Input Interactively

Running Your App from the Command Line

Parsing Command-Line Arguments with ArgumentParser

 Adding ArgumentParser to your project

 Declaring arguments for ArgumentParser to parse

Silver Challenge

Gold Challenge

Chapter 28 iOS and macOS Apps

Getting Started with TahDoodle

That is some View

Displaying Dynamic Data

Accepting User Input

 Sharing references to value-type data

 Interlude: Troubleshooting with property observers

Observing Changes to the Store

Saving and Loading User Data

Supporting macOS

Bronze Challenge

Silver Challenge

Gold Challenge

Chapter 29 Conclusion

Table of Contents

Where to Go from Here?

Shameless Plugs

An Invitation to the Community
