Where are the Lesson Files?

About the Authors

Acknowledgments

Contents

Getting Started

- About Classroom in a Book

- Prerequisites

- Installing the software

 - Adobe Creative Cloud desktop app

 - Classroom in a Book fonts

- Online content

 - Lesson files

 - Web Edition

 - Accessing the lesson files and Web Edition

- Saving and restoring the InDesign Defaults file

 - Moving the current InDesign Defaults file

 - Restoring the saved InDesign Defaults file

- Training resources

1 Introducing the Workspace

Table of Contents

Looking at the workspace

- Selecting and using tools
- Reviewing the Control panel
- Reviewing the Application bar
- Reviewing the document window and pasteboard
- Working with multiple document windows

Working with panels

- Opening and closing panels
- Expanding and collapsing panels
- Rearranging and customizing panels
- Moving the Tools panel and Control panel

Customizing the workspace

- Using the view commands
- Using the Zoom tool

Navigating through a document

- Navigating pages
- Using the Hand tool

Using context menus

Using panel menus

Modifying interface preferences

Exploring on your own

2 Getting to Know Indesign

Getting started

Viewing guides

Preflighting as you work

Adding text

- Typing and styling text
- Importing and flowing text

Table of Contents

Working with styles

- Applying paragraph styles

- Formatting text for the character style

- Creating and applying a character style

Working with graphics

Working with objects

- Moving and rotating an object

- Changing an objects stroke and fill

Working with object styles

- Viewing the document in Presentation mode

- Exploring on your own

3 Setting Up a Document and Working With Pages

Getting started

- Creating and saving custom document settings

- Creating a new document

Working with master pages

- Adding guides to the master page

- Dragging guides from rulers

- Step and repeat, paste, and delete guides

- Creating a text frame on the master page

- Renaming the master page

- Adding placeholder frames for text

- Adding placeholder frames for graphics

- Creating an additional master page

- Overriding master items

- Modifying a parent master

- Applying master pages to document pages

- Adding new document pages

Table of Contents

Rearranging and deleting document pages

Changing the size of pages within one InDesign file

Using the Measure tool

Adding sections to change page numbering

Overriding master page items and placing text and graphics

Replacing placeholder text

Printing to the edge of the paper: using the bleed guides

Viewing the completed spread

Exploring on your own

4 Working With Objects

Getting started

Working with layers

Creating and reordering layers

Move items to the Background layer

Creating and modifying text frames

Creating and resizing text frames

Reshaping a text frame

Creating multicolumn text frames

Adjusting text inset and vertical alignment

Creating and modifying graphics frames

Drawing a new graphics frame

Placing a graphic within an existing frame

Resizing a graphics frame to crop a graphic

Placing a graphic without an existing frame

Placing multiple graphics in a grid of frames

Resizing and moving images within frames

Adjusting the space between frames

Adding metadata captions to graphics frames

Table of Contents

Placing and linking graphics frames

- Modifying and updating parentchild graphics frames

Wrapping text around a graphic

Transforming the shape of frames

- Working with compound shapes

- Converting shapes

- Repeating shapes

- Adding rounded corners to frames

Transforming and aligning objects

- Rotating an object

- Rotating an image within its frame

- Aligning multiple objects

- Scaling multiple objects

- Transforming multiple objects

Selecting and modifying grouped objects

Drawing lines and modifying arrowheads

Creating a QR code

Finishing up

Exploring on your own

5 Flowing Text

Getting started

Flowing text into an existing frame

- Importing text into an existing text frame

- Applying a paragraph style

- Resizing text frames automatically

Flowing text manually

Creating text frames while flowing text

Creating threaded frames automatically

Table of Contents

Flowing text automatically

Applying paragraph styles to text

Adjusting columns

Using the baseline grid to align text

Viewing the baseline grid

Adding a jump line page number

Exploring on your own

6 Editing Text

Getting started

Finding and changing a missing font

Entering and importing text

Entering text

Importing text

Finding and changing text and formatting

Finding and changing text

Finding and changing formatting

Checking spelling

Checking spelling in the document

Adding words to a document-specific dictionary

Automatically correcting misspelled words

Editing text by dragging and dropping

Using the Story Editor

Tracking changes

Exploring on your own

7 Working With Typography

Getting started

Adjusting vertical spacing

Table of Contents

Changing the spacing between paragraphs

Working with fonts, type styles, and glyphs

Adding a font from Adobe Fonts

Adding a special character

Applying a stroke and fill to text

Inserting fraction characters

Working with columns

Specifying columns for a text frame

Creating a straddle head

Adjusting columns

Changing paragraph alignment

Hanging punctuation outside the margin

Creating a drop cap

Adjusting letter and word spacing

Adjusting the tracking and kerning

Adjusting line breaks

Hyphenation settings

Inserting a manual line break

Setting tabs

Aligning text to tabs and adding tab leaders

Creating a numbered list with a hanging indent

Working with paragraph shading and rules

Applying shading to a paragraph

Applying a rule to a paragraph

Exploring on your own

8 Working With Color

Getting started

Managing color

Table of Contents

- The need for color management
- Displaying images at full resolution
- Specifying color settings in InDesign
- Proofing colors onscreen

Defining printing requirements

- Loading a preflight profile
- Selecting a preflight profile
- Converting a color mode for a swatch

Creating colors

- Creating a PANTONE color swatch
- Creating CMYK color swatches

Applying colors

- Applying fill colors to objects
- Applying colors to strokes
- Applying colors to text

Working with tint swatches

- Creating a tint swatch
- Applying a tint swatch

Working with gradients

- Creating a gradient swatch
- Applying a gradient swatch
- Adjusting the direction of the gradient blend

Working with color groups

- Adding colors to a color group
- Previewing the final document

Exploring on your own

- Creating a color theme
- Viewing color themes
- Adding a theme to the Swatches panel

Table of Contents

Adding a color theme to your CC Library

9 Working With Styles

Getting started

Creating and applying paragraph styles

Creating a paragraph style

Applying a paragraph style

Creating and applying character styles

Creating a character style

Applying a character style

Nesting character styles inside paragraph styles

Creating character styles for nesting

Creating a nested style

Creating and applying object styles

Formatting an object for a style

Creating an object style

Applying an object style

Creating and applying table and cell styles

Creating cell styles

Creating a table style

Applying a table style

Globally updating styles

Loading styles from another document

Finishing up

Exploring on your own

10 Importing and Modifying Graphics

Getting started

Adding graphics from other programs

Comparing vector and bitmap graphics

Table of Contents

Managing links to imported files

- Identifying imported images

- Viewing information about linked files

- Showing files in Explorer (Windows) or Finder (macOS)

Updating revised graphics

Adjusting display quality

Importing and sizing graphics

- Import, size, and crop

- Place a graphic into an existing frame and use frame fitting options

- Place a graphic into an existing frame by dropping from the desktop

- Using Adobe Bridge to import graphics

Editing placed pictures

Working with dropped backgrounds

- Working with clipping paths from Photoshop in InDesign

- Working with transparent backgrounds from Photoshop in InDesign

Importing native Adobe graphic files

- Working with a Photoshop file with layers

- Creating an anchored graphics frame

- Adding text wrap to an anchored graphics frame

- Importing an Illustrator file

- Importing an Illustrator file with layers

Using an InDesign library to manage objects

- Creating an InDesign library

Exploring on your own

11 Creating Tables

- Getting started

- Creating a table

- Converting text to a table

Table of Contents

Changing rows and columns

- Adding and deleting rows

- Deleting rows

- Rearranging rows and columns

- Adjusting column widths, row heights, and text placement

- Merging cells

Formatting a table

- Adding a fill pattern

- Applying a fill color to cells

- Editing cell strokes

- Adding table borders

Adding graphics to table cells

- Converting cells to graphic cells

- Placing images in graphic cells

- Adjusting the row heights

- Anchoring graphics in table cells

Creating a header row

Creating and applying table and cell styles

- Creating table and cell styles

- Applying table and cell styles

Exploring on your own

12 Working With Transparency

Getting started

Importing and colorizing a grayscale image

Applying transparency settings

- About the Effects panel

- Changing the opacity of solid-color objects

- Applying a blending mode

Table of Contents

Adding transparency effects to imported vector and bitmap graphics

- Applying transparency to a vector graphic

- Applying transparency to a bitmap graphic

Importing and adjusting Illustrator files that use transparency

Applying transparency settings to text

Working with effects

- Applying a basic feather to the edges of an image

- Applying a gradient feather

- Adding a drop shadow to text

- Applying multiple effects to an object

- Copying effects between objects

- Editing and removing effects

Exploring on your own

13 Printing and Exporting

Getting started

Preflighting files

Previewing separations

Managing colors

- Using the Ink Manager

Previewing transparency effects

Previewing the pages

Creating an Adobe PDF proof

Creating a press-ready PDF and saving a PDF preset

- Sharing a preset

Printing a proof and saving a print preset

- Print Booklet

Packaging files

Exploring on your own

Table of Contents

14 Creating Adobe PDF Files With Form Fields

- Getting started

- Set up a workspace for forms

- Adding form fields

 - Adding text fields

 - Adding either/or choices: radio buttons

 - Adding yes or no choices: check boxes

 - Adding a list of choices: combo box

- Setting the tab order of the fields

- Adding a button to submit the form

- Exporting an interactive Adobe PDF file

- Testing your form in Adobe Acrobat Reader

- Exploring on your own

15 Creating A Fixed-Layout Epub

- Getting started

- Creating a new document for fixed-layout export

- EPUB: Reflowable versus fixed-layout

- Adding animation

 - Using a motion preset to create animation

 - Adjusting the timing of animations

- Buttons

 - Using buttons to play animations

 - Using a button to trigger custom motion paths for animations

 - Creating a navigation button

 - Creating a pop-up caption

- Adding multimedia and interactive elements

 - Adding a movie

 - Adding a sound

Table of Contents

Creating a slideshow

Creating a hyperlink

Exporting an EPUB file

Exploring on your own

Timing animations

Adding sound control buttons

Creating a slide-in caption

Index
