About the Authors

Abbreviations Used in This Book

PART I: Overview

1 Business Need for SAFe

Why Do Businesses Need SAFe?

The Challenge of System Development

Applying New Bodies of Knowledge

Improving System Development Outcomes

The Business Benefits of SAFe

Summary

2 SAFe Overview

The Big Picture

The Configurations

Table of Contents

The Spanning Palette

The Foundation

Summary

PART II: Mindset, Principles, and Leadership

3 Lean-Agile Mindset

Overview

Thinking Lean

Applying the Agile Manifesto at Scale

Summary

4 SAFe Principles

Why Focus on Principles?

Principle #1: Take an Economic View

Principle #2: Apply Systems Thinking

Principle #3: Assume Variability; Preserve Options

Principle #4: Build Incrementally with Fast, Integrated Learning Cycles

Principle #5: Base Milestones on Objective Evaluation of Working Systems

Principle #6: Visualize and Limit WIP, Reduce Batch Sizes, and Manage Queue Lengths

Principle #7: Apply Cadence; Synchronize with Cross-Domain Planning

Principle #8: Unlock the Intrinsic Motivation of Knowledge Workers

Principle #9: Decentralize Decision-Making

Summary

5 Lean-Agile Leaders

Exhibit the Lean-Agile Mindset

Lead the Change

Know the Way and Emphasize Lifelong Learning

Develop People

Inspire and Align with Mission. Minimize Constraints

Decentralize Decision-Making

Table of Contents

Unlock the Intrinsic Motivation of Knowledge Workers
Evolve the Development Manager Role
Adopt a Servant-Leadership Approach
Evolve the Partnership with Human Resources Management
On the Future of Leadership
Summary

PART III: Essential SAFe

6 The Agile Release Train

Overview
ART Organization
Develop on Cadence. Release on Demand
Vision
Features
Program Backlog
Roadmap
Agile Teams Power the Train
User Stories and the Team Backlog
Summary

7 Planning a Program Increment

Overview
Preparation for the PI Planning Event
Day 1: Create and Review Draft Plans
Day 2: Finalize Plans and Commit
Summary

8 Iterating

Overview
The Iteration Cycle
Building Quality In
Improving Team Flow with Kanban

Table of Contents

Summary

9 Executing the Program Increment

Overview

Introducing the Continuous Delivery Pipeline

Enabling Continuous Delivery with DevOps

Enabling Continuous Delivery with Architectural Runway

Managing Continuous Delivery with the Program Kanban

Supporting Continuous Delivery with Program Events

Summary

10 Inspect and Adapt

Overview

PI System Demo

Quantitative Measurement

Retrospective and Problem-Solving Workshop

Inspect and Adapt at the Large Solution Level

Summary

PART IV: Large Solution SAFe

11 Large Solution SAFe Overview

Overview

The Solution Train

Solution Intent

Capabilities and the Solution Backlog

Solution Epics

Economic Framework

Applying Large Solution Elements to Other Configurations

Summary

12 Defining Large and Complex Solutions

Overview

The Solution

Table of Contents

Solution Intent

Solution Context

Summary

13 Solution Train Execution

Overview

Pre-PI Planning

ART PI Planning

Post-PI Planning

Frequent Solution Integration

Solution Train Sync

Solution Demo

Solution Train Inspect and Adapt

Summary

PART V: Portfolio SAFe

14 Lean Portfolio Management

Introduction

Strategy and Investment Funding

Agile Portfolio Operations

Lean Governance

Summary

15 Strategy and Investment Funding

Introduction

Connect the Portfolio Strategy to the Enterprise Strategy

Establish Portfolio Flow

Summary

16 Agile Portfolio Operations

Introduction

Support an Agile PMO, LACE, and RTE and Scrum Master Communities of Practice

Table of Contents

Coordinate Value Streams

Sustain and Improve

Summary

17 Lean Governance

Introduction

Forecast and Budget Dynamically

Measure Portfolio Performance

Capitalization of Agile Software Development

Governance via Agile Contracts

Coordinate Continuous Compliance

Summary

PART VI: Implementing SAFe

18 The Guiding Coalition

Introduction

Step 1. Reach the Tipping Point

Step 2. Train Lean-Agile Change Agents

Step 3. Train Executives, Managers, and Leaders

Step 4. Create a Lean-Agile Center of Excellence

Summary

19 Designing the Implementation

Introduction

Step 5. Identify Value Streams and Agile Release Trains

Step 6. Create the Implementation Plan

Summary

20 Implementing Agile Release Trains

Introduction

Step 7. Prepare for the ART Launch

Step 8. Train Teams and Launch the ART

Step 9. Coaching ART Execution

Table of Contents

Summary

21 Launching More ARTs and Value Streams; Extending to the Portfolio

Introduction

Step 10. Launch More ARTs and Value Streams

Step 11. Extend to the Portfolio

Leading the Transformation

Summary

22 Sustaining and Improving

Introduction

Foster Relentless Improvement and the Lean-Agile Mindset

Implement Agile Human Resources Practices

Advance Program Execution and Servant Leadership Skills

Measure and Take Action

Improve Agile Software Engineering Practices

Focus on Agile Architecture

Improve DevOps and Continuous Delivery

Reduce Time-to-Market with Value Stream Mapping

Summary

Conclusion and Moving Forward
