Chapter 1 Manage identity and compliance

Skill 1.1: Add devices to Microsoft Entra ID

Implement identity solutions

Choose an appropriate device join type

Register devices to Microsoft Entra ID

Join devices to Microsoft Entra ID

Perform device management tasks

Synchronize devices to Entra ID

Plan and implement groups for devices in Microsoft Entra ID

# **Table of Contents**

## **Skill 1.2: Enroll devices to Microsoft Intune**

- Configure enrollment settings

- Configure automatic enrollment for Windows and bulk enrollment for iOS and Android

- Configure enrollment profiles for Android devices, including fully managed, dedicated, corporate-owned, and work profile

- Enroll devices

## **Skill 1.3: Implement identity and compliance**

- Manage roles in Intune

- Implement compliance policies for all supported device platforms by using Intune

- Implement conditional access policies that require a compliance status

- Manage the membership of local groups on Windows devices

- Implement and manage LAPS for Entra ID

- Implement user authentication

- Synchronizing on-premises identities to Entra ID

- Configure Windows Hello for Business

## **Chapter summary**

## **Thought experiment**

- Scenario 1

- Scenario 2

## **Thought experiment answers**

- Scenario 1

- Scenario 2

## **Chapter 2 Manage and maintain devices**

### **Skill 2.1: Deploy and upgrade Windows clients by using cloud-based tools**

- Choose between Windows Autopilot and provisioning packages

- Plan and implement provisioning packages

- Plan and implement device upgrades for Windows 11

- Plan and Implement Windows Autopilot

# **Table of Contents**

Create an Enrollment Status Page

Implement Windows client deployment by using Windows Autopilot

Implement a Windows 365 Cloud PC deployment

## **Skill 2.2: Plan and implement device configuration profiles**

Plan device configuration profiles

Implement configuration profiles

Configure policy sets

Monitor and troubleshoot configuration profiles

## **Skill 2.3: Implement Intune Suite add-on capabilities**

Configure Endpoint Privilege Management

Manage applications by using the Enterprise App Catalog

Implement Microsoft Intune Advanced Analytics

Configure Microsoft Intune Remote Help

Identify use cases for Cloud PKI

Implement Microsoft Tunnel for MAM

## **Skill 2.4: Perform remote actions on devices**

Sync, restart, retire, or wipe devices

Implement Windows Admin Center

Implement PowerShell remoting and Windows Remote Management (WinRM)

## **Chapter summary**

### **Thought experiment**

Scenario 1

Scenario 2

Scenario 3

Scenario 4

### **Thought experiment answers**

Scenario 1

Scenario 2

Scenario 3

# **Table of Contents**

Scenario 4

## **Chapter 3 Manage applications**

### **Skill 3.1: Deploy and update apps**

Prepare applications for deployment by using Intune

Deploy apps by using Intune

Deploy Microsoft 365 Apps as part of a Windows Autopilot deployment by using the Microsoft Office Deployment Tool (ODT) or Office Customization Tool (OCT)

Manage Microsoft 365 Apps by using the Microsoft 365 Apps admin center

Deploy Microsoft 365 Apps by using Intune

Configure policies for Office apps

Deploy apps to platform-specific app stores by using Intune

Enable sideloading of apps

### **Skill 3.2: Plan and implement app protection and app configuration policies**

Plan and Implement App Protection policies

Implement conditional access policies for app protection policies

Plan and implement app configuration policies for managed apps and managed devices

### **Chapter summary**

### **Thought experiment**

Scenario 1

Scenario 2

### **Thought experiment answers**

Scenario 1

Scenario 2

## **Chapter 4 Protect devices**

### **Skill 4.1: Configure endpoint security**

Create disk encryption policies

Create antivirus policies

# **Table of Contents**

Create firewall policies

Implement additional security features in Windows

Plan and implement security baselines in Intune

Configure attack surface reduction policies

Integrate Intune with Microsoft Defender for Endpoint

Onboard devices into Microsoft Defender for Endpoint

Implement automated response capabilities in Defender for Endpoint

Review the Microsoft Defender Vulnerability Management dashboard

## **Skill 4.2: Manage device updates by using Intune**

Plan for device updates

Create and manage update rings by using Intune

Configure Windows client delivery optimization by using Intune

Create and manage update policies by using Intune, including iOS and macOS

Manage Android updates by using configuration profiles or FOTA deployments

Monitor updates

Troubleshoot updates

## **Chapter summary**
