About the Authors

Part I: Foundational Concepts

1 Organizing for Adaptability

Hello, VUCA World!

What Is an Agile Organization Design?

What Does Your Organization Optimize For?

Optimization Goals and Indirect Wishes

Optimizing Goals of an Agile Organization

Typical Problems When Adopting Agility

The Functional Hierarchy Organization Design

Avoid CopyPaste Scaling: A Typical Scaling Approach

Overview of an Agile Organization Design

Table of Contents

What Is an Agile Team?

Structural Characteristics

Summary

References

2 Systems Thinking

Basics of Systems Thinking

Two Systems

When to Apply Systems Thinking and Which Problem Does It Solve?

Systems and Collections

Organizations as Complex Social Systems

Linear and Systems Thinking

Define the Boundary of the System Wisely

Work on the System

Iceberg of Systems Thinking

Analyzing the Current Situation

Organizational Learning and Creative Tension

Applying Systems Thinking

Causal Loop Diagram

A CLD Example

Shared Responsibility

Doom Loop Technique

Example: Using the Doom Loop Technique

Optimize the Whole

System Archetypes

Summary

References

3 Optimize for Adaptiveness

What It Means to Be Adaptable

Flow Efficiency

Behavior of Queues

Relationships Among Utilization, Cycle Time, and Variability

Queues Create Waste

Table of Contents

Balancing Excess Capacity with the Cost of Delay

Relationships Among Utilization, Batch Size, and Cycle Time

One-Piece Continuous Flow

Queueing System Structures

Applying Queueing Structure to Agile Product Development

Algorithm for Dealing with Queues

Choose an Operational Strategy

Resource Efficiency

Flow Efficiency

Summary

References

4 Agile Organizational Design

Why Organizational Redesign?

Business Strategy Drives Organizational Design

Overview of a Design Process

Agile Organization Design Guidelines

Structural Guidelines

Process and Integration Guidelines

People Guidelines

Agile vs. Traditional Human Resources Management

Summary

References

5 An Agile Adoption Approach

Principles of an Agile Adoption

Overview of an Adoption Approach

A Birds-Eye View of Adoption Activities

Overarching Adoption Guidelines

Form a Leading Group

Align Leadership on the Strategic Focus

Create Basic Conditions for Success

Learn Fast and Expand Change

Table of Contents

Start with a Discontinuous Improvement Step

Avoid Providing the Answer Before You Know the Question

Applying Systems Thinking in Organizational Coaching

Agree on a Common System Optimization Goal

Address Secondary Concerns Without Compromising the System Goal

Have an Intermediate Improvement Goal and Perfection Vision

Planning Organizational Interventions

Summary

References

6 Coaching for Change

Guideline 1: Influence People

Use Corridor Politics

Show Personal Benefits

Build Rapport

Reach for Connectors

Guideline 2: Co-Create the Change

Guideline 3: Voluntary Participation

Get the Right People on the Bus and off the Bus

What It Means to Be a Volunteer

Nonviolent Education

What If You Don't Have Volunteers?

Guideline 4: Acknowledge the Loss

Beware of the Loss Aversion Bias

Guideline 5: Deliver the Message Continually

Guideline 6: Help People to Cross the Edge

Guest Visit

Create Edge Awareness

Honor the Past

Guideline 7: Axes of Change

All Components of the Strategy Are Important

The Four Axes of Change Model

Applying the Axes of Change to Teams

Table of Contents

Guideline 8: Find the Right Balance of Radical/Incremental Change

- Create a Change Roadmap

- Dissolve the Problems Instead of Solving Them

- Summary

- References

Part II: Applying the Concepts

7 Group Facilitation

Principles of Facilitation

- The Role of the Facilitator

- Meeting Goals

- Workshop Plan

- Ground Rules

- Consensus

- Parking Lot

- Track and Prioritize Ideas

- Dealing with Specific Behaviors

Workshop Design

- The Plan Goes Awry

- The Magic of Engagement

- What Is a Serious Game?

- The Flow of the New Workshop

- The New Design Worked

- How to Design Your Workshop

Facilitating Scrum Events

- Facilitating Sprint Planning

- Facilitating Product Backlog Refinement

- Facilitating Multi-Team Sprint Review

- Facilitating a Multi-Team Retrospective

- Summary

- References

8 Preparing the Product Group

- Areas of Concern for Successful Preparation

Table of Contents

Area 1: Involve the Managers

- Educating Management to Change Their Mental Models

- Education Objectives

- Getting Sufficient Managers Support

Area 2: Understand the Current Reality

- Go See

- Individual Interviews

- Value Stream Mapping

- Scott Morton Diagram

- Weighted SWOT and Confrontation Matrix

- Finding System Structures Workshop

- Aligning on the Go See Results with the Systems Model

Area 3: Create a Vision of the Future

- Alignment Workshops

- Shared Team Expectations Workshop

- Shared Optimizing Goals Workshop

- Perfection Vision Workshop

- Progress So Far

Area 4: Identify the Product Group

- Organize for Value Delivery

- What About Internal Products?

- Product Definition from Different Perspectives

- Where Does the Product Definition Fit in Your Transformation?

- How to Define the Product

Organizational Design to Eliminate Dependencies

- Start with the Product Features

- Using the Hotspots to Design Your Group

Summary

References

9 Launching the Product Group

Menu of Available Choices

- Who Owns the Launching Process?

Table of Contents

How Much Time Should It Take?

Initial Product Backlog Refinement

Try Features on the Product Backlog

How to Represent Features

Example of Creating an Initial Product Backlog with Product Goals and Sprint Goals

Define the Definition of Done

Component Team Velocity?

A Definition of Done Workshop

Feature Team Adoption Map

Choose Subsystem Names Close to the Customer Domain

Ordering the Components and DoD Activities

A Feature Team Adoption Map Workshop

Self-Designing Team Workshop

Consider a Market of Skills Workshop as Preparation

A Self-Designing Team Workshop

Team Lift-Off

The Lift-Off to Lay the Foundation for Success

Your Role as a Scrum Master

Discover a Shared Purpose

Align on Shared Values and Behavior

Facilitating Decision Making

Identify and Launch Communities

Identify Coordination Mechanisms

Create Useful Checklists

Sprint Goal Checklist

Underutilization Checklist

Emergent Work Checklist

Summary

References

10 Coaching Teams

The Building Blocks of the Agile Organization

Observations of an Agile Team

Table of Contents

What Makes an Agile Team?

What You Can Do to Help a Group Become a Team

Building on the Team Lift-Off: Coaching Multifunctional Learning

Individual and Team Performance

Multifunctional Learning and Agility

Optimizing Value and Multifunctional Learning

Culture of Narrow Specialists

How to Optimize for Multifunctional Learning

Coaching Multifunctional Learning Summary

Dealing with Recurrent Complex Problems in Teams: Systems Team Coaching

Insights from Systems Coaching

Perform Circular Observations to Identify Patterns of Interactions

Teams System Assessment

Improving Team Dynamics: Trust

ORID: Focused Discussion

Radical Candor

Facilitating Conflict

Facilitate Feedback Loops for Learning: Learning New Practices

Step 1: Determine Your Goal

Step 2: Create Specific Actions

Step 3: Define Measures That Drive Learning

Summary

References

11 Guiding the Product Ownership

What Makes a Team Product Owner?

Avoid Product-Part Owners

Replace Product-Part Owners with a Real Product Owner

How to Promote the Team Product Owner to Team Member

The Product Owner in a Senior Position

Avoid Product Owner Committees

Outward-Focused Product Owner

Workshop to Separate Product Owner Activities from General Managerial Activities

Table of Contents

Product Ownership Measures

- Measuring Business Impact
- What About Budgets and Costs?
- Measuring Team Performance
- Measuring Product Qualities

Customer Understanding

- Validate Assumptions Early and Often

The Product Owner Process

- Serious Games for Customer Understanding

Stakeholder Alignment

- Align on the Product Vision
- Consider Co-Creating the Product Vision
- Align on the Objectives

Product Owner Leadership

- Try to Keep the Teams Stable
- Reliable Forecasts
- Avoid Micromanaging the Team
- Collaborate as a Peer with the Teams
- Stakeholder Committees
- Connect the Teams with Users
