About the Authors

Chapter 1 Getting Started

Purpose of This Book

Do You Need This Book?

How This Book Is Organized

No Time to Lose: Off You Go!

Chapter 2 First Aid Kit

Part I: (Zombie) Scrum

Chapter 3 A Primer on Zombie Scrum

The State of Scrum

Zombie Scrum

Symptom 1: Zombie Scrum Teams Dont Know the Needs of Their Stakeholders

Symptom 2: Zombie Scrum Teams Dont Ship Fast

# Table of Contents

Symptom 3: Zombie Scrum Teams Dont Improve (Continuously)

Symptom 4: Zombie Scrum Teams Dont Self-Organize to Overcome Impediments

Its All Connected

Isnt This Just Cargo Cult Scrum or Dark Scrum?

Is There Hope for Zombie Scrum?

Experiment: Diagnose Your Team Together

Steps

Our Findings

Now What?

## Chapter 4 The Purpose of Scrum

Its All about Complex Adaptive Problems

Problems

Complex, Adaptive Problems

Complexity, Uncertainty, and Risk

Empiricism and Process Control Theory

Empiricism and the Scrum Framework

What the Scrum Framework Makes Possible

Scrum: An Evolving Set of Minimal Boundaries to Work Empirically

Zombie Scrum and the Efficiency Mindset

What about Simple Problems?

Now What?

## Part II: Build What Stakeholders Need

### Chapter 5 Symptoms and Causes

Why Bother Involving Stakeholders?

Who Are the Stakeholders, Actually?

Validating Assumptions about Value

Why Are We Not Involving Stakeholders?

We Dont Really Understand the Purpose of Our Product

We Make Assumptions about What Stakeholders Need

We Create Distance between Developers and Stakeholders

# Table of Contents

- We See Business and IT As Separate Things
- We Dont Allow Product Owners to Actually Own the Product
- We Measure Output over Value
- We Believe That Developers Should Only Write Code
- We Have Stakeholders Who Dont Want to Be Involved

## Healthy Scrum

- Who Should Get to Know the Stakeholders?
- When to Involve Stakeholders

## Now What?

## Chapter 6 Experiments

### Experiments: Getting to Know Your Stakeholders

- Start a Stakeholder Treasure Hunt
- Create Transparency with the Stakeholder Distance Metric
- Give the Stakeholder a Desk Close to the Scrum Team
- Decorate the Team Room with the Product Purpose

### Experiments: Involving Stakeholders in Product Development

- Invite Stakeholders to a Feedback Party
- Go on a User Safari
- Guerrilla Testing

### Experiments: Keeping Your Focus on What Is Valuable

- Limit the Maximum Length of Your Product Backlog
- Map Your Product Backlog on an Ecocycle
- Express Desired Outcomes, Not Work to Be Done

## Now What?

## Part III: Ship It Fast

## Chapter 7 Symptoms and Causes

### The Benefits of Shipping Fast

- Complexity in Your Environment
- Complexity in Your Product

### The Bottom Line: Not Shipping Fast Is a Sign of Zombie Scrum

- Why Are We Not Shipping Fast Enough?
- We Dont Understand How Shipping Fast Reduces Risk

# Table of Contents

We Are Impeded by Plan-Driven Governance

We Don't Understand the Competitive Advantage of Shipping Fast

We Don't Remove Impediments to Shipping Fast

We Work on Very Large Items during a Sprint

## Healthy Scrum

Deciding to Release (or Not)

Releasing Is No Longer a Binary Action

Shipping during a Sprint

No More Big-Bang Releases

## Now What?

## Chapter 8 Experiments

### Experiments to Create Transparency and Urgency

Make a Business Case for Continuous Delivery

Measure Lead and Cycle Times

Measure Stakeholder Satisfaction

### Experiments for Starting Shipping More Often

Take the First Steps to Automating Integration and Deployment

Evolve Your Definition of Done

Ship Every Sprint

Ask Powerful Questions to Get Things Done

### Experiments for Optimizing Flow

Increase Cross-Functionality with a Skill Matrix

Limit Your Work in Progress

Slice Your Product Backlog Items

## Now What?

## Part IV: Improve Continuously

### Chapter 9 Symptoms and Causes

#### Why Bother Improving Continuously?

What Is Continuous Improvement?

Continuous Improvement or Agile Transformation?

#### Why Are We Not Improving Continuously?

# Table of Contents

In Zombie Scrum, We Dont Value Mistakes

In Zombie Scrum, We Dont Have Tangible Improvements

In Zombie Scrum, We Dont Create Safety to Fail

In Zombie Scrum, We Dont Celebrate Success

In Zombie Scrum, We Dont Recognize the Human Factors of Work

In Zombie Scrum, We Dont Critique How We Do Our Work

In Zombie Scrum, We Consider Learning and Work As Different Things

## Healthy Scrum

Self-Critical Teams

See the Forest and the Trees, Together

## Now What?

## Chapter 10 Experiments

### Experiments for Encouraging Deep Learning

Share an Impediment Newsletter throughout the Organization

Ask Powerful Questions during Sprint Retrospectives

Dig Deeper into Problems and Potential Solutions, Together

### Experiments for Making Improvements Tangible

Create 15% Solutions

Focus on What to Stop Doing

Create Improvement Recipes

### Experiments for Gathering New Information

Use Formal and Informal Networks to Drive Change

Create a Low-Tech Metrics Dashboard to Track Outcomes

### Experiments to Create a Learning Environment

Share Success Stories and Build on What Made Them Possible

Bake a Release Pie

## Now What?

## Part V: Self-Organize

### Chapter 11 Symptoms and Causes

#### Why Bother Self-Organizing?

What Is Self-Organization?

Self-Organization through Simple Rules

# Table of Contents

Self-Organization through Self-Management

Self-Organization Is a Survival Skill in a Complex World

The Bottom Line

## Why Are We Not Self-Organizing?

In Zombie Scrum, We Are Not Self-Managing Enough

In Zombie Scrum, We Use Off-the-Shelf Solutions

In Zombie Scrum, Scrum Masters Keep Resolving All Impediments

In Zombie Scrum, Scrum Masters Focus Only on Scrum Team(s)

In Zombie Scrum, We Have No Goals or They Are Imposed

In Zombie Scrum, We Don't Use the Environment As External Memory

In Zombie Scrum, We Are Impeded by Standardization

## Healthy Scrum: What Self-Organization Looks Like

Scrum Teams Have Product Autonomy

Management Supports Scrum Teams

## Now What?

## Chapter 12 Experiments

### Experiments to Increase Autonomy

Make the Cost of Low Autonomy Transparent with Permission Tokens

Find Actions That Boost Both Integration and Autonomy

Break the Rules!

### Experiments to Encourage Self-Organization

Find a Minimum Set of Rules for Self-Organization

Express Clear Requests for Help

Observe What Is Happening

### Experiments to Promote Self-Alignment

Create Better Sprint Goals with Powerful Questions

Use a Physical Scrum Board

### Find Local Solutions

Organize Scrum Master Impediment Gatherings

Develop Local Solutions with Open Space Technology

## Now What?

## Chapter 13 The Road to Recovery

# **Table of Contents**

A Global Movement

What If Nothing Helps?
