Preface

Contents at a Glance

Contents

Part I: Computer-Aided Design (CAD) Basics

Chapter 1 Getting Started

1.1 Introduction

1.2 Engineering Design Process

1.3 CAD Process

1.4 Manufacturing Process

1.5 CAM Process

1.6 SolidWorks Installation and Resources

1.7 SolidWorks Overview

1.8 Customize SolidWorks

1.9 Modeling Plan

1.10 Part Creation

1.11 Examples

1.12 Tutorials

Tutorial 11 Create a Flap

Tutorial 12 Create a Pin and Bushing Bearing

Tutorial 13 Create a Pillow Block

Tutorial 14 Create Drawings

Tutorial 15 Create an Assembly

Problems

Chapter 2 Modeling Management

2.1 Overview

2.2 Types of CAD Models

2.3 Planning Part Creation

Table of Contents

- 2.4 Part Topology
- 2.5 Parametric Modeling
- 2.6 Customizing SolidWorks
- 2.7 Productivity Tools
- 2.8 Coordinate Systems
- 2.9 Sketch Planes
- 2.10 Sketch Status
- 2.11 Part Feature Tree
- 2.12 Construction Geometry
- 2.13 Reference Geometry
- 2.14 Sketch Entities
- 2.15 Sketch Relations
- 2.16 Equations and Link Values
- 2.17 Geometric Modifiers
- 2.18 Grids
- 2.19 Patterns
- 2.20 Selecting, Editing, and Measuring Entities
- 2.21 Boolean Operations
- 2.22 Templates
- 2.23 Viewing
- 2.24 Model Communication
- 2.25 Tutorials
 - Tutorial 21 Create a Coil Spring
 - Tutorial 22 Create a Mount Plate
 - Tutorial 23 Create a Bracket
 - Tutorial 24 Create a Wheel
 - Tutorial 25 Create a Tire and a Pin
 - Tutorial 26 Create a Caster Assembly
- Problems

Chapter 3 Design Intent

- 3.1 Introduction
- 3.2 Capturing Design Intent
- 3.3 Documenting Design Intent
- 3.4 Comments
- 3.5 Design Binder
- 3.6 Equations
- 3.7 Design Tables and Configurations

Table of Contents

3.8 Dimension Names

3.9 Feature Names

3.10 Folders

3.11 Tutorials

Tutorial 31 Design Intent via Two Modeling Plans

Tutorial 32 Design Intent via Three Modeling Plans

Tutorial 33 Design Intent via Design Specifications

Tutorial 34 Design Intent via Mating Conditions

Problems

Part II: Basic Part Modeling

Chapter 4 Features and Macros

4.1 Introduction

4.2 Features

4.3 Spur Gears

4.4 Design Library and Library Features

4.5 Configurations and Design Tables

4.6 Macros

4.7 Tutorials

Tutorial 41 Create Sweep Features

Tutorial 42 Create Loft Features

Tutorial 43 Use the Hole Wizard

Tutorial 44 Create Compression Spring

Tutorial 45 Create Spiral

Tutorial 46 Create Features

Tutorial 47 Use the Smart Fasteners Wizard

Tutorial 48 Create a Bolt

Problems

Chapter 5 Drawings

5.1 Introduction

5.2 Engineering Drafting and Graphics Communication

5.3 ASME Abbreviation Rules

5.4 ASME Drafting Rules

5.5 ASME Dimensioning Rules

5.6 Dimensions

5.7 Drawing Content and Layout

5.8 Angles of Projection

5.9 Views

Table of Contents

- 5.10 Sheets
- 5.11 Title Blocks
- 5.12 Drafting Control
- 5.13 Tolerances
- 5.14 Bills of Materials
- 5.15 Model and Drawing Associativity
- 5.16 Design Checker
- 5.17 Tutorials
 - Tutorial 51 Create Drawing Views
 - Tutorial 52 Insert Annotations
 - Tutorial 53 Fill Title Block
 - Tutorial 54 Create Assembly Drawing with Bill of Materials
 - Tutorial 55 Use Model-Drawing Associativity
- Problems

Chapter 6 Assemblies

- 6.1 Introduction
- 6.2 Assembly Mates
- 6.3 Bottom-Up Assembly Modeling
- 6.4 Top-Down Assembly Modeling
- 6.5 The Assembly Tree
- 6.6 Assembly Drawings
- 6.7 Assembly Exploded Views and Animations
- 6.8 Assembly Motion Study
- 6.9 Interference and Collision Detections
- 6.10 Assembly Design Tables
- 6.11 Tutorials
 - Tutorial 61 Create a Cam and a Follower Assembly
 - Tutorial 62 Create a Working Hinge Assembly
 - Tutorial 63 Mate Two Gears with a Gear Mate
 - Tutorial 64 Create a Functional Rack and Pinion
 - Tutorial 65 Create a Functional Ball Screw
 - Tutorial 66 Study Universal Joint Motion
 - Tutorial 67 Create a Motion Study
 - Tutorial 68 Detect Collision and Interference
 - Tutorial 69 Create a Design Table
 - Tutorial 610 Create a Part in the Context of an Assembly
- Problems

Table of Contents

Chapter 7 Rendering and Animation

- 7.1 Introduction
- 7.2 Scenes and Lighting
- 7.3 Rendering Models
- 7.4 Decals
- 7.5 Textures
- 7.6 Materials
- 7.7 Appearance and Transparency
- 7.8 Background and Scenes
- 7.9 Cameras and Camera Sleds
- 7.10 Animation
- 7.11 Tutorials
 - Tutorial 71 Apply Colors to Objects
 - Tutorial 72 Apply a Background and a Scene
 - Tutorial 73 Apply Lights to a Scene
 - Tutorial 74 Add Material and Transparency
 - Tutorial 75 Add a Camera to a Scene
 - Tutorial 76 Create a Motion Study
 - Tutorial 77 Create a Camera-Sled Based Animation
- Problems

Part III: Advanced Part Modeling

Chapter 8 Curves

- 8.1 Introduction
- 8.2 Curve Representation
- 8.3 Line Parametric Equation
- 8.4 Circle Parametric Equation
- 8.5 Spline Parametric Equation
- 8.6 Two-Dimensional Curves
- 8.7 Three-Dimensional Curves
- 8.8 Curve Management
- 8.9 Tutorials
 - Tutorial 81 Create a 2D Curve by Using an Explicit Equation
 - Tutorial 82 Create a 2D Curve by Using a Parametric Equation
 - Tutorial 83 Create a 3D Curve by Using a Parametric Equation
 - Tutorial 84 Create a 3D Curve by Using 3D Points
 - Tutorial 85 Create a 3D Curve by Using 3D Sketching
 - Tutorial 86 Create a 3D Curve by Using Composite Curves

Table of Contents

Tutorial 87 Create a 3D Curve by Projecting a Sketch onto a Curved Face

Tutorial 88 Create a 3D Curve Using Projected Curves

Tutorial 89 Create a Stethoscope Model

Problems

Chapter 9 Surfaces

9.1 Introduction

9.2 Surfaces

9.3 Using Surfaces in Solid Modeling

9.4 Surface Representation

9.5 Plane Parametric Equation

9.6 Ruled Surface Parametric Equation

9.7 Surface Visualization

9.8 Surface Management

9.9 Tutorials

Tutorial 91 Create Basic Surfaces: Extrude, Revolve, Loft, Sweep, Knit, and Radiate

Tutorial 92 Create Basic Surfaces: Planar, Filled, Boundary, and Offset

Tutorial 93 Visualize Surfaces

Tutorial 94 Create an Artistic Bowl

Tutorial 95 Use Surface Intersections

Tutorial 96 Create a Tablespoon

Tutorial 97 Create a Computer Mouse

Tutorial 98 Create a Baseball Hat

Tutorial 99 Create a Hair Dryer

Tutorial 910 Create an Oil Container

Problems

Chapter 10 Sheet Metal and Weldments

10.1 Introduction

10.2 Sheet Metal

10.3 Sheet Metal Features

10.4 Sheet Metal FeatureManager Design Tree

10.5 Sheet Metal Methods

10.6 Weldments

10.7 Weldment Features

10.8 Weld Symbols

10.9 Tutorials

Tutorial 101 Create Sheet Metal

Tutorial 102 Create a Sheet Metal Drawing

Table of Contents

Tutorial 103 Create a Sheet Metal Part from a Solid Body

Tutorial 104 Create a Sheet Metal Part from a Flattened State

Tutorial 105 Create a Weldment

Tutorial 106 Create a Weldment Drawing

Problems

Chapter 11 Sustainable Design

11.1 Introduction

11.2 Design and Society

11.3 Guidelines and Principles

11.4 Life Cycle Assessment

11.5 Impact Metric

11.6 Implementation

11.7 Design Activities

11.8 Sustainable Design Tools

11.9 SolidWorks Sustainability

11.10 Tutorials

Tutorial 111 Redesign a Steel Washer

Problems

Part IV: Part Development and Analysis

Chapter 12 Tolerances

12.1 Introduction

12.2 Tolerance Types

12.3 Tolerance Concepts

12.4 ASME Tolerance Rules

12.5 Tolerancing Tapers

12.6 Limits of Dimensions

12.7 Tolerance Accumulation

12.8 Statistical Tolerancing

12.9 True Position

12.10 Geometric Tolerances

12.11 Datum Target Symbols

12.12 Tolerance Interpretation

12.13 Tolerance Analysis

12.14 SolidWorks Tolerance Analysis

12.15 Tutorials

Tutorial 121 Create Conventional Tolerances

Tutorial 122 Create Geometric Tolerances

Table of Contents

Tutorial 123 Define Datum Targets

Tutorial 124 Tolerance a Taper

Tutorial 125 Perform Tolerance Stack-up Analysis

Problems

Chapter 13 Analysis Tools

13.1 Introduction

13.2 Data Exchange

13.3 Mass Properties

13.4 Animation and Motion Analysis

13.5 Flow Simulation

13.6 Finite Element Method

13.7 Finite Element Analysis

13.8 SolidWorks Simulation

13.9 Von Mises Stress

13.10 Tutorials

Tutorial 131 Export Native SolidWorks Files

Tutorial 132 Import IGES and STEP Files into SolidWorks

Tutorial 133 Calculate Mass Properties of a Solid

Tutorial 134 Perform Motion Analysis Using a Motor

Tutorial 135 Perform Static Linear FEA on a Part

Tutorial 136 Perform Thermal FEA on a Part

Tutorial 137 Perform Flow Analysis on a Hose

Problems

Part V: Part Manufacturing

Chapter 14 Rapid Prototyping

14.1 Introduction

14.2 RP Applications

14.3 RP Overview

14.4 RP Concepts

14.5 SolidWorks Triangulation

14.6 RP Steps

14.7 RP Building Techniques

14.8 Bottle Prototype

14.9 Tutorials

Tutorial 141 Generate Part Prototype File

Tutorial 142 Generate Assembly Prototype File

Tutorial 143 Read Back an STL File

Table of Contents

Problems

Chapter 15 Numerical Control Machining

15.1 Introduction

15.2 Basics of Machine Tools

15.3 Basics of Machining

15.4 Turning

15.5 Drilling

15.6 Milling

15.7 Electrical Discharge Machining

15.8 Manufacturing of Design

15.9 SolidWorks DFMXpress

15.10 Basics of NC Machining

15.11 G-Code and M-Code Programming

15.12 CAM Add-In Software

15.13 Tutorials

Tutorial 151 Drill Holes

Tutorial 152 Mill Faces

Tutorial 153 Mill Pockets

Tutorial 154 Mill Slots

Problems

Chapter 16 Injection Molding

16.1 Introduction

16.2 Basics of Injection Molding Machines

16.3 Basics of Injection Molding

16.4 Basics of Mold Design

16.5 Basics of Part Design

16.6 Phases of Mold Design

16.7 SolidWorks Mold Design

16.8 Tutorials

Tutorial 161 Create a Block Mold

Tutorial 162 Create a Sandbox Mold

Tutorial 163 Create a Hemisphere Mold

Tutorial 164 Create an Easter Egg Mold

Tutorial 165 Generate a Mold Drawing

Problems

Appendix A: ANSI and ISO Tolerance Tables

Table of Contents

Appendix B: SolidWorks Certification

- B.1 Certified SolidWorks Associate (CSWA)
- B.2 Certified SolidWorks Professional (CSWP)
- B.3 CSWPSurfacing
- B.4 CSWPSheet Metal
- B.5 CSWPWeldments
- B.6 CSWPSimulation
- B.7 CSWPMold Making
- B.8 Testing Resources
- B.9 Sample Test Questions

Index
