Do It Wrong Quickly **How the Web Changes the** **Old Marketing Rules**

by Mike Moran

ISBN: 0-13-225596-0

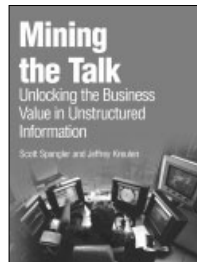

For decades, marketers have been taught to carefully plan ahead because “you must get it right — it’s too expensive to change.” But, in the age of the Web, you can know in hours whether your strategy’s working. Today, winners don’t get it right the first time: They start fast, change fast, and relentlessly optimize their way to success. They do it wrong quickly...then fix it, just as quickly!

In this book, Internet marketing pioneer Mike Moran shows you how to do that — step-by-step and in detail. Drawing on his experience building ibm.com into one of the world’s most successful sites, Moran shows how to quickly transition from “plan then execute” to a nonstop cycle of refinement.

You’ll master specific techniques for making the Web’s “two-way marketing conversation” work successfully, productively, and profitably. Next, Moran shows how to choose the right new marketing tools, craft them into an integrated strategy, and execute it...achieving unprecedented efficiency, accountability, speed, and results.

Mining the Talk **Unlocking the Business Value in** **Unstructured Information**

by Scott Spangler and Jeffrey Kreulen

ISBN: 0-13-233953-6

Two leading-edge IBM researchers introduce a revolutionary new approach to unlocking the business value hidden in virtually any form of unstructured data—from word processing documents to websites, e-mails to instant messages.

The authors review the business drivers that have made unstructured data so important—and explain why conventional methods for working with it are inadequate. Then they walk step-by-step through exploring your unstructured data, understanding it, and analyzing it effectively.
