Contents at a Glance

Contents

Introduction

CHAPTER 1: Different Types of Cloud Models

Cloud Deployment Models

Public Cloud

Private Cloud

Hybrid Cloud

Community Cloud

Cloud Within a Cloud

Multicloud

Multitenancy

Cloud Service Models

Infrastructure as a Service (IaaS)

Platform as a Service (PaaS)

Software as a Service (SaaS)

Advanced Cloud Services

Internet of Things (IoT)

Serverless

# **Table of Contents**

Machine Learning/Artificial Intelligence (AI)

Cloud Shared Responsibility Model

What Next?

## **CHAPTER 2: Capacity Planning**

Requirements

Hardware Requirements

Software Requirements

Budgetary Requirements

Business Need Analysis

Standard Templates

Licensing

Per-user

Socket-based

Volume-based

Core-based

Subscription

User Density

System Load

Trend Analysis

Baselines

Patterns

Anomalies

Performance Capacity Planning

What Next?

## **CHAPTER 3: High Availability and Scaling in Cloud Environments**

Hypervisors

# **Table of Contents**

Affinity

Anti-affinity

Oversubscription

Compute

Network

Storage

Regions and Zones

Applications

Containers

Clusters

High Availability of Network Functions

Switches

Routers

Load Balancers

Firewalls

Avoid Single Points of Failure

Scalability

Auto-scaling

Horizontal Scaling

Vertical Scaling

Cloud Bursting

What Next?

## **CHAPTER 4: Solution Design in Support of the Business Requirements**

Requirement Analysis

Software

Hardware

Integration

# **Table of Contents**

- Budgetary
- Compliance
- Service-Level Agreement (SLA)
- User and Business Needs
- Security
- Network Requirements

## **Environments**

- Development
- Quality Assurance (QA)
- Staging
- Blue-Green
- Production
- Disaster Recovery (DR)

## **Testing Techniques**

- Vulnerability Testing
- Penetration Testing
- Performance Testing
- Regression Testing
- Functional Testing
- Usability Testing

## **What Next?**

## **CHAPTER 5: Identity and Access Management**

### **Identification and Authorization**

- Privileged Access Management (PAM)
- Logical Access Management
- Account Lifecycle Management
- Access Controls

### **Directory Services**

# **Table of Contents**

Lightweight Directory Access Protocol (LDAP)

Federation

Certificate Management

Multifactor Authentication (MFA)

Single Sign-On (SSO)

Security Assertion Markup Language (SAML)

Public Key Infrastructure (PKI)

Secret Management

Key Management

What Next?

## **CHAPTER 6: Secure a Network in a Cloud Environment**

Network Segmentation

Virtual LAN (VLAN)/Virtual Extensible LAN (VxLAN)/Generic  
Network Virtualization Encapsulation (GENEVE)

Microsegmentation

Tiering

Protocols

Domain Name Service (DNS)

Network Time Protocol (NTP)

Network Time Security (NTS)

Encryption

Tunneling

Network Services

Firewalls

Web Application Firewall (WAF)

Application Delivery Controller (ADC)

Intrusion Protection System (IPS)/Intrusion Detection System (IDS)

# **Table of Contents**

Data Loss Prevention (DLP)

Network Access Control (NAC)

Packet Brokers

Log and Event Monitoring

Network Flows

Hardening and Configuration Changes

Disabling Unnecessary Ports and Services

Disabling Weak Protocols and Ciphers

Firmware Upgrades

Control Ingress and Egress Traffic

Distributed Denial-of-Service (DDoS) Protection

What Next?

## **CHAPTER 7: OS and Application Security Controls**

Policies

Password Complexity

Account Lockout

Application Whitelisting

Software Feature

User/Group

User Permissions

Antivirus/Antimalware/Endpoint Detection and Response  
(EDR)

Host-Based IDS (HIDS)/Host-Based IPS (HIPS)

Hardened Baselines

Single Function

File Integrity

Log and Event Monitoring

# **Table of Contents**

Configuration Management

Builds

- Stable

- Long-Term Support (LTS)

- Beta

- Canary

Operating System (OS) Upgrades

Encryption

- Application Programming Interface (API) Endpoint

- Application

- OS

- Storage

- Filesystem

Mandatory Access Control

Firewall Software

What Next?

## **CHAPTER 8: Data Security and Compliance Controls in Cloud Environments**

Encryption

Integrity

- Hashing Algorithms

- Digital Signatures

- File Integrity Monitoring (FIM)

Classification

Segmentation

Access Control

Impact of Laws and Regulations

# **Table of Contents**

Legal Hold

Records Management

Versioning

Retention

Destruction

Write Once Read Many

Data Loss Prevention (DLP)

Cloud Access Security Broker (CASB)

What Next?

## **CHAPTER 9: Security Requirements**

Tools

Vulnerability Scanners

Port Scanners

Vulnerability Assessment

Default and Common Credential Scans

Credentialed Scans

Network-Based Scans

Agent-Based Scans

Service Availabilities Scans

Security Patches

Hot Fixes

Scheduled Updates

Virtual Patches

Signature Updates

Rollups

Risk Register

Prioritization of Patch Applications

Deactivate Default Accounts

# **Table of Contents**

Impacts of Security Tools on Systems and Services

What Next?

## **CHAPTER 10: Incident Response Procedures**

### **Preparation**

Documentation

Call Trees

Training

Tabletops

Documented Incident Types/Categories

Roles and Responsibilities

### **Incident Response Procedures**

Identification

Containment, Eradication, and Recovery

Postincident and Lessons Learned

What Next?

## **CHAPTER 11: Integrate Components into a Cloud Solution**

### **Subscription Services**

File Subscriptions

Communications

Collaboration

Virtual Desktop Infrastructure (VDI)

Directory and Identity Services

Cloud Resources

IaaS

PaaS

SaaS

### **Provisioning Resources**

# **Table of Contents**

Compute

Storage

Network

Application

Serverless

Deploying Virtual Machines (VMs) and Custom Images

Templates

OS Templates

Solution Templates

Identity Management

Containers

Configure Variables

Configure Secrets

Persistent Storage

Auto-scaling

Postdeployment Validation

What Next?

## **CHAPTER 12: Storage in Cloud Environments**

Types

Block

File

Object

Tiers

Flash

Hybrid

Spinning Disks

Long-Term

Input/Output Operations per Second (IOPS) and

# **Table of Contents**

Read/Write

## **Protocols**

Network File System (NFS)

Common Internet File System (CIFS)

Internet Small Computer System Interface (iSCSI)

Fibre Channel (FC)

Non-Volatile Memory Express over Fabrics (NVMe-oF)

## **Redundant Array of Inexpensive Disks (RAID)**

0

1

5

6

10

## **Storage System Features**

Compression

Deduplication

Thin Provisioning

Thick Provisioning

Replication

## **User Quotas**

## **Hyperconverged**

## **Software-Defined Storage (SDS)**

## **What Next?**

# **CHAPTER 13: Cloud Networking Solutions**

## **Services**

Dynamic Host Configuration Protocol (DHCP)

Network Time Protocol (NTP)

Domain Name Service (DNS)

# **Table of Contents**

Content Delivery Network (CDN)

IP Address Management (IPAM)

## **Virtual Private Networks (VPNs)**

Site-to-site

Point-to-Point

Point-to-Site

IPsec

Multiprotocol Label Switching (MPLS)

## **Virtual Routing**

Dynamic and Static Routing

Virtual Network Interface Controller (vNIC)

Subnetting

## **Network Appliances**

Load Balancers

Firewalls

## **Virtual Private Cloud (VPC)**

Hub and Spoke

Peering

## **VLAN/VxLAN/GENEVE**

Single Root Input/Output Virtualization (SR-IOV)

Software-Defined Network (SDN)

What Next?

## **CHAPTER 14: Compute Sizing for a Deployment**

### **Virtualization**

Hypervisors

Simultaneous Multithreading (SMT)

Dynamic Allocations

Oversubscription

# **Table of Contents**

Central Processing Unit (CPU)/ Virtual CPU (vCPU)

Graphics Processing Unit (GPU)

Virtual

Pass-through

Clock Speed/Instructions per Cycle (IPC)

Hyperconverged

Memory

Dynamic Allocation

Ballooning

What Next?

## **CHAPTER 15: Cloud Migrations**

Physical to Virtual (P2V)

Virtual to Virtual (V2V)

Cloud-to-Cloud Migrations

Vendor Lock-in

PaaS or SaaS Migrations

Storage Migrations

Block

File

Object

Database Migrations

Relational

Nonrelational

What Next?

## **CHAPTER 16: Logging, Monitoring, and Alerting**

Logging

Collectors

# **Table of Contents**

Analysis

Severity Categorization

Audits

Types

Automation

Trending

## **Monitoring**

Baselines

Thresholds

Tagging

Log Scrubbing

Performance Monitoring

Resource Utilization

Availability

Verification of Continuous Monitoring Activities

Service Management Tool Integration

## **Alerting**

Common Messaging Methods

Enable/Disable Alerts

Appropriate Responses

Policies for Categorizing and Communicating Alerts

## **What Next?**

## **CHAPTER 17: Operation of a Cloud Environment**

Confirm Completion of Backups

Lifecycle Management

Roadmaps

Old/Current/New Versions

Upgrading and Migrating Systems

# **Table of Contents**

Deprecations or End of Life

Change Management

Asset Management

Configuration Management Database (CMDB)

Patching

Features or Enhancements

Fixes for Broken or Critical Infrastructure or Applications

Scope of Cloud Elements to Be Patched

Software

Policies

Rollbacks

Impacts of Process Improvements on Systems

Upgrade Methods

Rolling Upgrades

Blue-Green

Canary

Active-Passive

Development/QA/Production/DR

Dashboard and Reporting

Tagging

Costs

Elasticity Usage

Connectivity

Latency

Capacity

Incidents

Health

Overall Utilization

# **Table of Contents**

Availability

What Next?

## **CHAPTER 18: Optimize Cloud Environments**

Right-sizing

Compute and Storage

Network

Bandwidth

Network Interface Controllers (NICs)

Latency

Software-Defined Networks (SDNs)

Edge Computing

Placement

Geographical

Cluster Placement

Redundancy

Colocation

Device Drivers and Firmware

Generic

Vendor

Open Source

What Next?

## **CHAPTER 19: Automation and Orchestration**

Techniques

Infrastructure as Code (IaC)

Infrastructure Components and Their Integration

Continuous Integration/Continuous Deployment (CI/CD)

Version Control

# **Table of Contents**

## Configuration Management

- Playbook

## Containers

## Automation Activities

- Routine Operations

- Updates

- Scaling

- Shutdowns

- Restarts

- Create Internal APIs

## Secure Scripting

- No Hardcoded Passwords

- Use of Individual Service Accounts

- Password Vaults

- Key-Based Authentication

## Orchestration Sequencing

## What Next?

## CHAPTER 20: Backup and Restore Operations

### Backup Types

- Incremental

- Differential

- Full

- Synthetic Full

- Snapshot

### Backup Objects

- Application-Level Backup

- File-System Backup

- Database Dumps

# **Table of Contents**

Configuration Files

## **Backup Targets**

Tape

Disk

Object

## **Backup and Restore Policies**

Retention

Schedules

Location

Service-Level Agreements (SLAs)

Recovery Time Objective (RTO)

Recovery Point Objective (RPO)

Mean Time to Recovery (MTTR)

3-2-1 Rule

## **Restoration Methods**

In Place

Alternate Location

Restore Files

Snapshot

## **What Next?**

## **CHAPTER 21: Disaster Recovery Tasks**

Failovers

Failback

Restore Backups

Replication

On-Premises and Cloud Sites

Hot

Warm

# **Table of Contents**

Cold

## **Requirements**

Corporate Guidelines

## **Documentation**

DR Kit

Playbook

Network Diagram

Geographical Data Center Requirements

What Next?

## **CHAPTER 22: Troubleshooting Methodology**

Always Consider Corporate Policies, Procedures, and  
Impacts Before Implementing Changes

1. Identify the Problem
2. Establish a Theory of Probable Cause (Question the Obvious)
3. Test the Theory to Determine Cause
4. Establish a Plan of Action to Resolve the Problem and Implement the Solution
5. Verify Full System Functionality and, if Applicable, Implement Preventive Measures
6. Document the Findings, Actions, and Outcomes Throughout the Process

What Next?

## **CHAPTER 23: Troubleshoot Security Issues**

### **Privilege**

Missing

Incomplete

# **Table of Contents**

Escalation

Keys

Authentication

Authorization

Security Groups

Network Security Groups

Directory Security Groups

Keys and Certificates

Expired

Revoked

Trust

Compromised

Misconfigured

Misconfigured or Misapplied Policies

Data Security Issues

Unencrypted Data

Data Breaches

Misclassification

Lack of Encryption in Protocols

Insecure Ciphers

Exposed Endpoints

Misconfigured or Failed Security Appliances

Unsupported Protocols

External/Internal Attacks

What Next?

**CHAPTER 24: Troubleshoot Deployment, Automation,  
and Orchestration Issues**

# **Table of Contents**

## **Connectivity Issues**

- Cloud Service Provider (CSP) or Internet Service Provider (ISP) Outages

## **Performance Degradation**

- Latency

## **Configurations**

- Scripts

## **Applications in Containers**

## **Misconfigured Templates**

## **Missing or Incorrect Tags**

## **Insufficient Capacity**

## **Licensing Issues**

## **Vendor-Related Issues**

- Migrations of Vendors or Platforms
- Integration of Vendors or Platforms
- API Request Limits
- Cost or Billing Issues

## **Account Mismatches**

## **Change Management Failures**

## **Server Name Changes**

## **IP Address Changes**

## **Location Changes**

## **Version/Feature Mismatch**

## **Automation Tool Incompatibility**

- Deprecated Features
- API Version Incompatibility

## **Job Validation Issue**

# **Table of Contents**

Patching Failure

What Next?

## **CHAPTER 25: Troubleshoot Connectivity Issues and Common Performance Issues**

Network Security Group Misconfigurations

Access Control Lists (ACLs)

Inheritance

Common Networking Configuration Issues

Peering

Incorrect Subnet, IP Address, and IP Space

Routes

Firewall

Network Address Translation (NAT)

Load Balancers and DNS Records

VLAN/VxLAN/GENEVE and Proxy

Maximum Transmission Unit (MTU)

Quality of Service (QoS)

Time Synchronization Issues

Network Troubleshooting Tools

ping

tracert/traceroute

flushdns

ipconfig/ifconfig/ip

nslookup/dig

netstat/ss

route

arp

curl

# **Table of Contents**

Packet Capture

Packet Analyzer

OpenSSL Client

Resource Utilization

Application

Memory Management

Service Overload

Incorrectly Configured or Failed Load Balancing
