Introduction

- Organization of this book

- Microsoft certifications

- Quick access to online references

- Errata, updates, & book support

- Stay in touch

Chapter 1 Design and implement Microsoft 365 services

- Skill 1.1: Plan architecture

  - Plan integration of Microsoft 365 and on-premises environments

  - Identify deployment workloads team

  - Plan an identity and authentication solution

  - Plan enterprise application modernization

- Skill 1.2: Deploy a Microsoft 365 tenant

  - Manage domains

  - Configure organizational settings

  - Complete the organization profile

  - Add a Microsoft partner or work with Microsoft FastTrack

# **Table of Contents**

Complete the subscription setup wizard

Plan and create a tenant

Edit an organizational profile

Plan and create subscriptions

Configure tenant wide workload settings

## **Skill 1.3: Manage Microsoft 365 subscription and tenant health**

Manage service health alerts

Create an internal service health response plan

Monitor service health

Monitor license allocations

Configure and review reports

Schedule and review security and compliance reports

Schedule and review usage metrics

## **Skill 1.4: Plan migration of user and data**

Identify data to be migrated and migration methods

Identify users and mailboxes to be migrated and migration methods

Plan migration of on-premises users and groups

Import PST files

Thought experiment

Thought experiment answers

Chapter summary

## **Chapter 2 Manage user identity and roles**

### **Skill 2.1: Design identity strategy**

Evaluate requirements and solution for synchronization

Evaluate requirements and solutions for identity management

Evaluate requirements and solution for authentication

### **Skill 2.2: Plan identity synchronization by using Azure AD Connect**

Design directory synchronization

Implement directory synchronization with directory services, Federation

# **Table of Contents**

services, and Azure endpoints by using Azure AD Connect

## **Skill 2.3: Manage identity synchronization by using Azure Active Directory**

Configure directory synchronization by using Azure AD Connect

Monitor Azure AD Connect Health

Manage Azure AD Connect synchronization

Configure object filters

Configure password synchronization

Implement multiforest AD Connect scenarios

## **Skill 2.4: Manage Azure AD identities**

Plan Azure AD identities

Implement and manage Azure AD self-service password reset

Manage access reviews

Manage groups

Manage passwords

Manage product licenses

Manage users

Perform bulk user management

## **Skill 2.5: Manage user roles**

Plan user roles

Manage admin roles

Allocate roles for workloads

Manage role allocations by using Azure AD

Thought experiment

Thought experiment answers

Chapter summary

## **Chapter 3 Manage access and authentication**

### **Skill 3.1: Manage authentication**

Design an authentication method

Configure authentication

# **Table of Contents**

- Implement an authentication method

- Manage authentication

- Monitor authentication

## **Skill 3.2: Plan and implement secure access**

- Design a conditional access solution

- Implement entitlement packages

- Implement Azure AD Identity Protection

- Manage conditional access

- Implement and secure access for guest and external users

## **Skill 3.3: Configure application access**

- Configure application registration in Azure AD

- Configure Azure AD Application Proxy

- Publish enterprise apps in Azure AD

Thought experiment

Thought experiment answers

Chapter summary

## **Chapter 4 Plan Office 365 workloads and applications**

### **Skill 4.1: Plan for Microsoft 365 Apps deployment**

- Plan for Microsoft connectivity

- Manage Microsoft 365 Apps

- Plan for Office online

- Assess readiness using Microsoft analytics

- Plan Microsoft 365 App compatibility

- Manage Office 365 software downloads

- Plan for Microsoft apps updates

- Plan Microsoft telemetry and reporting

### **Skill 4.2: Plan for messaging deployments**

- Plan migration strategy

- Plan messaging deployment

# **Table of Contents**

Identify hybrid requirements

Plan for connectivity

Plan for mail routing

Plan email domains

## **Skill 4.3: Plan for Microsoft SharePoint Online and OneDrive for Business**

Plan migration strategy

Plan external share settings

Identify hybrid requirements

Manage access configurations

Manage Microsoft groups

Manage SharePoint tenant and site settings

Manage OneDrive for Business

## **Skill 4.4: Plan for Microsoft Teams Infrastructure**

Plan for communication and call quality and capacity

Plan for Phone System

Plan Microsoft Teams deployment

Plan Microsoft Teams organizational settings

Plan for guest and external access

Plan for Microsoft Teams hybrid connectivity and coexistence

Teams cmdlets

## **Skill 4.5: Plan Microsoft Power Platform integration**

Implement Microsoft Power Platform Center of Excellence (CoE) starter kit

Plan for Power Platform workload deployments

Plan resource deployment

Plan for connectivity (and data flow)

Manage environments

Manage resources

Thought experiment

Thought experiment answers
