About the authors

Introduction

- Organization of this book

- Microsoft certifications

- Errata, updates, & book support

- Stay in touch

Chapter 1 Deploy and upgrade operating systems

- Skill 1.1: Plan a Windows 10 deployment

 - Assess infrastructure readiness

 - Evaluate and select an appropriate deployment option

 - Plan upgrade and downgrade paths

 - Plan app compatibility

 - Plan for user state

- Skill 1.2: Plan and implement Windows 10 by using Windows Autopilot

 - Choose method based on requirements

Table of Contents

- Create, validate, and assign deployment profiles
- Extract device hardware information
- Import device hardware information to cloud service
- Deploy Windows 10
- Troubleshoot deployment

Skill 1.3: Plan and implement Windows 10 using MDT

- Choose configuration options based on requirements
- Create and manage images
- Manage application and driver deployment
- Create and use task sequences
- Deploy images
- Monitor and troubleshoot deployment

Skill 1.4: Manage accounts, VPN connections, and certificates on Windows 10

- Secure privileged accounts on Windows 10
- Configure VPN client
- Configure and manage certificates on client devices

Chapter summary

Thought experiment

- Scenario 1
- Scenario 2
- Scenario 3
- Scenario 4

Thought experiment answers

- Scenario 1
- Scenario 2
- Scenario 3
- Scenario 4

Chapter 2 Manage policies and profiles

Table of Contents

Skill 2.1: Implement compliance policies for devices

- Plan device compliance policies
- Implement device compliance policies
- Manage device compliance policies

Skill 2.2: Configure device profiles

- Plan device profiles
- Implement device profiles
- Manage device profiles

Skill 2.3: Manage user profiles

- Configure user profiles
- Configure sync settings
- Implement Folder Redirection
- Implement OneDrive Known Folder Move
- Configure Enterprise State Roaming in Azure AD

Chapter summary

Thought experiment

- Scenario 1
- Scenario 2
- Scenario 3

Thought experiment answers

- Scenario 1
- Scenario 2
- Scenario 3

Chapter 3 Manage and protect devices

Skill 3.1: Implement and manage device, application, and threat protection

- Implement and manage Microsoft Defender Credential Guard
- Implement and manage Microsoft Defender Exploit Guard
- Implement and manage Microsoft Defender Application Guard
- Implement Microsoft Defender for Endpoint

Table of Contents

- Integrate Microsoft Defender Application Control
- Manage Microsoft Defender Antivirus
- Protect devices using Endpoint Security
- Manage enterprise-level disk encryption
- Implement and manage security baselines in Microsoft Intune

Skill 3.2: Manage Microsoft Intune devices

- Configure enrollment settings in Microsoft Intune
- Configure Microsoft Intune automatic and bulk enrollment
- Enroll Windows devices
- Enroll non-Windows devices
- Review device inventory

Skill 3.3: Monitor devices

- Monitor device inventory reports using Endpoint Manager admin center
- Monitor devices using Azure Monitor, Desktop Analytics, and Endpoint Analytics

Skill 3.4: Manage updates

- Plan for Windows Updates
- Deploy Windows updates using Microsoft Intune
- Configure Windows 10 delivery optimization
- Monitor Windows 10 Updates

Chapter summary

Thought experiment

- Scenario 1
- Scenario 2
- Scenario 3
- Scenario 4

Thought experiment answers

- Scenario 1
- Scenario 2

Table of Contents

Scenario 3

Scenario 4

Chapter 4 Manage apps and data

Skill 4.1: Deploy and update applications

Deploy apps by using Intune and assign apps to groups

Deploy apps by using Microsoft Store for Business

Enable sideloading of apps into images

Use Windows Configuration Designer to deploy apps

Configure and implement assigned access or public devices

Deploy Microsoft 365 Apps

Gather Microsoft 365 Apps readiness data

Skill 4.2: Implement Mobile Application Management

Plan and Implement App Protection policies

Plan and implement App Configuration policies

Secure data in Microsoft 365
