Contents at a Glance
Contents
Introduction
Chapter 1 Types of Network Automation
- Data-Driven Automation
  - What Data-Driven Automation Is
  - Data-Driven Automation Use Cases
  - Monitoring Devices
  - Compliance Checking
  - Optimization
  - Predictive Maintenance
  - Troubleshooting
- Task-Based Automation
  - What Task-Based Automation Is
  - Task-Based Automation Use Cases
  - Interaction

Table of Contents

Data Collection

Configuration

Provisioning

Reporting

End-to-End Automation

What End-to-End Automation Is

End-to-End Automation Use Cases

Migration

Configuration

Provisioning

Testing

Tools

DNA Center

Cloud Event-Driven Functions

Terraform

Ansible

Chef

Kibana

Grafana

Splunk

Python

Summary

Review Questions

Chapter 2 Data for Network Automation

The Importance of Data

Data Formats and Models

YAML

XML

JSON

Table of Contents

- Syslog
- NetFlow
- IPFIX
- Cloud Flows
- YANG

Methods for Gathering Data

- APIs
- Model-Driven Techniques
- NETCONF
- RESTCONF
- Telemetry
- Log Exporters

Summary

End Notes

Review Questions

Chapter 3 Using Data from Your Network

Data Preparation

- Parsing
- Aggregation

Data Visualization

Data Insights

- Alarms
- Configuration Drift
- AI/ML Predictions

Case Studies

- Creating a Machine Learning Model with Raw Data
- How a Data Center Reduced Its Mean Time to Repair
- Network Migrations at an Electricity Provider

Table of Contents

- Summary
- Review Questions

Chapter 4 Ansible Basics

- Ansible Characteristics
- Installing Ansible
  - Inventory
- Variables
- Playbooks
- Conditionals
- Loops
- Handlers
- Executing a Playbook
- Roles
- Summary
- Review Questions

Chapter 5 Using Ansible for Network Automation

- Interacting with Files
  - Reading
  - Writing
- Interacting with Devices
  - Networking (Routers, Switches, Firewalls)
  - Using SSH
  - Using NETCONF
  - Using RESTCONF
  - Computing (Servers, Virtual Machines, and Containers)
  - Servers and Virtual machines
  - Containers

Table of Contents

Cloud (AWS, GCP)

Interacting with APIs

Case Studies

Configuration Changes Across 100,000 Devices

Quality of Service Across a Heterogenous Installed Base

Disaster Recovery at a European Bank

Summary

Review Questions

Chapter 6 Network DevOps

What NetDevOps Is

Source Control

Infrastructure as Code (IaC)

Continuous Integration and Continuous Deployment/Delivery (CI/CD)

Why Use NetDevOps

When to Use NetDevOps

NetDevOps Tools

Git

GitLab CI/CD

Jenkins

How to Build Your Own NetDevOps Environment

NetDevOps Environment Requirements

NetDevOps Stages

NetDevOps Operations

Case Studies

Pipelines in One of the Worldâ s Largest Banks

New Technology Trainings at a Fortune 50 Company

New Service Implementations in a Tier 1 Service Provider

Summary

Table of Contents

Review Questions

Chapter 7 Automation Strategies

What an Automation Strategy Is

Assessment

KPIs

Other Strategy Documents

Summary

Why You Need an Automation Strategy

How to Build Your Own Automation Strategy

Assessment

Culture and Skills

Goals, Objectives, Strategies, and Tactics

ABD Case Study

How to Use an Automation Strategy

Summary

Review Questions

Appendix A: Answers to Review Questions
