Contents at a Glance

Table of Contents

HOURL 1: Understanding the Relational Database and SQL

Thriving in a Data-Driven World

Understanding the Relational Database

The Relational Database Continues to Lead the Way

Examples and Exercises

Summary

Q&A

Workshop

HOURL 2: Exploring the Components of the SQL Language

SQL Definition and History

SQL: The Standard Language

SQL Sessions

Types of SQL Commands

Summary

Q&A

Workshop

HOURL 3: Getting to Know Your Data

# **Table of Contents**

The BIRD Database: Examples and Exercises in This Book

How to Talk About the Data

Entity Relationship Diagrams

Examples and Exercises

Summary

Q&A

Workshop

## **Hour 4: Setting Up Your Database**

Locating the Files You Need

Getting Set Up for Hands-on Exercises

List of Data by Table

Summary

Q&A

Workshop

## **Hour 5: Understanding the Basics of Relational (SQL)**

### **Database Design**

Understanding What Database Design Has to Do with SQL

The Database Design Process

Choosing a Database Design Methodology

Using a Simple Process to Think Through the Design of the BIRDS  
Database

Logical Model vs. Physical Design

Database Life Cycle

Summary

Q&A

Workshop

## **Hour 6: Defining Entities and Relationships**

# **Table of Contents**

Creating a Data Model Based on Your Data

Defining Relationships

Employing Referential Integrity

Creating an Entity Relationship

Summary

Q&A

Workshop

## **Hour 7: Normalizing Your Database**

Defining Normalization

Exploring the Most Common Normal Forms of the Normalization  
Process

Denormalizing a Database

Applying Normalization to Your Database

Summary

Q&A

Workshop

## **Hour 8: Defining Data Structures**

Defining Data

Understanding Basic Data Types

Using Data Types in the BIRDS Database

Summary

Q&A

Workshop

## **Hour 9: Creating and Managing Database Objects**

Database Objects and Schemas

Tables: The Primary Storage for Data

# Table of Contents

Integrity Constraints

Summary

Q&A

Workshop

## Hour 10: Manipulating Data

Getting an Overview of Data Manipulation

Populating Tables with New Data

Updating Existing Data

Deleting Data from Tables

Summary

Q&A

Workshop

## Hour 11: Managing Database Transactions

Defining Transactions

Controlling Transactions

Dealing with Poor Transactional Control

Summary

Q&A

Workshop

## Hour 12: Introduction to Database Queries

Using the SELECT Statement

Case Sensitivity

Fundamentals of Query Writing

Summary

Q&A

Workshop

# **Table of Contents**

## **HOURL 13: Using Operators to Categorize Data**

Defining an Operator in SQL

Using Comparison Operators

Using Logical Operators

Using Conjunctive Operators

Using Negative Operators

Using Arithmetic Operators

Summary

Q&A

Workshop

## **HOURL 14: Joining Tables in Queries**

Selecting Data from Multiple Tables

Understanding Joins

Join Considerations

Summary

Q&A

Workshop

## **HOURL 15: Restructuring the Appearance of Data**

ANSI Character Functions

Common Character Functions

Miscellaneous Character Functions

Mathematical Functions

Conversion Functions

Combined Character Functions

Summary

Q&A

# Table of Contents

Workshop

## Hour 16: Understanding Dates and Times

Understanding How a Date Is Stored

Using Date Functions

Converting Dates

Summary

Q&A

Workshop

## Hour 17: Summarizing Data Results from a Query

Using Aggregate Functions

Grouping Data

Using the GROUP BY Clause

Understanding the Difference Between GROUP BY and ORDER BY

Using CUBE and ROLLUP Expressions

Using the HAVING Clause

Summary

Q&A

Workshop

## Hour 18: Using Subqueries to Define Unknown Data

Defining Subqueries

Embedded Subqueries

Using Correlated Subqueries

Summary

Q&A

Workshop

## Hour 19: Combining Multiple Queries into One

# **Table of Contents**

Differentiating Single Queries and Compound Queries

Using Compound Query Operators

Using ORDER BY with a Compound Query

Using GROUP BY with a Compound Query

Retrieving Accurate Data

Summary

Q&A

Workshop

## **Hour 20: Creating and Using Views and Synonyms**

Defining Views

Creating Views

Updating Data Through a View

Dropping a View

Understanding the Performance Impact of Nested Views

Defining Synonyms

Summary

Q&A

Workshop

## **Hour 21: Managing Database Users and Security**

Managing Users in the Database

Understanding the Management Process

Maximizing Tools Utilized by Database Users

Understanding Database Security

Assigning Privileges

Controlling User Access

Controlling Privileges Through Roles

# **Table of Contents**

Summary

Q&A

Workshop

## **Hour 22: Using Indexes to Improve Performance**

Defining an Index

Understanding How Indexes Work

Using the CREATE INDEX Command

Identifying Types of Indexes

Knowing When to Consider Using an Index

Knowing When to Avoid Indexes

Altering an Index

Dropping an Index

Summary

Q&A

Workshop

## **Hour 23: Improving Database Performance**

Defining SQL Statement Tuning

Comparing Database Tuning and SQL Statement Tuning

Formatting Your SQL Statement

Running Full Table Scans

Identifying Other Performance Considerations

Using Cost-Based Optimization

Summary

Q&A

Workshop

## **Hour 24: Working with the System Catalog**

# **Table of Contents**

Defining the System Catalog

Creating the System Catalog

Determining What Is Contained in the System Catalog

Identifying System Catalog Tables by Implementation

Querying the System Catalog

Updating System Catalog Objects

Summary

Q&A

Workshop

## **HOOR 25: Bonus Workshop for the Road**

The BIRDS Database

Predators of Birds

Photographers of Birds

Creating the New Tables

Workshop: Describing Your Tables

Workshop: Basic Queries

Workshop: Adding Tables

Workshop: Manipulating Data

Workshop: Joining Tables

Workshop: Comparison Operators

Workshop: Logical Operators

Workshop: Conjunctive Operators

Workshop: Arithmetic Operators

Workshop: Character Functions

Workshop: Aggregating Data

Workshop: GROUP BY and HAVING

Workshop: Composite Queries

# **Table of Contents**

Workshop: Creating Tables from Existing Tables

Workshop: Inserting Data into a Table from Another Table

Workshop: Creating Views

Workshop: Embedding Subqueries

Workshop: Creating Views from Subqueries

Workshop: Generating SQL Code from a SQL Statement

Summary

Workshop

## **APPENDIXES**

### **APPENDIX A: Common SQL Commands**

SQL Statements

SQL Query Clauses

### **APPENDIX B: Popular Vendor RDBMS Implementations**

Installing the Oracle Database Software Used for Examples and Hands-On Exercises

### **APPENDIX C: Answers to Quizzes and Exercises**

Hour 1, "Understanding the Relational Database and SQL"

Hour 2, "Exploring the Components of the SQL Language"

Hour 3, "Getting to Know Your Data"

Hour 4, "Setting Up Your Database"

Hour 5, "Understanding the Basics of Relational (SQL) Database Design"

Hour 6, "Defining Entities and Relationships"

Hour 7, "Normalizing Your Database"

Hour 8, "Defining Data Structures"

Hour 9, "Creating and Managing Database Objects"

Hour 10, "Manipulating Data"

Hour 11, "Managing Database Transactions"

Hour 12, "Introduction to Database Queries"

# **Table of Contents**

Hour 13, "Using Operators to Categorize Data"  
Hour 14, "Joining Tables in Queries"  
Hour 15, "Restructuring the Appearance of Data"  
Hour 16, "Understanding Dates and Times"  
Hour 17, "Summarizing Data Results from a Query"  
Hour 18, "Using Subqueries to Define Unknown Data"  
Hour 19, "Combining Multiple Queries into One"  
Hour 20, "Creating and Using Views and Synonyms"  
Hour 21, "Managing Database Users and Security"  
Hour 22, "Using Indexes to Improve Performance"  
Hour 23, "Improving Database Performance"  
Hour 24, "Working with the System Catalog"  
Hour 25, "Bonus Workshop for the Road"
