

# PYTHON PROGRAMMING *with* DESIGN PATTERNS

JAMES W. COOPER

# Python Programming with Design Patterns

---

# Python Programming with Design Patterns

## Table of Contents

Cover

Half Title

Title Page

Copyright Page

Dedication

Contents at a Glance

Table of Contents

I: Introduction

1 Introduction to Objects

The Class `__init__` Method

Variables Inside a Class

Collections of Classes

Inheritance

Derived Classes Created with Revised Methods

Multiple Inheritance

Drawing a Rectangle and a Square

Visibility of Variables

Properties

Local Variables

Types in Python

Summary

Programs on GitHub

2 Visual Programming in Python

# Table of Contents

Importing Fewer Names

Creating an Object-Oriented Version

Using Message Boxes

Using File Dialogs

Understanding Options for the Pack Layout Manager

Using the ttk Libraries

Responding to User Input

- Adding Two Numbers

- Catching the Error

Applying Colors in tkinter

Creating Radio Buttons

- Using a Class-Level Variable

Communicating Between Classes

Using the Grid Layout

Creating Checkbuttons

- Disabling Check Boxes

Adding Menus to Windows

Using the LabelFrame

Moving On

Examples on GitHub

## 3 Visual Programming of Tables of Data

Creating a Listbox

- Displaying the State Data

Using a Combobox

The Treeview Widget

- Inserting Tree Nodes

Moving On

Example Code on GitHub

## 4 What Are Design Patterns?

Defining Design Patterns

# Table of Contents

The Learning Process

Notes on Object-Oriented Approaches

Python Design Patterns

References

The tkinter Library

GitHub

## II: Creational Patterns

### 5 The Factory Pattern

How a Factory Works

Sample Code

The Two Subclasses

Building the Simple Factory

Using the Factory

A Simple GUI

Factory Patterns in Math Computation

Programs on GitHub

Thought Questions

### 6 The Factory Method Pattern

The Swimmer Class

The Event Classes

Straight Seeding

Circle Seeding

Our Seeding Program

Other Factories

When to Use a Factory Method

Programs on GitHub

### 7 The Abstract Factory Pattern

A GardenMaker Factory

How the User Interface Works

# Table of Contents

Consequences of the Abstract Factory Pattern

Thought Questions

Code on GitHub

## 8 The Singleton Pattern

Throwing the Exception

Creating an Instance of the Class

Static Classes As Singleton Patterns

Finding the Singletons in a Large Program

Other Consequences of the Singleton Pattern

Sample Code on GitHub

## 9 The Builder Pattern

An Investment Tracker

Calling the Builders

    The List Box Builder

    The Checkbox Builder

Displaying the Selected Securities

Consequences of the Builder Pattern

Thought Questions

Sample Code on GitHub

## 10 The Prototype Pattern

Cloning in Python

Using the Prototype

Consequences of the Prototype Pattern

Sample Code on GitHub

## 11 Summary of Creational Patterns

## III: Structural Patterns

## 12 The Adapter Pattern

Moving Data Between Lists

Making an Adapter

# Table of Contents

The Class Adapter

Two-Way Adapters

Pluggable Adapters

Programs on GitHub

## 13 The Bridge Pattern

Creating the User Interface

Extending the Bridge

Consequences of the Bridge Pattern

Programs on GitHub

## 14 The Composite Pattern

An Implementation of a Composite

Salary Computation

The Employee Classes

The Boss Class

Building the Employee Tree

Printing the Employee Tree

Creating a Treeview of the Composite

Using Doubly Linked Lists

Consequences of the Composite Pattern

A Simple Composite

Other Implementation Issues

Dealing with Recursive Calls

Ordering Components

Caching Results

Programs on GitHub

## 15 The Decorator Pattern

Decorating a Button

Using a Decorator

Using Nonvisual Decorators

Decorated Code

# Table of Contents

The dataclass Decorator

Using dataclass with Default Values

Decorators, Adapters, and Composites

Consequences of the Decorator Pattern

Programs on GitHub

## 16 The Façade Pattern

Building the Façade Classes

Creating Databases and Tables

Using the SQLite Version

Consequences of the Façade

Programs on GitHub

Notes on MySQL

Using SQLite

References

## 17 The Flyweight Pattern

What Are Flyweights?

Example Code

    Selecting a Folder

Copy-on-Write Objects

Program on GitHub

## 18 The Proxy Pattern

Using the Pillow Image Library

Displaying an Image Using PIL

Using Threads to Handle Image Loading

Logging from Threads

Copy-on-Write

Comparing Related Patterns

Programs on GitHub

## 19 Summary of Structural Patterns

# Table of Contents

## IV: Behavioral Patterns

### 20 Chain of Responsibility Pattern

When to Use the Chain

Sample Code

The Listboxes

Programming a Help System

Receiving the Help Command

The First Case

A Chain or a Tree?

Kinds of Requests

Consequences of the Chain of Responsibility

Programs on GitHub

### 21 The Command Pattern

When to Use the Command Pattern

Command Objects

A Keyboard Example

Calling the Command Objects

Building Command Objects

The Command Pattern

Consequences of the Command Pattern

Providing the Undo Function

Creating the Red and Blue Buttons

Undoing the Lines

Summary

References

Programs on GitHub

### 22 The Interpreter Pattern

When to Use an Interpreter

Where the Pattern Can Be Helpful

# Table of Contents

A Simple Report Example

Interpreting the Language

How Parsing Works

    Sorting Using attrgetter()

    The Print Verb

The Console Interface

The User Interface

Consequences of the Interpreter Pattern

Programs on GitHub

## 23 The Iterator Pattern

Why We Use Iterators

Iterators in Python

A Fibonacci Iterator

    Getting the Iterator

Filtered Iterators

The Iterator Generator

A Fibonacci Iterator

Generators in Classes

Consequences of the Iterator Pattern

Programs on GitHub

## 24 The Mediator Pattern

An Example System

Interactions Between Controls

Sample Code

Mediators and Command Objects

Consequences of the Mediator Pattern

Single Interface Mediators

Programs on GitHub

## 25 The Memento Pattern

When to Use a Memento

# Table of Contents

Sample Code

Consequences of the Memento Pattern

Programs on GitHub

## 26 The Observer Pattern

Example Program for Watching Colors Change

The Message to the Media

Consequences of the Observer Pattern

Programs on GitHub

## 27 The State Pattern

Sample Code

Switching Between States

How the Mediator Interacts with the StateManager

Consequences of the State Pattern

State Transitions

Programs on GitHub

## 28 The Strategy Pattern

Why We Use the Strategy Pattern

Sample Code

The Context

The Program Commands

The Line and Bar Graph Strategies

Consequences of the Strategy Pattern

Programs on GitHub

## 29 The Template Pattern

Why We Use Template Patterns

Kinds of Methods in a Template Class

Sample Code

Drawing a Standard Triangle

Drawing an Isosceles Triangle

The Triangle Drawing Program

# Table of Contents

Templates and Callbacks

Summary and Consequences

Example Code on GitHub

## 30 The Visitor Pattern

When to Use the Visitor Pattern

Working with the Visitor Pattern

Sample Code

Visiting Each Class

Visiting Several Classes

Bosses Are Employees, Too

Double Dispatching

Traversing a Series of Classes

Consequences of the Visitor Pattern

Example Code on GitHub

## V: A Brief Introduction to Python

### 31 Variables and Syntax in Python

Data Types

Numeric Constants

Strings

Character Constants

Variables

Complex Numbers

Integer Division

Multiple Equal Signs for Initialization

A Simple Python Program

Compiling and Running This Program

Arithmetic Operators

Bitwise Operators

Combined Arithmetic and Assignment Statements

# Table of Contents

Comparison Operators

The input Statement

PEP 8 Standards

- Variable and Function Names

- Constants

- Class Names

- Indentation and Spacing

- Comments

- Docstrings

String Methods

Examples on GitHub

## 32 Making Decisions in Python

- elif is else if

- Combining Conditions

- The Most Common Mistake

- Looping Statements in Python

  - The for Loop and Lists

  - Using range in if Statements

- Using break and continue

  - The continue Statement

- Python Line Length

- The print Function

- Formatting Numbers

  - C and Java Style Formatting

  - The format string Function

  - f-string Formatting

  - Comma-Separated Numbers

  - Strings

- Formatting Dates

- Using the Python match Function

  - Pattern Matching

# Table of Contents

Reference

Moving On

Sample Code on GitHub

## 33 Development Environments

IDLE

Thonny

PyCharm

Visual Studio

Other Development Environments

LiClipse

Jupyter Notebook

Google Colaboratory

Anaconda

Wing

Command-Line Execution

CPython, IPython, and Jython

## 34 Python Collections and Files

Slicing

Slicing Strings

Negative Indexes

String Prefix and Suffix Removal

Changing List Contents

Copying a List

Reading Files

Using the with Loop

Handling Exceptions

Using Dictionaries

Combining Dictionaries

Using Tuples

Using Sets

# **Table of Contents**

Using the map Function

Writing a Complete Program

Impenetrable Coding

Using List Comprehension

Sample Programs on GitHub

## **35 Functions**

Returning a Tuple

Where Does the Program Start?

Summary

Programs on GitHub

## **A: Running Python Programs**

If You Have Python Installed

Shortcuts

Creating an Executable Python Program

Command-Line Arguments

Index
