Introduction

Part 1: Cisco Data Center Networking and Infrastructure

Chapter 1: Cisco Data Center Orchestration

IT Challenges and Data Center Solutions

Cisco Nexus Dashboard

Features and Benefits

Hardware vs. Software Stack

Cisco Data Center Networking (DCN) Licensing

Available Form Factors

Cisco Nexus Dashboard Orchestrator

Common Use Cases

Large-Scale Data Center Deployment

Data Center Interconnectivity

Cisco NDO Multidomain Integrations

Hybrid Cloud and Multicloud

Service Provider/5G Telco

Functions Provided by the Nexus Dashboard Orchestrator

Deployment of Cisco Nexus Dashboard Orchestrator

Add ACI/DCNM Sites

Manage Sites Using Cisco Nexus Dashboard Orchestrator

Table of Contents

Cisco Nexus Dashboard Fabric Controller

- Cisco NDFC Benefits and Features

- Benefits

- Features

- Platform Support Information

- Server Requirements

Third-party Applications and Cloud-based Services

- Cisco Nexus Dashboard Open Ecosystem with Splunk

- Cisco Nexus Dashboard Open Ecosystem with ServiceNow

Summary

References/Additional Reading

Chapter 2 Cisco Data Center Analytics and Insights

Cisco Nexus Dashboard Insights

- Cisco Nexus Dashboard Insights Licensing

- Key Components of Cisco Nexus Dashboard Insights

- Browsing Cisco Nexus Dashboard Insights

- Resources

- Environmental

- Statistics

- Flows

- Endpoints

- Applications

- Event Analytics

- Diagnostics, Impact, Recommendation

- Advisories

- Firmware Update Analysis

- Pre-Change Analysis

- Cisco Nexus Dashboard Insights Features and Benefits

- Cisco Nexus Insights Cloud Connector

Cisco Nexus Dashboard Data Broker

- Automated SPAN Configuration in Production Network

- Cisco Application Centric Infrastructure (ACI) Integration

Table of Contents

Cisco DNA Center Integration

Scalable Traffic Monitoring with Cisco Nexus Dashboard Data Broker Inline Option

Cisco Nexus Dashboard Data Broker Access Mechanisms

Cisco Meraki MX

Meraki Virtual MX Appliances for Public and Private Clouds

Features and Functionality of the vMX Appliance

vMX Setup for Microsoft Azure

vMX Setup for Google Cloud Platform

vMX Setup for Alibaba Cloud

Summary

References/Additional Reading

Chapter 3 Cisco Data Center Solutions for Hybrid Cloud

Cisco Cloud Application Centric Infrastructure (Cisco Cloud ACI)

Challenges in Hybrid Cloud Environments

High-Level Architecture of Cisco Cloud ACI on AWS

Cisco ACI Nexus Dashboard Orchestrator

Cisco Cloud APIC on AWS

Cisco Cloud APICs First Time Setup Wizard

Registering a Cisco ACI Cloud Site in NDO

Deploying a Multitier Application in a Hybrid Scenario

Cisco UCS Director

Infrastructure Configuration and Management

Cisco UCS Management Through Cisco UCS Director

Cisco UCS Management Tasks You Can Perform in Cisco UCS Director

Configuration and Administration

Monitoring and Reporting

Orchestration and Automation

Infrastructure as a Service

Secure Multitenancy

Rapid Application Deployment

Self-Service Portal

Cisco Workload Optimization Manager

Table of Contents

- Create More Effective Teams
- Optimize Your Multicloud Environment
- Optimize Public Cloud Costs
- Optimize Hyperconverged Workloads
- Ensure Application Performance
- Cisco Workload Optimization Main Features
- Target Integration
- View Your Global Environment
- Automate Actions
- Plan for the Future
- Set Policies and Service Level Agreements
- Cisco Intersight Workload Optimizer

Cisco Hyperflex Intersight

- Deployment Options
- Benefits of Using Cisco Intersight
- Hyperconverged Infrastructure (HCI): Hyperflex
- Deploying Hyperflex Anywhere with Intersight
- Cisco Intersight Workload Engine at a Glance
- Benefits
- Key Features

Summary

References/Additional Reading

Part 2 Cisco Applications and Workload Management

Chapter 4 Application, Analytics, and Workload Performance

Management with AppDynamics

What Is AppDynamics?

AppDynamics Concepts

- User Interface
- Application Performance Monitoring
- Infrastructure Visibility with Database Visibility
- End User Monitoring for Client Experience
- Business IQ and Analytics for Business Impact

Table of Contents

Use Metrics

Baselines and Thresholds

Health Rules, Policies, and Actions

Infrastructure Monitoring

Integrate and Extend AppDynamics

Deployment Planning Guide

Deployment Models

Installation Overview

Platform Components and Tools

On-Premises Deployment Architecture

Platform Components

Platform Connections

Data Storage Location

SaaS Deployment Architecture

Application Monitoring

Overview of Application Monitoring

Business Transactions

Business Applications

Nodes

Tiers

Entities

Historical and Live Entity Data

Anchor Metrics for Entities

Liveness Status

How the Controller Displays Live Entities

Backends

Integration with Other AppDynamics Modules

Application Monitoring and Infrastructure Visibility

Application Monitoring and Browser Real User Monitoring

Application Monitoring and Database Visibility

Application Monitoring and Analytics

Application Security Monitoring

Supported APM Agents

Table of Contents

- Cisco Secure Application Components
- Cisco Secure Application Architecture
- Monitor Application Security Using Cisco Secure Application
- Select Scope for the Dashboard
- Navigate to AppDynamics Application or Tier Flow Map
- View Data Using Search Filter

End User Monitoring

- Overview of End User Monitoring
- Understand End User Activity
- View EUM Data
- On-Premises EUM Deployments
- Access the SaaS EUM Server
- How EUM Works with Other AppDynamics Products
- EUM and Application Performance Monitoring
- EUM and Application Analytics
- Experience Journey Map
- Experience Journey Map UI
- Browser Monitoring
- Overview of the Controller UI for Browser Monitoring
- Browser App Dashboard
- Resource Performance Dashboard
- IoT Monitoring
- Mobile Real User Monitoring

Database Visibility

Infrastructure Visibility

- Overview of Infrastructure Visibility
- Network Visibility
- Drill Down to the Root Cause
- Network Visibility Metrics
- Server Visibility
- Using the Server Visibility UI
- Basic Machine Metrics
- Java and .NET Infrastructure Monitoring

Table of Contents

Infrastructure Visibility Strategies

Analytics

Overview of Analytics

Analytics Home Page

Monitoring Cloud Applications

Docker

Monitor Containers with Docker Visibility

Enable Container Monitoring

Container Monitoring Setup

View Container Details

View Container Metrics Using the Metric Browser

Kubernetes

Using Docker Visibility with Kubernetes

Container Visibility with Kubernetes

Enable Container Visibility

Register the Container ID as the Host ID

Instrument Applications with Kubernetes

Deploy the Machine Agent on Kubernetes

ClusterRole Configuration

Network Visibility with Kubernetes

Cloud Monitoring with AppDynamics Cloud

Cloud Infrastructure Monitoring

AWS Cloud Infrastructure Observability

Azure Cloud Infrastructure Observability

Summary

References/Additional Reading

Chapter 5 Management

IT Challenges and Workload Management Solutions

Business Impact

Cisco Intersight Workload Optimizer

CWOM-to-IWO Migration

Optimize Hybrid Cloud Infrastructure with IWO

Table of Contents

How Intersight Workload Optimizer Works

Understanding the Market and Virtual Currency

Risk Index

Understanding Intersight Workload Optimizer Supply Chain

Supply Chain Terminology

Working with Intersight Workload Optimizer

Claiming AWS Targets

Claiming Azure Targets

Cisco Container Platform

Cisco Container Platform Architecture Overview

Components of Cisco Container Platform

Sample Deployment Topology

Administering Clusters on vSphere

Administering Amazon EKS Clusters Using CCP Control Plane

Licensing and Updates

Connected Model

Registering CCP Using a Registration Token

Upgrading Cisco Container Platform

Cisco Intersight Kubernetes Service

Benefits of IKS

Common Use Case

Deploying Consistent, Production-Grade Kubernetes Anywhere

How It Works

IKS Release Model

Deploy Kubernetes from Intersight

Step 1: Configure Policies

Step 2: Configure Profile

Summary

Cisco Webex Cloud Service Architecture

Webex Teams Security Features and Deployment Practices

Internet Access for Cloud-Based Services

Reducing Traffic to the Webex Cloud by Deploying Video Mesh Nodes

Webex Teams Inspection Capabilities

Table of Contents

- Webex Team Data Protection
- Webex Teams Apps Data at Rest Protection
- Webex Teams App for Web Data Storage
- Webex Team Indexing Service
- KMS On-Premises
- Webex Team Single Sign-On
- Multifactor Authentication
- IdP and MDM/MAM with Webex Teams
- Webex Teams Proximity and Device Pairing
- Proximity for Cloud-Registered Webex Devices
- Proximity for On-Premises Registered Webex Devices
- Other Webex Device Discovery Mechanisms

Summary

Chapter 7 Internet of Things (IoT)

How Do OT and IT Differ?

IoT Challenges

Cisco Kinetic Platform

- Why Cisco Kinetic
- Understanding Cisco Kinetic Platform
- Cisco Kinetic Gateway Management Module
- Cisco Kinetic Data Control Module
- Cisco Kinetic Edge & Fog Processing Module

Introduction to Cisco IoT

Edge Device Manager

- Supported Device Interfaces for Onboarding
- Onboarding Devices
- Onboarding IR devices
- SIM Card Activation and Seamless Device Onboarding
- SDO Architecture
- Secure Equipment Access
- Summary Steps

Table of Contents

Edge Intelligence

- Edge to Multicloud Data Flow
- Overview of Configuration Lifecycle Management in EI
- Enable and Manage EI Agents
- Asset Management Workflow
- Add Data Destinations
- Add an MQTT Server Destination
- Deploy Data Rules
- Deploy Data Logic

Licensing

Summary

Part 3 Cisco Cloud Security

Chapter 8 Cisco Cloud Security

Shadow IT Challenge

Cisco Cloudlock

- User Security
- Data Security
- Identify Sensitive Data in Cloud Environments
- Mitigate Increased Risk of Data Exposure in Cloud Applications
- Mitigate Risk Through Automated Responses
- App Security
- Enabling Cloudlock via WSA (11.5)
- The Evolution of Cloud Security Service
- DNS-Layer Security
- Secure Web Gateway
- Firewall
- Cloud Access Security Broker
- Interactive Threat Intelligence
- Integration with SD-WAN
- Leveraging Umbrella Log Files for Shadow IT Visibility
- Dashboard for Visibility and Trends
- Overview and Trending Information

Table of Contents

Application Details

Optimization

Application Blocking

Enabling Healthy and Efficient Cloud Adoption

Cisco Umbrella

Benefits

Deployment Options

Umbrella Integrations

Umbrella Packages

Cisco Secure Cloud Analytics

Understanding Secure Cloud Analytics

How Secure Cloud Analytics Works

Deployment

Dynamic Entity Modeling

Alerts and Analysis

Public Cloud Monitoring Configuration for Amazon Web Services

Public Cloud Monitoring Configuration for Google Cloud Platform

Single GCP Project Configuration

Multiple GCP Project Configuration

Public Cloud Monitoring Configuration for Microsoft Azure

Watchlist Configuration

Configuring the AWS CloudTrail Event Watchlist

Configuring the GCP Logging Watchlist

Configuring the Azure Activity Log Watchlist

Dashboard Overview

Cisco Duo Security

Multifactor Authentication from Duo

Types of 2FA

Duo Device Trust Monitor

Enforce Adaptive Policies

Secure Access for Every User

Secure VPN-Less Remote Access for Any Environment

Simple, Secure Single Sign-On
