## TO BE DANGEROUS

COMMAND LINE,  
TEXT EDITOR, AND GIT  
VERSION CONTROL  
ESSENTIALS

MICHAEL HARTL

# Praise for Learn Enough Tutorials

---

“Going through *Learn Enough Git* is wonderful. I am actually learning... I’ve done three other Git tutorials and still felt so lost. Doing it all now makes so much sense. It’s like a light bulb.”

—Janelle Staar

“I bought the *Learn Enough Command Line to Be Dangerous* last fall, and it’s paid off sooooo many times in my new job. During my first week, I had a manager sitting right beside me giving me the ‘go here, go there, do this, etc.’ Having watched, read, and done the exercises, I was confident in getting around the CLI [command-line interface]—and even had him asking, ‘What was that shortcut?’ For this, I thank you. Now I need a ‘Learn even more CLI to be dangerouser.’”

—Thomas Thackery

“I must say, this Learn Enough series is a masterpiece of education. Thank you for this incredible work!”

—Michael King

“I want to thank you for the amazing job you have done with the tutorials. They are likely the best tutorials I have ever read.”

—Pedro Iatzky

Preface

About the Author

### PART I: COMMAND LINE

#### Chapter 1 Basics

1.1 Introduction

1.2 Running a Terminal

1.2.1 Exercises

1.3 Our First Command

1.3.1 Exercises

1.4 Man Pages

1.4.1 Exercises

1.5 Editing the Line

1.5.1 Exercises

1.6 Cleaning Up

1.6.1 Exercises

1.7 Summary

1.7.1 Exercises

# **Table of Contents**

## **Chapter 2 Manipulating Files**

### **2.1 Redirecting and Appending**

#### **2.1.1 Exercises**

### **2.2 Listing**

#### **2.2.1 Hidden Files**

#### **2.2.2 Exercises**

### **2.3 Renaming, Copying, Deleting**

#### **2.3.1 Unix Terseness**

#### **2.3.2 Exercises**

### **2.4 Summary**

#### **2.4.1 Exercises**

## **Chapter 3 Inspecting Files**

### **3.1 Downloading a File**

#### **3.1.1 Exercises**

### **3.2 MakingHeads and Tailsoft**

#### **3.2.1 Wordcount and Pipes**

#### **3.2.2 Exercises**

### **3.3 Lessls More**

#### **3.3.1 Exercises**

### **3.4 Grepping**

#### **3.4.1 Exercises**

### **3.5 Summary**

#### **3.5.1 Exercises**

## **Chapter 4 Directories**

### **4.1 Directory Structure**

#### **4.1.1 Exercises**

### **4.2 Making Directories**

#### **4.2.1 Exercises**

### **4.3 Navigating Directories**

#### **4.3.1 Exercises**

### **4.4 Renaming, Copying, and Deleting Directories**

# Table of Contents

4.4.1 Grep Redux

4.4.2 Exercises

4.5 Summary

4.5.1 Exercises

4.6 Conclusion

## PART II: TEXTEDITOR

### Chapter 5 Introduction toText Editors

5.1 Minimum Viable Vim

5.2 Starting Vim

5.2.1 Exercises

5.3 Editing Small Files

5.3.1 Exercises

5.4 Saving and Quitting Files

5.4.1 Exercises

5.5 Deleting Content

5.5.1 Exercises

5.6 Editing Large Files

5.6.1 Exercises

5.7 Summary

5.7.1 Exercises

### Chapter 6 Modern Text Editors

6.1 Choosing a Text Editor

6.1.1 Sublime Text

6.1.2 Visual Studio Code (VSCode)

6.1.3 Atom

6.1.4 Exercises

6.2 Opening

6.2.1 Syntax Highlighting

6.2.2 Previewing Markdown

6.2.3 Exercises

6.3 Moving

# Table of Contents

6.3.1 Exercises

## 6.4 Selecting Text

6.4.1 SelectingaSingleWord

6.4.2 SelectingaSingleLine

6.4.3 SelectingMultipleLines

6.4.4 SelectingtheEntireDocument

6.4.5 Exercises

## 6.5 Cut,Copy,Paste

6.5.1 Jumpcut

6.5.2 Exercises

## 6.6 DeletingandUndoing

6.6.1 Exercises

## 6.7 Saving

6.7.1 Exercises

## 6.8 FindingandReplacing

6.8.1 Exercises

## 6.9 Summary

# Chapter 7 Advanced Text Editing

## 7.1 Autocomplete and Tab Triggers

7.1.1 Autocomplete

7.1.2 Tab Triggers

7.1.3 Exercises

## 7.2 Writing Source Code

7.2.1 Syntax Highlighting

7.2.2 Commenting Out

7.2.3 Indenting and Dedenting

7.2.4 Goto Line Number

7.2.5 80 Columns

7.2.6 Exercises

## 7.3 Writing an Executable Script

7.3.1 Exercises

## 7.4 Editing Projects

# Table of Contents

- 7.4.1 Fuzzy Opening
- 7.4.2 Multiple Panes
- 7.4.3 Global Find and Replace
- 7.4.4 Exercises

## 7.5 Customization

- 7.5.1 Exercises

## 7.6 Summary

## 7.7 Conclusion

## PART III: GIT

### Chapter 8 Getting Started with Git

#### 8.1 Installation and Setup

- 8.1.1 Exercises

#### 8.2 Initializing the Repo

- 8.2.1 Exercises

#### 8.3 Our First Commit

- 8.3.1 Exercises

#### 8.4 Viewing the Diff

- 8.4.1 Exercises

#### 8.5 Adding an HTML Tag

- 8.5.1 Exercises

#### 8.6 Adding HTML Structure

- 8.6.1 Exercises

#### 8.7 Summary

### Chapter 9 Backing Up and Sharing

#### 9.1 Signing Up for Git Hub

#### 9.2 Remote Repo

- 9.2.1 Exercises

#### 9.3 Adding a README

- 9.3.1 Exercises

#### 9.4 Summary

### Chapter 10 Intermediate Workflow

# **Table of Contents**

## 10.1 Commit, Push, Repeat

### 10.1.1 Exercises

## 10.2 Ignoring Files

### 10.2.1 Exercises

## 10.3 Branching and Merging

### 10.3.1 Rebasing

### 10.3.2 Exercises

## 10.4 Recovering from Errors

### 10.4.1 Exercises

## 10.5 Summary

## Chapter 11 Collaborating

## 11.1 Clone, Push, Pull

### 11.1.1 Exercises

## 11.2 Pulling and Merge Conflicts

### 11.2.1 Non-conflicting Changes

### 11.2.2 Conflicting Changes

### 11.2.3 Exercises

## 11.3 Pushing Branches

### 11.3.1 Exercises

## 11.4 A Surprise Bonus

### 11.4.1 Exercises

## 11.5 Summary

## 11.6 Advanced Setup

### 11.6.1 A Checkout Alias

### 11.6.2 Prompt Branches and Tab Completion

### 11.6.3 Exercises

## 11.7 Conclusion

## Appendix: Development Environment

### A.1: Dev Environment Options

### A.2: Cloud IDE

### A.3: Native OS Setup

# **Table of Contents**

A.3.1: macOS

A.3.2: Linux

A.3.3: Windows

A.4: Conclusion
