Preface

CHAPTER 1 Getting Started

Chapter Objectives

1-1 Introduction

1-2 Starting a New Document

Starting a New Part Document

Selecting a Sketch Plane

1-3 SolidWorks Colors

1-4 Creating a Fully Defined Circle

Changing an Existing Dimension

Fully Defined Entities

1-5 Units

Changing Units

1-6 Rectangle

Sketching a Rectangle

Exiting the Sketch Mode

Reentering the Sketch Mode

1-7 Moving Around the Drawing Screen

Zooming the Rectangle

Moving the Rectangle

Reorientating the Rectangle

1-9 Sample Problem SP1-1

Fixing a Line in Place

Sketch Relations

1-8 Orientation

Table of Contents

Returning to the Top View OrientationView Selector

Returning to the Top View OrientationTop View

Returning to the Top View OrientationOrientation Triad

1-10 Creating 3D Models

Creating a 3D Model

1-11 Saving Documents

Saving a Document

1-12 Sample Problem SP1-2

1-13 Holes

Creating a Hole

Chapter Project

CHAPTER 2 Sketch Entities and Tools

Chapter Objectives

2-1 Introduction

2-2 Mouse Gestures and the S Key

Mouse Gestures

Using Mouse Gestures

Accessing Mouse Gestures Settings

Adding a Tool to a Mouse Gestures Wheel

S Key

Activating the S Key

Customizing the S Key Shortcut Toolbar

Removing a Tool from the S Key Toolbar

2-3 Origins

Showing the Origin

2-4 Circle

Sketching a Circle

Sketching a Perimeter Circle Using Three Points

Sketching a Perimeter Circle Tangent to Three Lines

2-5 Rectangle

Sketching a Center Rectangle

Sketching a 3 Point Corner Rectangle

Sketching a 3 Point Center Rectangle

Sketching a Parallelogram

2-6 Slots

Sketching a Straight Slot

Table of Contents

Sketching a Centerpoint Straight Slot

Sketching a 3 Point Arc Slot

Sketching a Centerpoint Arc Slot

2-7 Perimeter Circle

Sketching a Perimeter Circle

2-8 Arcs

Sketching a Centerpoint Arc

Sketching a Tangent Arc

Sketching a 3 Point Arc

2-9 Polygons

Sketching a Hexagon

2-10 Spline

Sketching a Spline

Editing a Spline

2-11 Ellipse

Sketching an Ellipse

Sketching a Partial Ellipse

Sketching a Parabola

Conic Section

Sketching a Conic

2-12 Fillets and Chamfers

Sketching a Fillet

Sketching a Chamfer

Sketching a Chamfer Using Distance-DistanceEqual Distance

Sketching a Chamfer Using Angle-Distance

Sketching a Chamfer Using Distance-Distance Not Equal Distance

2-13 Sketch Text

Adding Text

Changing the Font and Size of Text

Adding Text to a Feature

Creating Text that Wraps Around Two Features

2-14 Point

2-15 Trim Entities

Trimming Entities

2-16 Extend Entities

Extending Entities in a Sketch

Table of Contents

2-17 Offset Entities

Sketching an Offset Line

2-18 Mirror Entities

Creating a Mirror Entity

2-19 Linear Sketch Pattern

Creating a Linear Sketch Pattern

2-20 Circular Sketch Pattern

Creating a Circular Sketch Pattern

2-21 Move Entities

Moving an Entity

2-22 Copy Entities

Copying an Entity

2-23 Rotate Entities

Rotating an Entity

2-24 Scale Entities

Scaling an Entity

2-25 Stretch Entities

Stretching an Entity

2-26 Split Entities

Splitting an Entity

2-27 Jog Lines

Using the Jog Line Tool

2-28 Centerline

Using the Centerline Tool

2-29 Sample Problem SP2-1

2-30 Sample Problem SP2-2

2-31 Sample Problem SP2-3

Chapter Projects

CHAPTER 3 Features

Chapter Objectives

3-1 Introduction

3-2 Extruded Boss/Base

Using the Extruded Boss/Base Tool

Creating Inward Draft Sides

Creating an Outward Draft

Table of Contents

3-3 Sample Problem SP3-1

3-4 Extruded Cut

3-5 Hole Wizard

3-6 Creating a Hole with the Circle and Extruded Cut Tools

3-7 Blind Holes

Creating a Blind HoleInches

Creating a Blind HoleMetric

3-8 Fillet

Creating a Fillet with a Variable Radius

Creating a Fillet Using the Face Fillet Option

Creating a Fillet Using the Full Round Fillet Option

3-9 Chamfer

Defining a Chamfer Using an Angle and a Distance

Defining a Chamfer Using Two Distances

Defining a Vertex Chamfer

3-10 Revolved Boss/Base

3-11 Revolved Cut

3-12 Reference Planes

Creating a Reference Plane

3-13 Lofted Boss/Base

3-14 Shell

3-15 Swept Boss/Base

3-16 Draft

3-17 Linear Sketch Pattern

3-18 Circular Sketch Pattern

3-19 Mirror

3-20 Helix Curves and Springs

Drawing a Helix

Drawing a Spring From the Given Helix

3-21 Compression Springs

Creating Ground Ends

3-22 Torsional Springs

Drawing a Torsional Spring

3-23 Extension Springs

Table of Contents

Drawing an Extension Spring

3-24 Wrap

Creating Debossed Text

3-25 Editing Features

Editing the Hole

Editing the Cutout

3-26 Sample Problem SP3-2

Drawing a Cylinder

Creating a Slanted Surface on the Cylinder

Adding the Vertical Slot

Adding the Ø8 Hole

3-27 Sample Problem SP3-3

3-28 Curve Driven Patterns

Using the Curve Driven Pattern ToolExample 1

Using the Curve Driven Pattern ToolExample 2

Chapter Projects

CHAPTER 4 Orthographic Views

Chapter Objectives

4-1 Introduction

4-2 Third- and First-Angle Projections

4-3 Fundamentals of Orthographic Views

Normal Surfaces

Hidden Lines

Precedence of Lines

Slanted Surfaces

Compound Lines

Oblique Surfaces

Rounded Surfaces

4-4 Drawing Orthographic Views

Moving Orthographic Views

Creating Other Views

4-5 Section Views

4-6 Drawing a Section View

Changing the Style of a Section View

4-7 Aligned Section Views

Table of Contents

4-8 Broken Views

Creating a Broken View

4-9 Detail Views

Drawing a Detail View

4-10 Auxiliary Views

Drawing an Auxiliary View

4-11 First-Angle Projection

Creating Three Orthographic Views Using First-Angle Projection

Chapter Projects

CHAPTER 5 Assemblies

Chapter Objectives

5-1 Introduction

5-2 Starting an Assembly

5-3 Move Component

5-4 Rotate Component

5-5 Mouse Gestures for Assemblies

5-6 Mate

Creating the First Assembly Using Mates

Creating a Second Assembly

Creating a Third Assembly

5-7 Bottom-up Assemblies

5-8 Creating an Exploded Isometric Assembly

5-9 Creating an Exploded Isometric Drawing

5-10 Assembly Numbers

5-11 Bill of Materials (BOM or Parts List)

Editing the BOM

Adding Columns to the BOM

Changing the Width of a Column

Changing the Width of Rows and Columns

Changing the BOMs Font

5-12 Title Blocks

Revision Letters

Editing a Title Block

Release Blocks

Tolerance Blocks

Table of Contents

Application Blocks

5-13 Animate Collapse

5-14 Sample Problem SP5-1

5-15 Using the Motion Study Tool

Viewing the Assembly Motion

5-16 Editing a Part Within an Assembly

5-17 Interference Detection/Clearance Verification

Interference Detection

Detecting an Interference

Verifying the Clearance

Removing the Interference

Verifying that a Clearance Exists

Chapter Projects

CHAPTER 6 Threads and Fasteners

Chapter Objectives

6-1 Introduction

6-2 Thread Terminology

Pitch

6-3 Thread CalloutsANSI Metric Units

6-4 Thread CalloutsANSI Unified Screw Threads

6-5 Thread Representations

6-6 Internal ThreadsInches

6-7 Threaded Blind HolesInches

6-8 Internal ThreadsMetric

6-9 Accessing the Design Library

6-10 Thread Pitch

6-11 Determining an External Thread LengthInches

6-12 Smart Fasteners

6-13 Determining an Internal Thread Length

6-14 Set Screws

6-15 Drawing a Threaded Hole in the Side of a Cylinder

6-16 Adding Set Screws to the Collar

Chapter Projects

CHAPTER 7 Dimensioning

Table of Contents

Chapter Objectives

7-1 Introduction

7-2 Terminology and ConventionsANSI

- Common Terms

- Dimensioning Conventions

- Common Errors to Avoid

7-3 Adding Dimensions to a Drawing

- Controlling Dimensions

- Dimensioning Short Distances

- Autodimension Tool

- Creating Baseline Dimensions

- Creating Ordinate Dimensions

7-4 Drawing Scale

7-5 Units

- Aligned Dimensions

- Hole Dimensions

7-6 Dimensioning Holes and Fillets

- Dimensioning a Blind Hole

- Dimensioning Hole Patterns

7-7 Dimensioning Counterbored and Countersunk Holes

- Counterbored Hole with Threads

- Dimensioning Countersink Holes

- Dimensioning the Block

7-8 Angular Dimensions

- Dimensioning an Evenly Spaced Hole Pattern

7-9 Ordinate Dimensions

- Creating Ordinate Dimensions

7-10 Baseline Dimensions

- Creating Baseline Dimensions

- Hole Tables

7-11 Locating Dimensions

7-12 Fillets and Rounds

7-13 Rounded ShapesInternal

7-14 Rounded ShapesExternal

7-15 Irregular Surfaces

Table of Contents

- 7-16 Polar Dimensions
- 7-17 Chamfers
- 7-18 Symbols and Abbreviations
- 7-19 Symmetrical and Centerline Symbols
- 7-20 Dimensioning to a Point
- 7-21 Dimensioning Section Views
- 7-22 Dimensioning Orthographic Views
 - Dimensions Using Centerlines

Chapter Projects

CHAPTER 8 Tolerancing

Chapter Objectives

- 8-1 Introduction
- 8-2 Direct Tolerance Methods
- 8-3 Tolerance Expressions
- 8-4 Understanding Plus and Minus Tolerances
- 8-5 Creating Plus and Minus Tolerances
 - Adding Plus and Minus Symmetric Tolerances Using the Dimension Text Box
- 8-6 Creating Limit Tolerances
- 8-7 Creating Angular Tolerances
- 8-8 Standard Tolerances
- 8-9 Double-Dimensioning Errors
- 8-10 Chain Dimensions and Baseline Dimensions
 - Baseline Dimensions
- 8-11 Tolerance Studies
 - Calculating the Maximum Length of A
 - Calculating the Minimum Length of A
- 8-12 Rectangular Dimensions
- 8-13 Hole Locations
- 8-14 Choosing a Shaft for a Toleranced Hole
 - For Linear Dimensions and Tolerances
- 8-15 Sample Problem SP8-1
- 8-16 Sample Problem SP8-2
- 8-17 Nominal Sizes
- 8-18 Standard Fits (Metric Values)

Table of Contents

Clearance Fits

Transitional Fits

Interference Fits

8-19 Standard Fits (Inch Values)

Adding a Fit Callout to a Drawing

Reading Fit Tables

8-20 Preferred and Standard Sizes

8-21 Surface Finishes

8-22 Surface Control Symbols

8-23 Applying Surface Control Symbols

Adding a Lay Symbol to a Drawing

8-24 Design Problems

Floating Condition

Fixed Condition

Designing a Hole Given a Fastener Size

8-25 Geometric Tolerances

8-26 Tolerances of Form

8-27 Flatness

8-28 Straightness

8-29 Straightness (RFS and MMC)

8-30 Circularity

8-31 Cylindricity

8-32 Geometric Tolerances Using SolidWorks

8-33 Datums

Adding a Datum Indicator

Defining a Perpendicular Tolerance

Defining a Straightness Value for Datum Surface A

8-34 Tolerances of Orientation

8-35 Perpendicularity

8-36 Parallelism

8-37 Angularity

8-38 Profiles

8-39 Runouts

8-40 Positional Tolerances

Table of Contents

8-41 Creating Positional Tolerances

Creating the Positional Tolerance

8-42 Virtual Condition

Calculating the Virtual Condition for a Shaft

Calculating the Virtual Condition for a Hole

8-43 Floating Fasteners

8-44 Sample Problem SP8-3

8-45 Sample Problem SP8-4

8-46 Fixed Fasteners

8-47 Sample Problem SP8-5

8-48 Design Problems

Chapter Projects

CHAPTER 9 Bearings and Fit Tolerances

Chapter Objectives

9-1 Introduction

9-2 Sleeve Bearings

Drawing a Sleeve Bearing

Using a Sleeve Bearing in an Assembly Drawing

9-3 Bearings from the Toolbox

9-4 Ball Bearings

9-5 Fits and Tolerances for Bearings

9-6 FitsInches

9-7 Clearance Fits

9-8 Hole Basis

9-9 Shaft Basis

9-10 Sample Problem SP9-1

9-11 Interference Fits

9-12 Manufactured Bearings

Clearance for a Manufactured Bearing

Applying a Clearance Fit Tolerance

Interference for a Manufactured Bearing

Applying an Interference Fit Tolerance

Applying Standard Fit Tolerances to an Assembly Drawing

9-13 Fit TolerancesMillimeters

Table of Contents

Chapter Projects

CHAPTER 10 Gears

Chapter Objectives

10-1 Introduction

10-2 Gear Terminology

10-3 Gear Formulas

10-4 Creating Gears

 Creating a Gear Assembly

 Animating the Gears

10-5 Gear Ratios

10-6 Gears and Bearings

 Adding Bearings

10-7 Power Transmission Shaft to Gear

10-8 Set Screws and Gear Hubs

 Adding a Threaded Hole to the Gears Hub

10-9 Keys, Keyseats, and Gears

 Defining and Creating Keyseats in Gears

 Returning to the Assembly Drawing

 Defining and Creating a Parallel Key

 Creating a Keyseat in the Shaft

 Creating the Keyseat

 Creating the Arc-Shaped End of a Keyseat

10-10 Sample Problem SP10-1

 Determining the Pitch Diameter

 Editing the Bill of Materials

10-11 Rack and Pinion Gears

 Animating the Rack and Pinion

10-12 Metric Gears

 Creating a Metric Gear

Chapter Projects

CHAPTER 11 CSWA Preparation

Chapter Objectives

11-1 Introduction

11-2 Working with Cubes
