Contents at a Glance

Contents

Foreword

Introduction

Chapter 1 Intersight Foundations

Introduction

Intersight Architecture

Unlimited Scalability

Service Architecture

Operational Intelligence

Consumption Models

Software as a Service (SaaS)

On-Premises Appliance-Based Options

Intersight Consumption Model Feature Comparison

Target Connectivity

Device Connector

Assist Service

Adding Targets to Intersight

Target Claim Process Options

Table of Contents

Claiming Targets Without an Embedded Device Connector

Interacting with Intersight

Licensing

Summary

References

Chapter 2 Security

Introduction

Connectivity

Claiming

Role-Based Access Control (RBAC)

Audit Logs

Data Security

 Data Collected

 Data Protection

 Certifications

Security Advantages

Summary

References

Chapter 3 Infrastructure Operations

Introduction

Device Health and Monitoring

 Intersight Alarm Mapping

 Alarm Types

 Alarm States

 Viewing and Reacting to Alarms

Linking Intelligence Feeds

 Hardware Compatibility List

Table of Contents

- HCL Validation Process
- Viewing HCL Status Information
- Locating and Downloading Recommended Drivers
- Configuring OS Tools for HCL
- Required Credentials and Licensing
- Advisories
- Advisory Types
- Navigating Advisories
- Advisory Caveats, Credentials, and Licensing

Integrated Support

- Opening a Support Case
- FastStart Log Collection
- Contract and Warranty Status
- Proactive Support
- Proactive RMA Process
- Proactive Support Customization

Infrastructure Configuration

- Software Repository
- Intersight Requests
- Tagging
- Exporting Data

ITSM Integration

UCS Director Integration

- Claiming UCS Director Instances
- Using UCS Director with Intersight

Summary

References

Chapter 4 Server Operations

Table of Contents

Introduction

Supported Systems

Server Actions

- Single Server Actions

- Bulk Server Actions

- Server Action Details

- Power Cycle

- Hard Reset

- Install Operating System

- vKVM Versus Tunneled vKVM

Server Deployment

- Server Policies

- ID Pools

- Server Profiles

- Server Profile States

- Standalone Servers

- Fabric Interconnect (FI) Attached Servers

- Server Profile Templates

Domain Management

- Traditional UCS Domains

- Intersight Managed Mode

- Benefits of Domains Running Intersight Mode

- Getting Started with Intersight Mode

- Hybrid Domain Operations

Firmware Updates

- Standalone Server Updates

- UCSM Server Updates

- UCS Domain Updates

Summary

Table of Contents

Reference

Chapter 5 Network Operations

Introduction

Policy-Driven Network Infrastructure

Domain Policies

Nexus Dashboard

Domain Profiles

Summary

Reference

Chapter 6 Storage Operations

Introduction

Hyperconvergence

Traditional Storage (Converged Infrastructure)

HyperFlex

Solution Architecture

Data Distribution

Data Optimization

Independent Scaling

High Availability and Reliability

Replication

Stretched Clusters

Logical Availability Zones

Software Encryption

Simplified HX Operations with Intersight

HyperFlex at the Edge (HX Edge)

Two-Node Edge (Cloud Witness)

HX Policies

HyperFlex Cluster Profiles

Table of Contents

Visibility

Deploying HyperFlex Clusters

Pre-installation

Installation

Post-installation

Managing HX Clusters

Actions

Launching HX Connect

Running a Health Check

Backing Up and Restoring

Monitoring

Full-Stack HyperFlex Upgrade

Traditional Storage Operations

Summary

References

Chapter 7 Virtualization Operations

Introduction

Claiming a vCenter Target

Claiming an AWS Target

Contextual Visibility

Contextual Operations

Virtualization Orchestration

Summary

Reference

Chapter 8 Kubernetes

Introduction

Intersight Kubernetes Service

Table of Contents

Benefits of IKS

Cluster Management

- Creating Clusters with IKS
- Cluster Lifecycle
- Upgrading Kubernetes Clusters
- Node Pools
- Undeploying Kubernetes Clusters
- Attached Clusters
- Service Mesh
- Service Mesh Manager
- Installing the SMM Add-on
- Launching the SMM UI
- Mesh Lifecycle Management
- Observability Toolbox
- Multi-cluster Topologies

Intersight Workload Engine

- IWE Installation
- Monitoring the Cluster Deployment
- Deploying Cisco Intersight Kubernetes Service

Summary

References

Chapter 9 Workload Optimization

Introduction

- Traditional Shortfalls of IT Resource Management
- Paradigm Shift

Users and Roles

Targets and Configuration

The Supply Chain

Table of Contents

Actions

Groups and Policies

- Groups

- Policies

- Placement Policies

- Automation Policies

- Best Practices

- Crawl

- Walk

- Run

Planning and Placement

- Plan

- Placement

The Public Cloud

- On-Demand Versus Reserved Instances

- Public Cloud Migrations

Summary

References

Chapter 10 Orchestration

Introduction

Automation and Orchestration

Intersight Orchestration

- Basic Design Concepts

- Executors

- Operations

- Inputs and Outputs

- Data Types

- Orchestration Tasks

Table of Contents

Workflows

Workflow Version Control

Workflow Execution

History and Cloning Execution

Rollback Execution

Use Cases

Application Stack Orchestration

Storage Orchestration

Summary

Chapter 11 Programmability

Introduction

OpenAPI

Versioning

The Information Model

Managed Objects (Resources)

Referencing Objects (MOID)

Managed Object Tagging

Rate Limiting

Client SDKs

Authentication and Authorization

API Keys

Privileges and Capabilities

Crawl, Walk, Run

Crawl

Walk

Installing Postman

Getting Started with Postman

Run

Creating a Virtual Environment

Table of Contents

Configuring the Client

Advanced Usage

Reducing Payload Size

\$select

\$filter

\$inlinecount

\$count

Reducing Client-Side Processing

\$apply for Aggregation

\$orderby for Sorting

Reducing the Number of Required API Calls

Next Steps: Use Cases

Use Case 1: Retrieving All Critical Alarms Within the Past 7 Days

PowerShell

Python

Use Case 2: Pulling Valuable Details from the Audit Log

PowerShell

Python

Use Case 3: Applying Tags Specified in a CSV File

PowerShell

Python

Use Case 4: Toggling the Locator LED

Use Case 5: Configuring Proactive Support

Opting In to Proactive RMAs

Opting Out of Proactive RMAs

Summary

References

Chapter 12 Infrastructure as Code

Introduction

Table of Contents

What Is Infrastructure as Code?

How Does IaC Work?

Infrastructure as Code Tools

AWS CloudFormation

Azure Resource Manager

Google Cloud Deployment Manager

HashiCorp Terraform

HashiCorp Terraform

Intersight and Infrastructure as Code

Why Terraform Cloud?

Intersight Service for HashiCorp Terraform

Setting Up Intersight Service for HashiCorp Terraform

Providers

Cisco ACI Provider

Cisco MSO Provider

Cisco Intersight Provider

IST and Intersight Cloud Orchestrator

Summary

Index
