Contents at a Glance

Contents

Introduction

Chapter 1 Why Do We Need NetDevOps?

- Market Trends

- Modern Networking Products

 - Configuration Management Overview

 - Scenario: SDN-Based Networks

 - Scenario: Non-SDN-Based Networks

 - Network Management Overview

- NetDevOps and Its Advantages

 - Team Roles in NetDevOps

 - Stages of NetDevOps

 - Plan

 - Code

 - Build

 - Test

 - Release

 - Deploy

Table of Contents

Operate

Monitor

Continuous Integration/Continuous Delivery/Deployment (CI/CD)

Tools/Components

Configuration Management

Version Control System

CI/CD

Testing

Summary

Review Questions

Chapter 2 Getting Started with NetDevOps

Use Cases

Provisioning

Configuration

Data Collection

Compliance

Monitoring and Alerting

Reporting

Migrations

Troubleshooting

Combined

Decisions and Investments

Where to Start

Skills

Tooling

Organizational Changes

Adoption Challenges

Traditional Mindset

Testing or Lack Thereof

Review Questions

Chapter 3 How to Implement CI/CD Pipelines with Jenkins

Jenkins Architecture

Jenkins Installation

Infrastructure for the Jenkins Server

Installing the Jenkins Packages

Accessing Jenkins on the Web for the First Time

Plugins

Use Cases for Plugins

Management and Installation of Plugins

Pipelines

Declarative Pipelines

Use Case: Declarative Pipeline to Validate Ansible Playbook

Scripted Pipelines

Use Case: Scripted Pipeline to Validate Ansible Playbook

Triggers

Build After Other Projects Are Built

Build Periodically

Poll SCM

Trigger Builds Remotely

GitHub Hook Trigger for GITScm Polling

Use Case: GitHub Webhook and Jenkins

Use Case: Jenkinsfile in Git and Webhook

Alternatives

Review Questions

Chapter 4 How to Implement NetDevOps Pipelines with Jenkins

Common Stages

- Retrieving Code from Source Control

- Linting

- Testing

- Rolling Back on Failure

- Pausing for Input

- Cleaning Up

- Chaining Pipelines

Single-Operation Pipelines

- Provisioning

- Configuration

- Data Collection

- Compliance and Reporting

Combined Pipelines

- Migrations

- Troubleshooting

Summary

Review Questions

Chapter 5 How to Implement Virtual Networks with EVE-NG

What Is EVE-NG?

Installation of EVE-NG

- Installation of EVE-NG on Google Cloud Platform

- Custom Image on GCP Console

- Terraform Configuration File

- EVE-NG Software Installation on Instance

- First-Time Web Access to EVE-NG

Table of Contents

Use Case: Lab Using Cisco CSR 1000V

- Image Types on EVE-NG and Adding a CSR 1000V Image

- Lab Topology Within EVE-NG

Use Case: External IP Connectivity for Lab Topology

- Step 1 Add Cloud Network in EVE-NG Lab Topology Canvas

- Step 2 Connect CSR-1 to Cloud Network

- Step 3 Configure EVE-NG Server IP Address and Modify Linux Kernel Settings

- Step 4 Add IP Routing and Modify Firewall Rules on GCP

APIs of EVE-NG

Review Questions

Chapter 6 How to Build Your Own NetDevOps Architecture

Applying Configuration Changes

- Requirements

- Target Network Devices

- Setting Up Source Control

- Developing Infrastructure as Code

- Setting Up CI/CD

Verifying Security Compliance Using ChatOps

- Requirements

- Setting Up Source Control

- Developing Infrastructure as Code

- Setting Up CI/CD

- Setting Up the Chat Interface
